

About Unframe – Boilerplate

Headline/tagline	The Managed AI Transformation Platform
1-sentence < 200 characters	Unframe is the Managed AI Transformation Platform that delivers tailored AI solutions for your most critical operations in days and grows with you to a full AI program.
~ 50 words	Unframe is the Managed AI Transformation Platform that turns enterprise needs into tailored, production-ready AI solutions in days. Powered by its open platform, Unframe solutions integrate with each customer's existing AI program and core systems, run in any environment, and work with any modern LLM to help enterprises unlock measurable business value.
Full Boilerplate	Unframe is the Managed AI Transformation Platform that turns enterprise needs and use cases into fully tailored, production-ready AI solutions in days. Powered by Unframe's deep technical building blocks and its open platform, every solution integrates seamlessly with each customer's existing AI program and core systems – scoping, designing, and delivering against the company's data, workflows, and governance frameworks. Solutions run in the customer's cloud, on-premises, or as fully managed SaaS, with no dependency on a specific LLM. Unframe helps enterprises eliminate operational bottlenecks and capture the business value of AI, from targeted use cases to complete AI transformation. Co-founded in 2024 by Shay Levi, Larissa Schneider, and Adi Azarya, Unframe is headquartered in Cupertino, California, with offices in Tel Aviv and Berlin. Visit unframe.ai.
