

AI Agent Developer and Program Assistant (Intern / Part-Time)

Capabl is a fast-growing edtech startup helping professionals and organizations stay ahead by upskilling in AI and other future-focused domains.

About the Role

We are looking for a **smart, self-driven college student** with working knowledge of **AI Agent workflows** to assist in creating, testing, and documenting AI agent projects. You will support **Industry Experts** in delivering **real-world AI Agent training** for professionals.

AI Research & Content Creation intern

Responsibilities

- Develop, test, and deploy features or automation workflows as part of ongoing projects.
- Research emerging trends in AI, automation, and developer tools.
- Create engaging educational content such as blogs, short video explainers, or tutorials based on your findings.
- Collaborate with the core team on building AI-powered tools, integrations, and prototypes.

Required Skills

- Proficiency in **at least one programming language** (Java, Go, Python, or similar).
- Strong foundation in programming fundamentals and problem-solving.
- Demonstrable **projects** or portfolio showcasing your technical skills.
- Ability to **research** trending technologies and effectively create content (blogs, videos, posts, etc.) explaining them.
- Eagerness to learn and apply new technologies quickly.

Preferred Skills

- Familiarity with **n8n, LangChain, LlamaIndex**, or other AI workflow frameworks.
- Understanding of **LLM integrations, RAG systems, or API automation**.
- Basic experience with cloud platforms (GCP, AWS, Azure) or frontend/backend web development.
- Experience in **technical blogging, YouTube content**, or community contributions.
