# SMOOSH

---

***Smoosh is a hyper-compressed, aggressively high-contrast typeface with painfully sharp serifs designed to work in sizes from big to really, really big. The family has a range of weights, each with several optical sizes to ensure that the stroke contrast is never comfortably even. It works great for text that needs to look both beautiful and obnoxious at the same time.***

## SMOOSH MEDIUM

The figure consists of four panels arranged horizontally, showing a sequence of shapes. Each panel features a thick black vertical bar on the right and a white U-shaped cutout on the left. In the first panel, the U-shaped cutout is positioned on the left side. In the second panel, the U-shaped cutout has moved to the right, and a small white horizontal bar is visible at the bottom. In the third panel, the U-shaped cutout is further to the right, and the white horizontal bar is larger. In the fourth panel, the U-shaped cutout is almost entirely on the left, and the white horizontal bar is very large, nearly filling the gap.
