

## Job Offer – Senior Application Scientist

**Type of contract:** CDI

**Starting date:** October

**Experience:** Engineer or Ph.D. degree, 5-10 years of experience in the drug discovery field

**Location:** Oria Bioscience, 6 rue Jean Calvin, 75005, Paris

Join Oria Bioscience, a growing Tech-bio company based in Paris's 5th district

We specialize on a novel organelle bioproduction process to revolutionize therapeutic research. After a successful spin-off from ENS-PSL/CNRS, first contracts and seed funding, we're expanding our team.

We are looking for an Application Scientist to develop innovative applications for our organelle technologies and present them to customers and collaborators. As a key member of our science-driven team, you will play a central role in expanding our activities internationally.

### Your profile:

- You hold a PhD in biology or a Master's degree with strong expertise in membrane proteins such as ion channels, transporters and enzymes.
- You have excellent communication skills and technico-commercial experience.
- You enjoy traveling around the globe to meet collaborators and customers to present latest applications and onboard new users with novel organelle products on screening platforms. You enjoy building trust-based relationships with collaborators and customers.
- You have experience in assay development in the drug discovery field with automated patch clamp, solid supported membrane electrophysiology and high content imaging platforms.
- You are curious and eager to develop new applications and to troubleshoot assays.
- You are fluent in English.

### What you will do:

- Based on customers and collaborators feedback, you will optimize current routine applications on our first product LYSO-Preps on screening platforms such as automated patch clamp, solid supported membrane electrophysiology and high content imaging (30%).
- Develop applications for our future products on screening platforms (20%)
- Visit and support customers to demonstrate product, use and present new applications and provide technical support. (40%)
- Participate in scientific and commercial conferences to showcase our technologies and engage with the scientific community. (10%)

## Benefits of joining Oria Bioscience:

Under the excellent expertise and ambition of Oria Bioscience team, you have the unique opportunity to discover from the inside the growing activity of deeptech & biotech start-up dedicated to cutting-edge applications for organelles drug discovery purposes (neurodegenerative diseases, oncology, cardio-pathologies, etc ...). Your role will be important in supporting the growth and success of the company, specifically in our product application division.

- Environment: You will be part of a highly experimented biophysics team, working closely with our Lead Scientist in Paris and receiving strong support from our CEO as you engage with customers and collaborators internationally.
- Compensation: We offer a compensation package reflecting your experience, motivation, and ability to thrive in a technical environment. In the long-term, we offer the opportunity for you to evolve in the company to a more commercial role if successful integration.

If you are willing to contribute to new Drug Discovery, we encourage you to apply for this key position in Oria Bioscience.

## To apply:

Please send your resume (English) to our COO Marine MOUTIA ([mmoutia@oriabs.com](mailto:mmoutia@oriabs.com))
