

**Built in Africa, By Africans,
For Africa and the World**

Innovation.
Infrastructure. Impact.
The Future of E-Mobility
has started in Africa

spiro®

Africa's EV Movement is here

Spiro is the largest electric mobility company in Africa operating the largest AI-powered energy distribution platform in 8 countries in Africa. Spiro intends to transform the African economies through substitution of expensive imported fossil fuel-based transportation into affordable, and accessible electric mobility solutions locally made in Africa, by Africans, for Africa and the rest of the world.

At Spiro, we believe African mobility should be smart, sustainable, and built to navigate the toughest terrains of the African continent.

CO₂-Free Kilometers

Over **428 million**
CO₂-free kilometers

Batteries Sold

Over **60,000 batteries**
batteries sold

Bikes in Operation

Over **30,000 bikes**

Geographic Reach

- Operating across Kenya, Uganda, Rwanda, Nigeria, Togo, and Benin
- Expanding to new markets in Tanzania and Cameroon

Swap Stations

Over **600 swap stations**

Battery Swaps

Over **20 million** battery Swaps

We're not just offering clean rides. We're creating job opportunities, bringing green innovation, contributing to green climate policies, and empowering economies across our operating countries.

Impact & Innovation

Accelerating change across Africa

From Nairobi to Lagos, Kigali to Cotonou, Spiro is reshaping cities with clean energy transport. Our growing network of charging and battery-swap stations keeps riders going without delay. By working with governments, we're ensuring this change is scalable, sustainable, and inclusive.

Manufacturing

Our bikes are built locally with top quality materials and precise engineering designed to withstand Africa's toughest terrain. Every Spiro bike supports local jobs, manufacturing, and innovation. Vertically integrated with manufacturing operations in 4 countries. Over 60% are women in the manufacturing teams making world class electric motorbikes.

Smart AI manufacturing factory in Kenya with the capacity to produce 50,000 bikes annually, powered by industrial IoT 5.0 through strategic partnerships with VOTOL and SRE POWER.

**These bikes aren't
just Electric, they're
built to last.**

SMARTER. SAFER. STRONGER.

This isn't just a ride. It's an evolution.
Each Spiro bike is a precision-engineered machine, powered by Athena AI our proprietary intelligence system that adapts to you. With real-time performance analytics, IoT-enabled tracking, diagnostic foresight, geofencing security, and AI that learns your riding behavior Spiro isn't just smart, it's self-aware. Ride the future. Own the edge.

The Spiro Lineup

From cutting-edge commuters to collector-grade machines there's a Spiro built to match your ambition.

Ekon 450 Series

More miles. More muscle.

A seamless fusion of power and range built to go farther, faster, smarter.

Alpha Davido Edition

Lead the pack. Leave a legacy.

Unapologetically bold. Iconic design meets high-performance engineering. Machine that turns every ride into a statement. Built to dominate.

Davido Collectible

Not made. Handpicked.

Crafted for the few who demand rarity, precision, and presence. Engineered for those who collect not just bikes, but legacies.

Our Energy Network

Welcome to Africa's largest and fastest-growing electric mobility ecosystem, led by purpose, powered by people.

Spiro has the largest battery swapping infrastructure with an aim to deploy 1 GW of energy through its battery swapping network in 2025.

Our automated stations offer a quick, seamless experience, allowing you to exchange your battery in seconds, while our manned stations provide personal assistance and support when you need it.

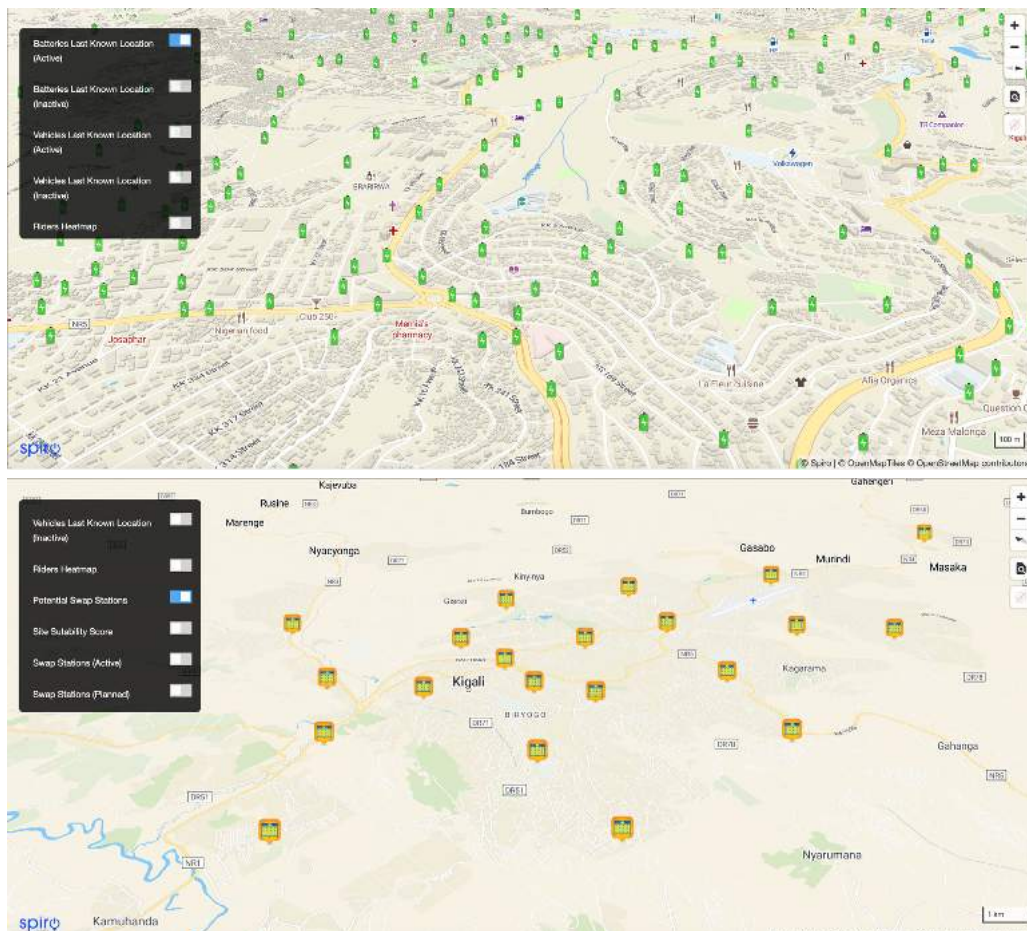

Tech & Innovation

Spiro has a very strong technology platform, with in-house technology teams in Kenya, Nigeria, and India developing IoT, Spiro Maps and CredTrack.

Spiro IoT Hub is a full-stack solution for tracking everything, from chargers to vehicles, controls, and reports.

Spiro Maps is providing unparalleled and seamless battery-swapping facilities, revolutionizing vehicle connectivity through the power of IoT facilitates daily ingestion of telematics data, improving navigation

CredTrack platform has simplified asset management that allows you to easily track, locate, and immobilize assets and provides detailed insights into the driving behavior, repayment capability, and helps you determine usage-based fair value.

Transforming Lives through Upskilling

The Spiro Academy

Spiro Academy is not just a training institution, it's a transformative platform shaping Africa's future in electric mobility, economic empowerment, and sustainable development. By equipping mechanics, engineers, and entrepreneurs with cutting-edge skills, especially focusing on women and youth, Spiro Academy is driving Africa's transition to a cleaner, more inclusive EV industry.

Join us in shaping the future of sustainable transportation in Africa where innovation meets inclusion, and opportunity drives change. Together, we can empower a generation and accelerate Africa's journey toward a greener tomorrow.

Pictures of Trainees

**Let's shape the future
of mobility together.**

**The future is electric, and
the future is African.**

**Join the ride,
Invest with us.
Partner with us.
Drive with us.**
