AI ACADEMY IN A BOX

Empower Your Workforce with AI: Build Capability from Within

AI is transforming the business landscape—driving innovation, enhancing productivity, and even unlocking new career paths. But this transformation depends on people. Employees must understand how to use AI effectively, and that's where many organizations are falling behind.

Despite AI's growing impact, 61% of business leaders say their organizations aren't providing adequate AI training, according to IBM's Global AI Adoption Index.

The need for AI fluency spans the entire enterprise. Yet too many companies are relying on a narrow solution: hiring experienced AI engineers. This approach is costly, highly competitive, and slow.
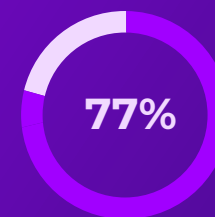

There's a better way.

Revature's AI Academy in a Box is a comprehensive upskilling solution that empowers the entire organization with tailormade learning offerings to maximize the potential of AI usage for different personas—including leadership, human resources, sales, technologists, operations, product managers, and more.
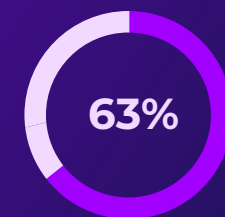

AI ACADEMY IN A BOX

Solution Includes:

- **Engaging Trainer-led and Hybrid Learning Experiences** – Gain hands-on expertise through interactive, instructor-guided sessions designed to maximize learning outcomes.

- **Immersive Self-paced Resources and Reinforcement Activities** – Strengthen your understanding with expertly designed reading materials and practical exercises that ensure long-term retention.

- **Strategic, Real-world AI Projects** – Apply AI seamlessly in your workflows with curated projects that build confidence and drive immediate impact.

- **Dedicated Expert-led Instruction and Personalized Support** – Benefit from live training sessions and office hours, ensuring direct access to AI guidance and deeper insights.

According to Revature's 2025 State of IT Skills Survey:

77%

of organizations report being impacted by the IT skills gap, with 56% noting upskilling and reskilling as the No. 1 strategy for closing this gap in 2025

63%

of decision-makers believe that GenAI will positively impact training, and 56% believe it will help with hiring and retention in 2025
