MOBILE PATHWAYS

Actionable Immigration Data for Everyone

Our Vision

We envision a world where every immigrant has the trusted information and support to understand their options and exercise their rights.

MOBILE PATHWAYS

Our Impact

Since 2018, we have…

3.73M
Impacted Lives
Our partner network has directly served millions of people while keeping families together.

1.2B
Data Points Collected
Our AI analyzes 1.2 billion immigration data points so organizations can navigate cases with confidence.

140K
Users of Our Data
Nonprofits, agencies, and media rely on our public dashboards for transparency and accountability. †††

2.4×
Higher asylum grant rate
10.4% granted vs. 4.4% for all asylum cases †

+136%
Income increase
Household income after winning the right to remain and work

91%
User recommendation rate
In a 2026 survey, 91% of users said they would recommend Pathfinder.††

*† Pathfinder asylum grant and removal rates vs. all asylum cases; comparison run 09/17/2026. Methodology in the **2025 Annual Report, p. 7.***

*†† User survey conducted in conjunction with the Abdul Latif Jameel Poverty Action Lab (J-PAL); full findings in the **2025 Annual Report, p. 7.***

††† Roughly 140,000 unique people have used our public immigration court data dashboards, after excluding bot and spam traffic (Google Analytics, Sept 2024–Sept 2026).

The Problem

Immigration court is costly and complex. Most immigrants are unable to afford attorneys despite the significant impact on their chances of relief. **Our flawed immigration system denies millions fair access to justice and traps them in low-paying jobs.**

For every legal aid worker, there are 700 people in immigration court; even working nonstop, the nation's legal aid attorneys could never reach every immigrant in need of representation. As a result, **only 33% of immigrants with pending cases have legal representation. Without a lawyer, deportation is the norm;** 62% of unrepresented immigrants are ordered deported, more than double the 27% rate for those with legal counsel.

2. 62% vs. 27% deportation rates: American Immigration Council, Where Can You Win in Immigration Court? (Nov. 2025), FY 2019–2024 immigration court data.

Pathfinder Goes Viral

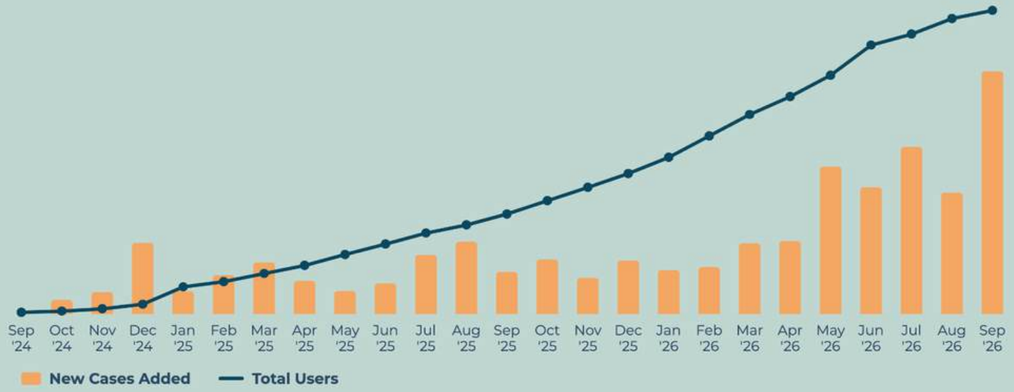

Pathfinder quintupled adoption in 2025–26, now used by 320+ legal aid organizations nationwide while our data reached millions via mass media.

A Closer Look

Pathfinder uses the government-issued ID number assigned to every immigrant to give hundreds of attorneys and nonprofits instant access to case histories and court alerts. Its evergreen public dashboards keep legal aid workers, advocacy groups, media, and immigrants informed on what's happening in immigration law.

Pathfinder Growth

Demand is surging, with new organizations signing up weekly; many new to the complexities of immigration law and all needing the instant information that is vital in a turbulent immigration climate. Instant alerts on volatile immigration courts, plus a 91% recommendation rate†, are driving a wave of new organizations demanding access.

† User survey conducted in conjunction with the Abdul Latif Jameel Poverty Action Lab (J-PAL); full findings in the 2025 Annual Report.

Meet Pathfinder AIDE

When 500+ Pathfinder users showed us where federal immigration data falls short, we built Pathfinder AIDE to leverage AI to uncover what the government cannot: actionable and instant immigration data for everyone.

Trusted by Experts

AIDE is trusted by 500+ immigration experts, so everyone can be one.

Made for Everyone

Immigration law in everyday language shown in charts, graphs, and tables.

Real-Time Data

We pull live policy changes and memos so you always have the latest information.

Secure for You

Purpose-built for immigration, where leaked details put lives at risk.

Pathfinder AIDE Goals & Outcomes

91%

User Recommendation Rate. Adoption is growing fast for a reason: in an April 2026 J-PAL survey, our 400+ most active users reported they overwhelmingly recommend Pathfinder to their peers. †

75%

Better Case Understanding. In the same survey, legal aid workers reported a stronger grasp of case status, deadlines, and risks thanks to Pathfinder's detailed information, insights, and real-time alerts.

25%

Lower In Absentia & Deportation Rates. Pathfinder keeps users informed and court-ready, targeting a 25% reduction in deportations as our AI scales to meet a growing enforcement climate.

2X

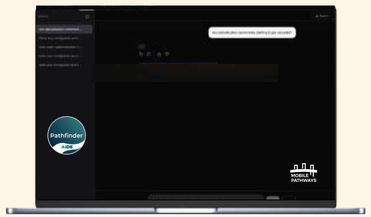

Higher Asylum Grant Rate. Our hypothesis: with real-time immigration data in hand, Pathfinder users will continue to win asylum at double the national average.††

† Our Theory of Change and KPIs are currently under review by Project Evident and we expect to publish a revised version in late 2026.

*†† Pathfinder asylum grant and removal rates vs. all asylum cases; comparison run 09/17/2026. Methodology in the **2025 Annual Report, p. 7.***

Meet Pathfinder AIDE

How Is Pathfinder Unique?

Vetted and curated, not crowd-sourced
General AI products like Claude learn from the open internet. AIDE is built on insights from 500+ immigration attorneys and nonprofit partners who use Pathfinder daily. Every response reflects how real practitioners actually navigate cases, not how the internet talks about immigration.

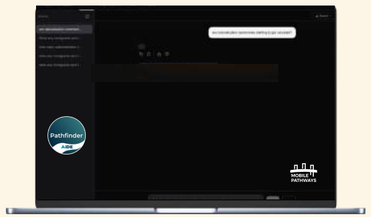

Real-time information, not a static snapshot
General AI products' knowledge has a cutoff. AIDE deploys agentic AI that pull live data — policy changes, executive orders, court schedule shifts, breaking news — so the intelligence is real-time. In immigration, yesterday's theory can be today's wrong answer.

Grounded in real immigration data, not general knowledge
General AI products can summarize immigration law. AIDE is connected to 1.2 billion actual data points from immigration court proceedings, judge patterns, hearing outcomes, and case histories. It doesn't guess what might happen. It shows you what's grounded in fact.

Secure by design
For sensitive cases, general AI tools have no guardrails for client confidentiality. AIDE is built for the sensitivity of immigration data, where a leaked detail can put someone at risk.

Meet Pathfinder AIDE

How Is Pathfinder Unique?

How do I get access to Pathfinder AIDE?
Pathfinder AIDE is currently in early access through the AIDE Founding Circle, our exclusive early adopter program for legal aid and immigration practitioners. Founding Circle participants get hands-on access, take part in virtual focus groups, and directly shape the tool before launch. Spots are extremely limited.

Who is using Pathfinder AIDE today?
Pathfinder AIDE is currently used by former immigration judges, attorneys, and immigration data experts who serve as expert content moderators, ensuring responses are accurate, current, and grounded in real practice.

When will Pathfinder AIDE launch publicly?
We are aiming for a public launch in late 2026, bringing the power of AI-driven legal insight to immigration practitioners across America.

How will AIDE be maintained in the long run?
Thanks to generous multi-year grants, our team will continue expanding the immigration data and information AIDE digests and analyzes. Our expert team and users will continually assess AIDE's responses so we can learn, iterate, and improve their usefulness and accuracy. Mobile Pathways also earns recurring revenue from private law firms that pay for access to Pathfinder, ensuring long-term sustainability.

MOBILE PATHWAYS

APPENDIX

Every data point, expert-vetted.

Our Theory of Change

Mobile Pathways harnesses data and AI to help immigrants navigate their legal proceedings. We empower legal aid workers with actionable data to reach more immigrants and deliver better outcomes. Faster, smarter, and trusted at scale.

IMPACT	 **Provide Actionable Immigration Data to Legal Aid Workers**	 **Enable Equitable Access to Information for Immigrants**	  **Advance Transparency and Accountability in the Immigration System**
OUTCOMES	Improve Capacity of Partners (lawyers and nonprofits) to serve more people Improve Understanding of Partners (lawyers and nonprofits) to understand immigration law.	Immigrants Can Better Navigate The U.S. Immigration System Reduction of In Absentia Rulings for Immigrants Reduction of In Deportation Orders for Immigrants	Immigration Networks are Data Empowered Stronger Relationships with Influencers Inside the Judicial System Greater Awareness of Inequities and Injustice for Immigrants Reforms Advanced through Legal or Legislative Efforts
SDGs	10 REDUCED INEQUALITIES	17 PARTNERSHIPS FOR THE GOALS	16 PEACE, JUSTICE AND STRONG INSTITUTIONS

† Our Theory of Change is currently under review by Project Evident and we expect to publish a revised version in late 2026.

Pathfinder AIDE Team

Jeffrey O’Brien, Esq.

Co-Founder | Executive Director

Jeffrey O'Brien is an immigration attorney with nearly two decades of practice and a national reputation in legal technology. He founded O'Brien Immigration in 2010, a multi-office Northern California firm defending asylum seekers and immigrants in court. At Mobile Pathways, which he co-founded in 2018, he built Pathfinder on 1.2 billion immigration data points, reaching 320+ partner organizations and 3.73 million immigrants, earning the InnovAction Award and a spot on Fast Company's 2026 Most Innovative Companies list. A two-time AILA President's Commendation recipient (2024, 2026), Jeff co-authored AILA's Futures Report and serves as frequent CLE faculty on AI in immigration practice.

Elizabeth Young

Senior Advisor | Former Immigration Judge

Elizabeth L. Young served for 12 years within the Executive Office for Immigration Review (EOIR), most recently as Regional Deputy Chief Immigration Judge — a Senior Executive Service position — where she oversaw court operations across the entire Western United States, developed nationwide policy initiatives, and directed training programs for both new and experienced Immigration Judges. Prior to that role, she served as an Assistant Chief Immigration Judge in San Francisco, where she managed over 100 court personnel and developed strategic plans for case management across regular and specialized dockets. As former judge who trained judges, Elizabeth is ideally situated to train the next generation of ehical AI.

Carman Nareau

Chief Technology Officer

Carman got into technology the long way. She started in the classroom — teaching in a school where many of her students were navigating life in a new country — then moved into immigration legal services, where she kept running into the same stubborn problem: the infrastructure didn't work. That sent her into tech. Since then she's built and shipped products across big tech, open-source organizations, nonprofits, and foundations — tackling everything from legal tech and policy data tools to AI products and open web standards. She believes technology can make lives easier and the world more livable, but only if the right people show up to build it that way. Today she runs Berrian Advisory, working as a strategist and fractional technology executive for mission-driven organizations with hard problems to solve. She joined Mobile Pathways because Pathfinder is the kind of tool she wished existed when she was sitting across from clients who needed answers fast.

Bartlomiej Skorupa

Co-Founder | Chief Operating Officer

Bartlomiej (Bart) Skorupa is an immigrant social entrepreneur, investor, and best-selling author dedicated to championing fair access to justice. With a passion for launching mission-driven organizations, Bart works at the intersection of technology, philanthropy, and artificial intelligence to create powerful opportunities for change. Bart's impactful work has been featured in prominent outlets such as NPR, Forbes, Men's Journal, The San Francisco Chronicle, Bravo Network, and Bloomberg Businessweek. Beyond his professional achievements, Bart finds inspiration in the joys of raising two disruptive daughters in a cabin in the woods.

Pathfinder AIDE Team

Camila Feltrin

Senior Research Analyst

Camila began her career in immigration policy as a legal professional, building experience across major immigration hubs including Miami, San Francisco, and New York. She later earned a master's degree in International Relations in Spain, where her research examined global migration crises through a policy and human rights lens. At Mobile Pathways, she analyzes public immigration data to produce research that illuminates systemic trends within the U.S. immigration system.

Andrew Boe

Full Stack Developer

Andrew Boe brings an unconventional path to engineering. A former pastry chef, he worked in the kitchen of one of New York's best restaurants, honing his ability to perform in high-pressure, high-performance environments. He moved into tech at 3Play Media, where over four years he rose from Technical Support Specialist to Solutions Engineer, sharpening his coding skills while solving complex technical problems for customers. At Mobile Pathways, he brings that same precision and composure to building the tools behind Pathfinder AIDE.

Justino Mora

Full Stack Developer

Justino Mora is a rare professional who combines deep AI and data engineering expertise with immigration law knowledge, philanthropic funding relationships, and lived immigrant experience as a DACA recipient. An experienced software engineer, he is noted for developing open-source and civic-tech tools for developers and non-developers alike, working with JavaScript, React, Node, and cloud-computing platforms such as AWS. Justino is also a prominent speaker and blogger on end-to-end encryption, privacy, and blockchain technologies.

Kiari Young-Collie

Pathfinder Operations

Kiari Young-Collie is early in her career with a strong passion for mission-driven work. Dedicated to making a meaningful impact, she appreciates opportunities where purpose and progress intersect, focusing on projects that drive positive change in communities and industries. With a commitment to growth and learning, Kiari is eager to contribute to organizations that align with values of social responsibility, sustainability, and innovation.
