

Job Description – Front-End Developer (React Native Mobile Apps)

Position: Front-End Developer (React Native)

Location: Remote

Employment Type: Full-time internship

About the Role:

We are looking for a passionate and skilled **Front-End Developer** to build intuitive and high-performance mobile applications using **React Native** for both Android and iOS platforms. You will work closely with product managers and backend engineers to create seamless user experiences — while leveraging **AI-powered development tools** for maximum efficiency.

Key Responsibilities:

- Develop, test, and maintain mobile applications using **React Native**.
- Write clean, modular, and scalable **JavaScript** code.
- Integrate with backend APIs and collaborate with backend developers for smooth data flow.
- Use **AI tools like Cursor, Claude, ChatGPT or Copilot** to speed up coding, debugging, and documentation.
- Ensure high performance and smooth user experience across Android and iOS devices.
- Collaborate with designers to convert Figma/UI mockups into working components.
- Participate in code reviews and adopt best practices for maintainability.

Required Skills & Qualifications:

- **1–3 years** of professional experience OR internships in **React Native development**.
- Strong understanding of **JavaScript (ES6+)**, React Native libraries, and state management tools (Redux, Context API).
- Prior exposure to **Android development** (native or hybrid apps) during job or internship.
- Familiarity with Git/GitHub, REST APIs, and JSON.
- Experience with **AI-powered developer tools** (Cursor, Claude, Copilot, etc.).
- Strong problem-solving mindset and ability to work in fast-paced environments.

Nice-to-Have:

- Knowledge of TypeScript, Firebase, and push notification services.
 - Experience working on **full-stack projects** (internship/freelance work counts).
 - Understanding of performance optimization and UI/UX best practices.
-
