

Job Offer – Biology Production Technician

Type of contract: CDI

Starting date: February

Experience: Technician diploma in biology (BTS, DUT, Licence Pro) 2-5 years of experience

Location : Paris Santé Cochin, 27, rue du Faubourg Saint-Jacques 75014 **Paris**

Join Oria Bioscience, an innovative start-up based in Paris's 14th district!

We specialize in organelle vesicles production to revolutionize therapeutic research. After a successful spin-off from ENS-PSL/CNRS, first contracts and seed funding, we're expanding our team.

We're hiring a Junior Biology Technician to support our production activities and contribute to the development of our proprietary organelle preparation workflows.

Your mission

- Perform cell culture of various cell lines (e.g. HEK, SH SY5Y, iPSCs, PBMCs, fibroblasts, and others) in a BSL-2 environment, with high reproducibility and quality.
- Execute ORGANELLE-Preps® production process based on Oria's core technologies (microfluidics, formulations, storage procedures), for client deliveries and internal R&D.
- Perform our quality control procedure with the highest standards, applying extreme rigor and strict requirements to always ensure top level reproducibility.
- Contribute to the drafting, optimization, and maintenance of SOPs and production documentation.
- Collaborate closely with the scientific and production teams to ensure smooth operations and continuous improvement.

Your profile:

- Technician-level diploma in biology (BTS, DUT, Licence Pro or equivalent).
- Several years of experience in a biology lab, ideally involving cell culture and complex biological processes including the use or knowledge in microfluidics
- Ability to follow complex procedures, strong attention to detail and day-to-day commitment to very high quality are highly important.
- Team spirit, resilience and ability to work in a collaborative, fast-paced environment.
- Autonomy, reliability, and willingness to learn and grow with the team.

Benefits of joining Oria Bioscience:

Under the expertise of Oria Bioscience team, you have the unique opportunity to discover a life science deeptech growing company dedicated to cutting-edge research on organelles drug discovery purposes (neuroscience, cardiopathology, etc...). Your role will be important in supporting the growth and success of the company, specifically in our biology division.

- Environment: You will be part of a highly experimented team, working closely with our Process Engineer and Head of Research and Product Development.
- Compensation: We offer a compensation package reflecting your experience, motivation, and ability to thrive in a technical environment. In the long term, we offer the opportunity for you to evolve in the company.

If you are passionate about biotechnologies and you are willing to work on an impactful project to accelerate Drug Discovery, we encourage you to apply for this exciting opportunity!
