

## FINAL TERMS OF THE BONDS

29 May 2026

A CLOSED-ENDED INVESTMENT COMPANY INTENDED FOR INFORMED INVESTORS

UAB VICTORY DEVELOPMENT CENTRAL

Issue of EUR 600,000 Bonds

under the EUR 16,400,000 Bond Issue

### **MiFID II Product Governance / Eligible Counterparties, Professional Clients and Retail Clients Target Market**

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Bonds has led to the conclusion that (i) the target market for the Bonds is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"), and (ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Bonds to retail clients are appropriate: investment advice, and portfolio management, and non-advised services, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Bonds (a "**Distributor**") should take into consideration the manufacturer's target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

### **General Provisions**

This document constitutes the Final Terms for the Bonds described herein and must be read in conjunction with the Company's base prospectus drawn up by the Company, dated 26 March 2026 (the "**Prospectus**") and Terms and Conditions which are provided therein. Full information on the Company and the offer of the Bonds is only available on the basis of the combination of these Final Terms, the Terms and Conditions and the Prospectus. The Prospectus (including all its supplements (if any)) is and will be available for acquaintance at the Company's website (<https://www.demus.lt/fondai/victory-development-central>). Terms used herein shall be deemed to be defined as such for the purposes of the Terms and Conditions of the Bonds.

Before making a decision to invest in the Bonds each prospective investor shall read the Prospectus, taking into account the risks outlined therein.

A summary of this Tranche of Bonds has been appended to these Final Terms. The Final Terms have been approved by a Decision. The Final Terms have been filed with the Bank of Lithuania but are not subject to approval proceedings.

### 2.3. What are the key risks that are specific to the Issuer?

#### *Financial risks*

- (i) **Construction cost and Project's success risk.** The Company is developing the "Tyzenhauz" residential complex in Vilnius, the Republic of Lithuania. Construction commenced in Q4 2025, with full completion expected in Q3 2027, and the estimated total Project cost until the redemption of the Bonds amounts to approximately EUR 24.7 million. The Project is exposed to development-related risks, including increases in construction costs due to rising material prices, labour shortages, contractor costs, inflationary pressures or changes in regulatory requirements, any of which could result in delays, cost overruns or the need to secure additional funding on unfavourable terms. As the Company's ability to generate cash flow is closely linked to the successful and timely completion and sale of the Project's units, any material deviation from the planned construction budget or timeline could adversely affect the Project's overall profitability and the Company's ability to service and redeem the Bonds.
- (ii) **Credit, default and liquidity risk of the Company.** The Company does not generate recurring operating revenues, and its ability to service and redeem the Bonds depends primarily on the successful completion of the Project and the generation of cash proceeds from apartment sales. As noted in the audited financial statements for the financial year 2024, the Company historically operated at a loss and did not hold sufficient liquid current assets to cover its current liabilities; however, these capital adequacy issues have been addressed following receipt of the construction permit at the end of 2025, when convertible bonds were converted into share capital and additional equity was attracted, resulting in positive equity of EUR 2,658,366 as at 31 December 2025. Notwithstanding the foregoing, there can be no assurance that the Company will not experience similar liquidity or capital adequacy difficulties in the future, particularly if the Project encounters delays, cost overruns or lower-than-anticipated sales. The timing of cash inflows from pre-sales and final apartment transfers may not match the Company's payment schedule, and if cash flows are insufficient to meet the Company's obligations, the Company may be required to obtain additional external financing or refinancing, which may not be available on acceptable terms, or at all. The Company cannot guarantee that a default will not occur prior to the Final Maturity Date of the Bonds. The Management actively monitors and manages these risks and considers their likelihood to be manageable, however, if any of them materialise they could have a material adverse effect on the Company's business, financial position and its ability to service and redeem the Bonds when due.
- (iii) **Pre-sale strategy and sales execution risk.** The Company's financial projections and liquidity planning assume a phased pre-sale strategy for the Project's apartments. Although, as at the date of this Prospectus, the Company has secured a pre-sale ratio of 12% of the total saleable area of the Project, the remaining targets are indicative only and remain subject to market conditions, buyer demand, pricing dynamics and the timely progress of construction. Failure to meet pre-sale milestones may result in liquidity shortfalls, increased reliance on external financing, or the need to revise pricing or sales strategies on unfavourable terms. Pre-sale agreements may also, in certain circumstances, be terminated, delayed or renegotiated by purchasers. Any increase in cancellations, renegotiations or delays may reduce or postpone expected cash inflows and adversely affect the Company's financial position, profitability and ability to service and redeem the Bonds as scheduled.

#### *Business activities and industry risks*

- (i) **Residential property risk.** The Company's performance and its ability to service and redeem the Bonds are closely linked to conditions in the Vilnius residential real estate market. Demand for residential property, achievable sale prices, sales volumes and absorption rates are influenced by factors beyond the Company's control, including general economic conditions, inflation, interest rate levels, household income growth, demographic trends, buyer sentiment and competition from other residential developments in Vilnius. Adverse changes in market conditions may reduce buyers' purchasing power and demand, prolong selling periods, necessitate increased incentives or price reductions, and adversely affect both pre-sales and final sales performance. Any slowdown or deterioration in the Vilnius residential market could have a material adverse effect on the Company's financial position, liquidity and its ability to meet its obligations under the Bonds.
- (ii) **Competition risk.** The Company operates in a competitive residential real estate market in Vilnius, where several developers are simultaneously developing and marketing residential projects aimed at similar buyer segments. Competitive pressure may adversely affect the Company's sales performance by limiting pricing flexibility, slowing absorption rates or requiring the Company to offer incentives, discounts or more flexible payment terms. If competition intensifies or buyer demand shifts towards alternative developments, the Company may be required to adjust its sales and pricing strategy or increase reliance on external financing, which could have a material adverse effect on the Company's financial position, liquidity and its ability to service and redeem the Bonds when due.
- (iii) **Risk of limited investment diversification.** The Company's activities and investments are concentrated on a single residential real estate Project, with no material alternative assets, projects or revenue-generating operations to offset adverse developments. Any negative events relating to the Project, such as construction delays, cost overruns, contractor underperformance, permitting issues, weaker-than-expected sales or adverse changes in the Vilnius residential market, could have a disproportionate impact on the Company's business, financial condition, liquidity and cash flows, and could adversely affect its ability to redeem the Bonds at maturity. The Company assesses this risk as medium.

#### *Legal risks*

- (i) **Risk of legal disputes.** Although the Company is not currently involved in any legal proceedings, disputes may arise in the future in the ordinary course of the Project's development and sale, including with purchasers of apartments in connection with pre-sale agreements, or with contractors or other service providers in relation to the performance, scope, timing or cost of work. Given that the Issuer's activities are concentrated in a single development project, any material dispute may have a disproportionate impact on its financial position. Furthermore, any dispute that delays notarial transfers of apartments or release of funds from the Escrow Account may directly affect the Issuer's liquidity and timing of cash flows available for servicing or redeeming the Bonds. If any dispute were to be resolved unfavourably for the Company, it could result in financial losses, reputational harm, delays to the construction schedule or disruption to sales activities, and could impair the Company's ability to service and redeem the Bonds when due.
- (ii) **Risk related to changes in permitting, zoning or regulatory requirements.** The Project is subject to various permits, approvals and regulatory requirements under Lithuanian law. Although the Issuer has obtained the permits required as at the date of this Prospectus to commence construction, further approvals, inspections and completion documentation will be required as the Project progresses. Changes in laws, regulations, technical standards or administrative practices, or delays in obtaining required permits or approvals, may result in additional costs, construction delays or limitations on the use, sale or occupancy of the Project's units. Any delay in obtaining required completion or occupancy documentation may postpone notarial transfers and consequently delay the inflow of sales proceeds into the Escrow Account, which could have a material adverse effect on the Project's timeline, the Issuer's cash flows and its ability to service and redeem the Bonds.

#### *Operational, governance and internal control risks*

- (i) **Operational term.** The Company's operational term is currently extended only until 13 September 2027, and the Company may still be in the phase of completing sales and finalising project close-out when its operational term approaches expiry. The one-time extension right under the Company's Articles of Association has already been utilised, and the continuation of the Company's activities beyond its current term will require additional corporate actions and/or approvals. The Company intends to seek shareholder approval to amend its Articles of Association to permit a further extension of the operational term by a maximum period of one year; however, there can be no assurance that such amendment and extension will be obtained in a timely manner or at all. If the Company is unable to extend its operational term, it could be required to accelerate disposals or commence liquidation, which could adversely affect the timing and amount of cash flows available to service and redeem the Bonds.

### **3. KEY INFORMATION ON THE SECURITIES**

#### **3.1. What are the main features of the securities?**

##### **3.1.1. *Type, class and ISIN***

##### **3.1.2. *Currency, denomination, par value, number of securities issued and duration***

The currency of the Bonds is euros. The Nominal Value of Bond is EUR 1,000. The Maximum Aggregate Nominal Value of the Issue under the Prospectus amounts to EUR 16,400,000. The Final Maturity Date of the Bonds is 22 June 2028.

##### **3.1.3. *The rights attached to the securities***

The Bonds grant the Bondholders the following main rights, among others, (i) receive the interest accrued; (ii) to receive the Nominal Value and the interest accrued on the Final Maturity Date, or if applicable, on the Early Maturity Date or Early Redemption Date, or De-listing Event Put Date, and a premium, if applicable; (iii) to participate in the Bondholders' Meetings; (iv) to vote in the Bondholders' Meetings.

For the protection of the Bondholders' interests, on 5 December 2025 the Issuer has concluded the Trustee Agreement with UAB „AUDIFINA“, a private limited liability company, legal entity code 125921757, with its registered address at A. Juozapavičiaus st. 6, Vilnius, the Republic of Lithuania (the **Trustee**).

Moreover, the Issue is secured by the following collateral (the **Collateral**): (i) a first-ranking mortgage over Property (49 Collateral objects), the first Collateral Agreement was concluded on 17 December 2025 and is registered with the Register of Contracts and Liens, notarial register No. JŠ-13463, mortgage identification code 30000157776286. The Collateral secures all Bonds of the Issue (including any previously issued non-public Tranche and any future public or non-public Tranches) and ranks for the benefit of all Bondholders *pari passu* and without preference between different Tranches. Pursuant to the real estate valuation report dated 5 November 2025 (the Report), the value of the entire real estate Collateral as of 5 November 2025 was EUR 5,310,000. The real estate Collateral consists exclusively of the Land Plot and the buildings registered thereon in the name of the Issuer, and (ii) a Guarantee, in the maximum amount of EUR 1,300,000 in respect of the Secured Obligations, issued on 18 December 2025 by UAB Vanagas Asset Management, legal entity code 305025569, registered address at Lvivo g. 25-701, Vilnius, the Republic of Lithuania (the **Guarantor**) in favour of the Trustee, acting on behalf of and for the benefit of the Bondholders. The Guarantee secures all Bonds of the Issue on an equal basis and is not limited to a specific Tranche of the Bonds.

The Issuer has undertaken the following covenants in favor of the Bondholders: (i) LTC ratio; (ii) Negative Borrowing; (iii) Negative Pledge; (iv) Negative pay-outs; (v) Change of Control; (vi) Subordination; (vii) Collateral; (viii) Disposal of the Property; (ix) Decisions; (x) Reporting obligations.

#### 3.1.4. *Rank of securities in the Issuer's capital structure in the event of insolvency*

In case of the Issuer's liquidation or insolvency, the Investors shall have a right to receive payment of the outstanding principal amount of the Bonds and the interest accrued on the Bonds according to the relevant Lithuanian laws governing liquidation or insolvency of the Issuer, taking into account the rights of the Bondholders arising from the Collateral.

#### 3.1.5. *Restrictions on the free transferability of the securities*

Bonds are freely transferrable, subject to certain transfer restrictions under the relevant laws in certain jurisdictions, as may be applicable to the transferor or the transferee.

#### 3.2. Where will the securities be traded?

The Issuer will seek admission of the Bonds to trading on the alternative market First North (the **First North**), administered by the regulated market operator AB Nasdaq Vilnius (**Nasdaq**).

#### 3.3. What are the key risks that are specific to the securities?

##### *Risks related to the Bonds*

- (i) **Risk of insufficient value of the Collateral.** As at the date of the Prospectus, the Bonds are secured by a first-ranking mortgage over the Property existing on the Land Plot and by a Guarantee of a limited amount (EUR 1.3 million). A majority of the existing buildings comprised in the mortgaged Property is planned to be demolished as part of the Project and replaced with newly constructed buildings. Accordingly, (i) the current mortgage primarily secures assets that will cease to exist upon demolition; and (ii) the existing Collateral Agreement will not automatically extend to Property constructed after the date of the Prospectus, and any buildings constructed on the Land Plot thereafter will be required to be mortgaged separately under additional Collateral Agreement(s), to be entered into once newly constructed real estate objects are registered in the Real Estate Register. The Issuer intends to register newly constructed buildings upon reaching a minimal level of completion (approximately 3–5%) and to mortgage each newly registered building in favour of the Trustee within 20 Business Days of its registration; however, there can be no assurance that such registrations and mortgages will be completed within the anticipated timeframes. According to the real estate valuation report by UAB "Centro kuras – Nekilnojamosios turtas" dated 5 November 2025, the value of the entire real estate Collateral as of 5 November 2025 was EUR 5,310,000, as confirmed by the property appraiser's certificate dated 26 January 2026. The Issuer does not guarantee that the value of the Collateral will at any time equal or exceed the nominal value of the Bonds. In particular, during the period between demolition of existing buildings and registration and mortgaging of newly constructed buildings, the realisable value of the Collateral may be materially lower than the outstanding nominal amount of the Bonds. Construction permits do not form part of the Collateral and do not independently create realisable value. The Guarantee is limited to a fixed amount and may not be sufficient to satisfy a substantial portion of amounts due under the Bonds. Any proceeds from enforcement of the Collateral will first be applied to cover the Trustee's enforcement costs, and only the remaining amounts (if any) will be available for distribution to Bondholders. The Company has assessed this risk as high.
- (ii) **Refinancing risk.** The Company may need to refinance some or all of its outstanding debts, including the Bonds. The Issuer expects to redeem the Bonds primarily from cash proceeds generated by the sale of apartments forming the Project. There can be no assurance that the anticipated sales will be completed as planned, within the expected timeframe, or at prices sufficient to cover the Issuer's obligations under the Bonds. Slower sales, delays in notarial transfers, purchaser cancellations or defaults, or adverse changes in the Vilnius residential market may reduce or postpone cash proceeds available for redemption. If the Issuer is unable to generate sufficient cash proceeds from sales, it may be required to refinance through additional bond issuances, bank financing, or other forms of external

- funding, which may not be available on acceptable terms, or at all. Any inability to obtain refinancing when required, or refinancing obtained on materially less favourable terms, could adversely affect the Issuer's liquidity and its ability to redeem the Bonds in full and on time, which could have a material adverse effect on Bondholders.
- (iii) **Risk related to limited scope and enforceability of the Guarantee.** The Bonds are supported by a Guarantee for a limited maximum amount of EUR 1.3 million, which secures the entire outstanding Bond Issue on a pari passu basis and is not limited to any specific Tranche. The Guarantee does not constitute a comprehensive liquidity backstop and is not intended to ensure timely payment of interest or redemption of the Bonds in all circumstances. The total liability of the Guarantor is capped at EUR 1.3 million irrespective of the aggregate outstanding amount of the Bonds. The availability and enforceability of the Guarantee may depend on the financial condition of the Guarantor at the relevant time. There can be no assurance that the Guarantee will be sufficient to cover all amounts due under the Bonds, and the amount recoverable by individual Bondholders in an enforcement scenario may be materially lower than their respective outstanding claims. The Company assesses this risk as medium.
  - (iv) **Risk related to partial early redemption and reduction of Nominal Value.** In certain circumstances and subject to the Terms and Conditions, the Issuer may redeem the Bonds partially prior to the Final Maturity Date. In the case of a partial early redemption, the redeemed portion of the Nominal Value is allocated pro rata among all Bondholders and the Nominal Value of each Bond is reduced accordingly and recorded in the Register. Future interest payments and any subsequent redemption amounts will be calculated on the reduced Nominal Value only, which may result in lower overall returns than initially expected. In addition, Bondholders may be exposed to reinvestment risk, as amounts received upon partial early redemption may need to be reinvested at prevailing market rates, which may be lower than the interest rate applicable to the Bonds. The Company assesses this risk as medium.
  - (v) **Transaction costs/charges.** Investors should be aware that transactions in the Bonds may involve costs in addition to the relevant subscription, purchase or sale price, including brokerage and dealer fees, commissions, custody, clearing and settlement charges and other administrative expenses. Investors may also be affected by changes in the legal, regulatory or tax framework in Lithuania and/or in their jurisdiction of residence, which could reduce the investor's net return. Lithuanian tax resident natural persons should note that if the Issue Price of a Bond of a particular Tranche is higher than its Nominal Value, the difference between the Issue Price and the Nominal Value (i.e., a loss) cannot be used to reduce taxable interest income or other taxable income. The Company assesses this risk as low.
  - (vi) **No ownership and voting rights in General Meeting.** The Bonds are debt instruments and do not confer any ownership interest or voting rights in the General Meetings of the Issuer. Bondholders may vote only at Bondholders' Meetings convened in connection with matters relating to the Bonds. Resolutions at such meetings may be adopted by the requisite majority and will be binding on all Bondholders regardless of how any individual Bondholder voted, meaning there is a high likelihood that an individual Bondholder may be outvoted. The General Meeting may take decisions that could negatively affect the market price or liquidity of the Bonds. Considering that the completion of the Project and the redemption of the Bonds are in the interests of the shareholders, the Company assesses this risk as low; however, there is a high likelihood that resolutions adopted at a Bondholders' Meeting may not align with the preferences of a particular individual Bondholder.

#### *Offering and admission to trading on the First North related risks*

- (i) **There is no active trading market for the Bonds / Risk of De-listing Event (put option).** The Bonds will be applied for admission to trading on the First North, but there is no assurance that an active trading market will develop or that the Bonds will not be subject to a De-listing Event. As First North is a smaller market that typically features lower trading volumes, liquidity in the Bonds may be limited and Bondholders may have fewer opportunities to buy or sell, or may be required to sell at an unfavourable price, thereby incurring a loss. The Company assesses that the risk of no active market forming is high, while the risk of a De-listing Event (put option) is remote.
- (ii) **Bonds may not be appropriate to some Investors.** The Bonds may not be suitable for all investors. Potential investors should carefully assess whether the Bonds are appropriate for their personal circumstances, ensuring they have adequate financial resources and liquidity to withstand the risks, including the possibility of losing all or a substantial part of their investment. In particular, potential investors should: (i) possess sufficient knowledge and experience to evaluate the Bonds and the associated risks; (ii) have the financial resources to bear the risks; (iii) thoroughly understand the Bonds' terms and relevant market behaviour; and (iv) be able to consider various economic and interest rate scenarios. The Issuer will not assess whether the Bonds are appropriate financial instruments for investors, as this responsibility lies with the Lead Manager or Managers (if any). The Issuer evaluates this risk as low.
- (iii) **Cancellation of the Offering.** The Issuer reserves the right to cancel the Offering of any Tranche at any time before the Issue Date, for any reason, and without the consent of investors or the Trustee. If a Tranche Offering is cancelled, any Subscription Orders placed will be disregarded and any payments made will be refunded without interest or compensation. The Issuer will not be liable for any costs, damages, or losses incurred by prospective investors. Considering that the Issuer carefully plans the Offering and each Tranche, the Issuer considers the risk remote.

#### 4.2. Why is this Prospectus being produced?

The Prospectus has been prepared in connection with the (i) Offering in the Republic of Lithuania, Latvia and Estonia and (ii) Bonds' admission to trading on the First North.

The proceeds of the Offering under this Prospectus will be applied towards: (i) the construction and fit-out of the Project developed by the Issuer at Tyzenhauzų st. 17, Vilnius, the Republic of Lithuania (and for covering the financing costs related to this Project) and any other Project related costs if needed; and (ii) supporting the Issuer's working capital.

Provided that all the Bonds subject to the Offering under this Prospectus are subscribed for and issued by the Company, the expected amount of gross proceeds, calculated on the basis of the Nominal Value of the Bonds, would be up to EUR 13,200,000, less the amounts of costs and expenses incurred in connection with the Offering, as prescribed below.

The Company will bear approximately up to EUR 300,000 of fees and expenses in connection with the Offering (including the maximum amount of any discretionary commission, admission to trading on the First North related costs, legal costs, etc.) under the Issue. These costs of the Offering will be covered from proceeds of the Offering and/or from prepayments received in respect of the Project related sales.

No underwriting agreement has been signed for the purposes of the Offering. Also, to the best knowledge of the Issuer there are no conflicts of interest pertaining to the Offering and/or the admission to trading on the First North.
