

Unlock Seamless Access & Unrivalled Control with FAR Meraki Access Service

Full management of your critical network infrastructure — perform, protect, scale.

At FAR Networks, we deliver end-to-end network and system management services designed for mission-critical infrastructures. With **Meraki Access Service**, you get constant monitoring, proactive management, and simplified control over your enterprise network — ensuring top performance, security, and reliability.

What you'll gain:

- Unified dashboard management: streamline operations, reduce fragmentation and speed up issue resolution.
- Lower operational costs: eliminate the need for external RADIUS servers, VPN tunnels, load-balancers and other infrastructure.
- Built-in scalability & high availability: designed to support growing numbers of users and devices without compromise.
- Automatic updates: stay current with the latest features and patches — no manual interventions.
- Accelerated Zero-Trust adoption: native micro-segmentation policies help limit ransomware propagation.

- Immediate access controls: VLANs, ACLs and other rules apply without complex integrations.
- Seamless third-party cloud integrations: enable context-based permissions (e.g., via Entra ID).

Transform Your Network with FAR Meraki Access Service

FAR Networks helps organizations move to a cloud-based, subscription-driven model with Cisco Meraki — providing you with continuous innovation, predictable costs, and enterprise-grade performance.

With FAR Meraki Access Service, you get a full-featured networking platform delivered “as-a-service”, managed and optimized by FAR’s certified experts.

Why Choose a Subscription Contract?

- All-inclusive model — hardware, software, and support in a single predictable plan
- Automatic upgrades — always benefit from the latest Meraki innovations and security features
- Cloud-first simplicity — manage all your devices from one dashboard, anywhere, anytime
- Lower TCO — no hidden costs, fewer on-prem resources, and reduced downtime
- Scalable licensing — flexible subscription terms that grow with your business
- Built-in security — Zero Trust policies and intelligent threat detection included
- Continuous FAR support — proactive monitoring, reporting, and incident management included

Why Choose FAR Networks?

With FAR Networks you partner with a team dedicated to keeping your network resilient, efficient and secure. Our far-reaching expertise in secure networks and IT services ensures that your infrastructure not only performs, but keeps you safe.

Our Services at a Glance:

1. 24/7 proactive infrastructure monitoring
2. Rapid handling of tickets, incidents & change requests
3. Real-time IoT technology integration for continuous monitoring
4. Performance analysis & periodic reporting
5. Risk prevention & operational continuity
6. Ongoing support to secure your enterprise network
