

- 90 countries are using the Integrated National Financing Frameworks (INFFs) approach to strengthen finance for development and climate action.
- 70+ countries are implementing reforms through their INFFs, and 31 national and subnational governments have operationalised a financing strategy.
- Countries are implementing 260+ reforms to mobilize and align public and private financing with all dimensions of sustainability, including gender equality, climate and social sector priorities.
- Country-led INFFs are recognized by UN Member States as the most frequently referenced initiative in the Sevilla Commitment.

INFF emerging impacts

Mongolia: \$3bn+
public expenditure aligned
to the SDGs annually

Nigeria: \$175m
investment pipeline for 25
women-and-youth-led impact
ventures

Zanzibar: \$5.5bn
private investment
attracted

Opportunities moving forward

- Deliver INFF financing strategies
- Implement key policy reforms for more sustainable, inclusive public and private finance
- Enhance public expenditure, increasing reach to vulnerable populations and addressing climate mitigation and adaptation
- Connect private investors with sustainable market opportunities and country platforms

What does the INFF Facility do?

The Facility responds to country demand – brokering technical assistance, facilitating knowledge exchange and providing access to technical guidance – helping realise the potential of INFFs to accelerate progress towards the SDGs.

INFF Facility Theory of Change

INFF Facility results to date

Partnerships

A wide range of partners are supporting countries to develop INFFs. The Facility is welcoming new partners to enhance coordination and collaboration in support of country-led INFFs.
