

Putting on compression socks? You can do it yourself.

From the first of October, new clients will independently put on and take off compression socks.

We believe it's important you can continue to live independently in your own environment for as long as possible. That's why we are working with General Practitioners and community nursing organisations in Rotterdam, Capelle aan den IJssel, and Krimpen aan den IJssel on smart care solutions.

A great example is that you can now put on and take off your compression socks yourself with a clever tool. This will save time, effort, and will make you less dependent on others. Do you want to know if this is something you can use too? Ask your General Practitioner, Community Nurse, or Occupational Therapist.
