Golden Motherhood
It is a journey to the roots of life. A journey to the origins of us all: To the mother. The first light. Light gives us hope in life, it shows us the way. Just like a loving mother who
accompanies her child on the long journey of life. So what tools should be given to people who are being rehabilitated after prison? It is the
light and the ability to see. Many people have eyes and can see in theory. But do they
really see? Do you perceive the light and hope of life?
Art not only saves lives, it also gives people one. And in my eyes, that is one of the most beautiful tasks that a passion can do and gives people incredible strength in life.
