A place where ideas
grow wings,
and learners grow
into **leaders.**

Our Vision

Every child carries the spark of leadership within. As Makers of Leaders, our vision is to nurture that spark and inspire every young learner to think independently, act responsibly, and contribute meaningfully to society.

Curiosity, in action.
Ideas that make a difference.
Guidance that **grows confidence.**
A campus that teaches.
READY FOR TOMORROW.

Our Mission

Our mission is to create a dynamic learning environment where leadership, innovation, autonomy, multiculturalism and the pursuit of knowledge converge.

We empower every learner to take ownership of their journey through experiential and tech-enabled learning. Rooted in global perspectives and guided by purpose, we inspire lifelong learners to lead with integrity and make a positive impact on the world.

Our Five Pillars of Leadership

At **Chaman Bhartiya School**, learning goes beyond textbooks. Our unique curriculum offers a leadership-driven framework built on five pillars of leadership that ensure that every lesson, project, and conversation helps your child grow not just in knowledge, but in confidence, empathy, and purpose.

1 Learn to Live

At Chaman Bhartiya School, learning goes beyond textbooks. Our unique curriculum offers a leadership-driven framework built on five pillars of leadership that ensure that every lesson, project, and conversation helps your child grow not just in knowledge, but in confidence, empathy, and purpose.

2 Learn to Live Together

Empathy, teamwork, and respect for diversity form the foundation of our classrooms. Because when we grow together, we grow stronger.

3 Learn to Learn

Curiosity fuels progress. Through exploration and inquiry, learners develop a mindset of questioning, experimenting, and continuing to evolve.

4 Learn to Act

We encourage learners to take initiative, solve real-world problems, and turn ideas into meaningful action.

5 Learn to Lead

Leadership begins with self-awareness and purpose. We empower our learners to lead with confidence, compassion, and vision.

Every day at CBS, these pillars come alive through projects, mentorship, open learning spaces, technology-enabled exploration, and real-world problem-solving that make leadership a lived experience, not a lesson.

Letter from The Founder

“Brilliant.”

That’s how the world often describes Indian students. From the most prestigious universities to the most innovative companies, our young minds have always stood out for their academic excellence.

But as the world changes faster than ever, brilliance alone is no longer enough. The challenges of tomorrow will demand something deeper—empathy, creativity, courage, and the ability to lead with both heart and intellect.

At Chaman Bhartiya School, our purpose is to nurture those very qualities. Every child carries the spark of leadership within, and our responsibility, as educators and parents, is to create the right environment for that spark to grow. Leadership cannot be taught from textbooks; it must be experienced, encouraged, and lived every day.

That’s why our curriculum integrates innovation and leadership into every aspect of learning, from open classrooms and hands-on projects to collaboration, design thinking, and technology-enabled exploration. At CBS, children learn to think independently, act responsibly, and embrace diversity with compassion and confidence.

Education, at its core, must prepare children not just for exams, but for life itself. The future of the world will be shaped by how we nurture the leaders of today, those who can imagine possibilities, take initiative, and build a better tomorrow for everyone.

Join us on this journey. Together, let’s uncover the leadership potential in every child and empower them to change the world one idea, one act of courage, one moment of kindness at a time.

“The future of the world will be shaped by how we nurture the leaders of today.”

Snehdeep Aggarwal

Founder – Chaman Bhartiya School

“When creativity meets purpose, it transforms lives.”

Parushni Aggarwal Gupta
Vice Chair, Bhartiya Education

For Parushni Aggarwal Gupta, design has always gone beyond the idea of four walls, furniture, or colour palettes. It has always been about people, and how spaces can shape the way they live, feel, and grow.

Beginning her academic journey with an undergraduate degree in Economics, she later pursued her true passion for design at the prestigious Parsons School of Design. Since then, she has carried this belief through every chapter of her journey. As the Founder & Creative Director of Studio CREO, she has introduced India to some of the world's most iconic design brands, building not just studios, but experiences that empower, inspire and make people feel at home.

For Parushni, this school is more than a place of learning. It is a legacy named after her grandfather, a continuation of values passed down through generations.

Nestled within Bhartiya City, the school is a living ecosystem where children are nurtured not just as students, but as future leaders. It is here that she draws on her perspective as both a designer and a mother of two, deeply understanding that true education means building curiosity, empathy, resilience, and the courage to dream audaciously. She often shares stories of her interactions with the students, moments that reflect their confidence, and sense of self-belief. It is this spark of leadership and courage that truly represents the ethos of the school.

At the heart of her journey lies a simple belief that learning never ends. She remains open to new perspectives every day, often drawing lessons from her own children. For her, to stop learning is to stop evolving. Her influence extends far beyond classrooms and design studios. As part of the leadership behind Bhartiya City, one of Bengaluru's most ambitious integrated townships, Parushni has played a vital role in weaving sustainability, design thinking, and culture into the very fabric of community life.

Through every role she plays, designer, leader, entrepreneur, and custodian of a family legacy, Parushni stands as proof that when creativity meets purpose, it doesn't just transform spaces, it transforms lives.

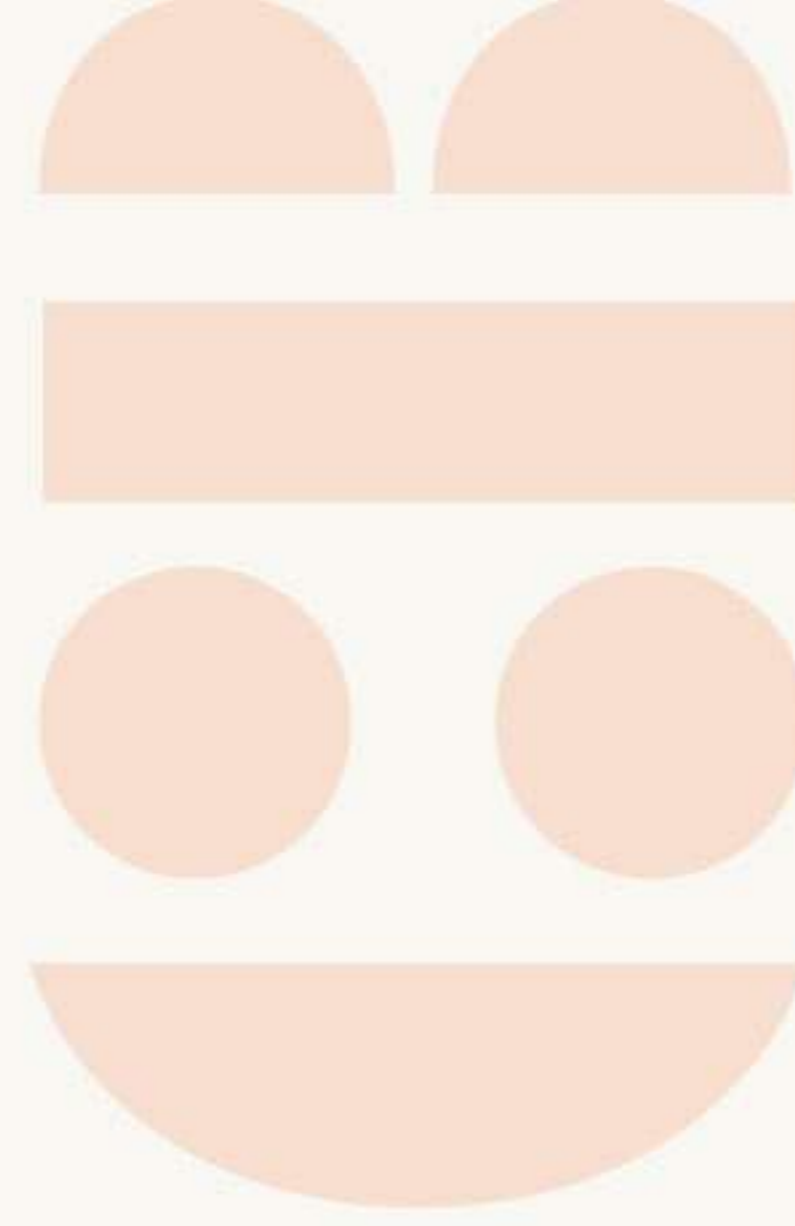

**Great leaders
build great futures**

Their guidance helps every learner discover
confidence, curiosity, and purpose

Our Leadership

The team behind our vision

Allan Andersen
Director

“What’s important is for the teacher to talk less and let students work more.”

Originally from Denmark, Allan Andersen has over four decades of experience in education and leadership. A pioneer in open and technology-driven learning, he founded Oerestad High School in Copenhagen, the world’s first fully digital school.

At CBS, he helped shape our unique curriculum, integrating leadership into every stage of learning. His philosophy is simple: schools must prepare students not just to pass exams, but to find purpose and thrive in an ever-changing world.

Inspired by educators like Gandhi, Tagore, and Vivekananda, he aims to shape students who can thrive in a rapidly changing, uncertain world. He combines India’s strong tradition of academic excellence with Scandinavian approaches to holistic development, emphasizing curiosity, creativity, and practical learning.

Geeta Jayanth
Head of School

“To teach is to touch lives forever.”

At CBS, Geeta Jayanth’s leadership is shaped by a clear vision of education that prepares learners not just for examinations, but for life. Drawing from over 25 years of experience across international and national curricula — including IB, Cambridge, A Levels, and ICSE — she brings a global outlook rooted in strong educational practice.

Her work is shaped by extensive international exposure and her roles on the Advisory Boards of the University of St Andrews, Scotland, and IE Business School, Spain, experiences that have strengthened her belief in education that is both rigorous and deeply human-centred. Further reinforcing this global perspective, she is an authorized IBEN Evaluation Leader, leading evaluations for IB schools across the world.

She strongly believes that leadership in education is about creating environments where learners feel safe to explore, question, and grow. For her, meaningful education shapes character, nurtures responsibility, and helps young people find purpose in an ever-evolving world.

The Heart of CBS

Our Community

Nestled in the heart of Bengaluru's visionary smart city, Bhartiya City, CBS offers a campus experience unlike any other. Here, learning unfolds amidst landscaped greens, modern residences, retail boulevards, and cutting-edge urban infrastructure.

Surrounded by green open spaces, residential quarters, retail hubs and tech-driven infrastructure, our learners enjoy the calm of a modern campus while staying connected to the vibrancy of the city. Every pathway, park, and plaza surrounding CBS encourages exploration and engagement, making our location not just a backdrop but an active part of every learner's journey.

Communication that builds trust

We see parents as partners in growth. Through regular conversations, feedback sessions, and collaborative projects, we work together to understand every learner's journey, their challenges, passions, and potential.

Learning is a shared journey here

From school events and student showcases to community initiatives, parents are an active part of the CBS experience. These shared moments create a sense of belonging that extends beyond the classroom.

Nurturing 21st Century capabilities

We nurture trust, empathy, and open communication between families, facilitators, and learners. When a child feels supported at every step, they grow with confidence and courage.

"At CBS, my child is not just taught; she's understood. Teachers know her by name, by personality, and by potential. It feels like being part of one big family."

Parent of a Grade 6 learner

A world inside every CBS classroom

At CBS, children grow up with a global mindset, learning side by side with peers from around the world, discovering that difference connects more than it divides.

We see the Bigger Picture

At CBS, global exposure begins early. Whether it's through international collaborations, cultural exchanges, or shared classroom projects, our learners learn to see the world through many lenses.

Empathy in Every Interaction

Our classrooms bring together learners and educators from over 16 nationalities, each contributing their own culture, language, and perspective.

Inclusion is the Default

Diversity is our way of being. We value differences, celebrate identities, and make sure every child feels safe, seen, and valued.

Your child's roadmap to success

Each stage of learning at CBS helps learners grow from curious explorers to confident, capable leaders. From foundational years to future-ready programmes, our curriculum evolves with each learner's pace, passion, and potential.

Early Years (Playgroup to EY3) The Foundation

An integrated curriculum designed to deliver an IB-inspired, inquiry-based approach. Learning happens through play, projects, and hands-on exploration. Focus is on nurturing curiosity, creativity, and confidence from the start.

Primary Years (Grades 1–5) Pathways for Growth

An integrated curriculum with national and international programmes. Learners develop reading, numeracy, inquiry skills, and collaboration through projects that make learning meaningful.

Middle Years (Grades 6–10) A New Direction

Students dive deeper into subject understanding, engage with global themes, and build critical thinking, reflection, research, and leadership skills. This is achieved through two distinct curricula:

- IB Middle Years Programme (MYP)
- ICSE Middle Years

Secondary Years (Grades 11–12) Becoming a Leader

Two pathways that develop academic rigour, independence, and a global outlook, preparing your child for universities in India and around the world. Learners can choose between:

- IB Diploma Programme (IBDP)
- Cambridge International AS & A Levels

Recognised by the ICSE Board, the International Baccalaureate (IB) and Cambridge A levels for academic excellence and innovation.

Inside the CBS learning experience

Learning at CBS is never confined to a classroom or a textbook. Every project, conversation, and collaboration is designed to spark curiosity and build real-world understanding. Our approach focuses on developing these **four essential 21st-century skills**:

Critical Thinking

When our Grade 5 learners studied water scarcity, they didn't just read about it; they built working models of water filtration systems, testing, tweaking, and learning through experimentation.

Collaboration

Our open learning spaces invite dialogue. Learners brainstorm, debate, and co-create, learning as much from one another as from their facilitators.

Communication

Learners present their projects to real audiences—parents, peers, even local experts—learning to express ideas with confidence, clarity, and empathy.

Creativity

Learners explore hands-on design, coding, and prototyping in our Innovation Lab, building robots, designing community gardens, and creating solutions that merge imagination with purpose.

“Travel is the best kind of education. It teaches you to see the world, and yourself, differently.”

A.P.J. Abdul Kalam

Beyond Books & Classrooms

School sports fests that build teamwork, resilience and sportsmanship

A Stage for Self-Expression

Where imagination meets expression. Our student podcast gives young minds the space to speak, reflect and connect, transforming their ideas into meaningful dialogue. A true stage for creativity, confidence and authentic self-expression.

Indo - Russian Technology Exchange Educational Trip

We know technology builds curiosity, collaboration, and global thinking. At the Indo-Russian Technology Exchange, our learners explored innovation, shared ideas across cultures, and experienced the power of learning beyond borders.

Acts of Kindness

Leadership grows stronger through service. Learners take part in sustainability and social impact initiatives, leading with empathy through projects such as developing assistive Smart Blind Sticks for the visually impaired, as pictured here.

More than just Teachers

Our facilitators are mentors, guides, and champions. They recognise every learner's unique strengths and help them grow into confident, compassionate individuals ready to take on the world.

Global Initiatives for Global Citizenship

Through a global exchange programme, CBS enables meaningful cross-cultural learning and international academic exchange for our learners, marked by the signing of an MoC with University Lyceum, Russia.

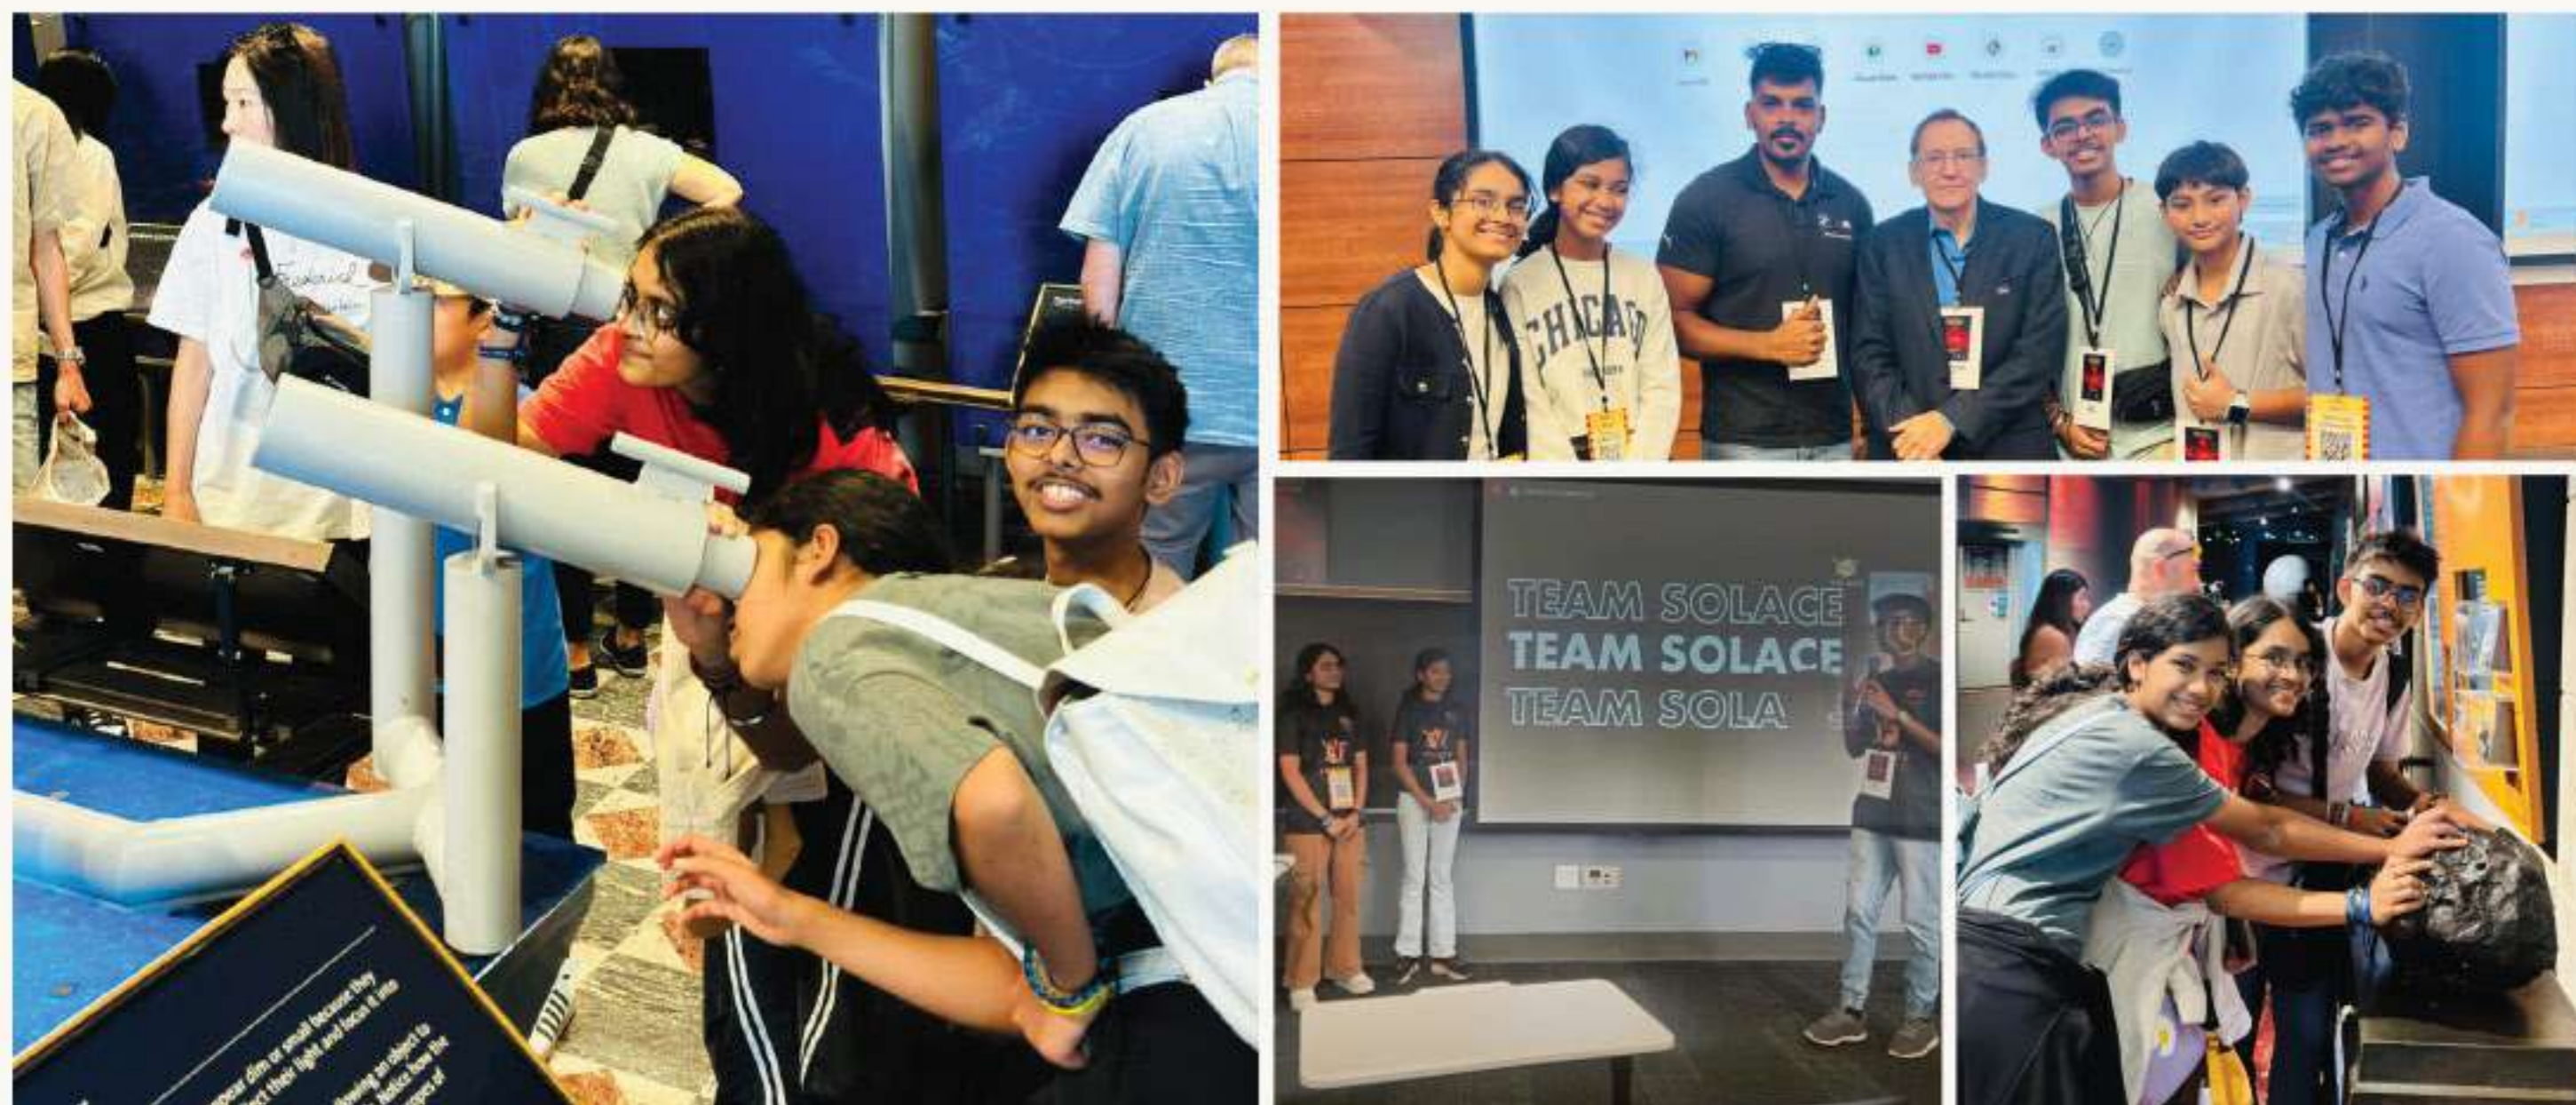

Our Partners in Progress

With partners like LEGO® Education, learning becomes hands-on and joyful. Complex concepts turn into creative experiments that make learning truly meaningful.

Exploring the Future Through Innovation and Imagination

At Chaman Bhartiya School, students are encouraged to move beyond traditional learning through future-focused initiatives. From projects like the Jal Chakran model and NASA-inspired workshops to presenting a research paper on the sustainability of life on Mars at the University of Southern California, learners engage in real-world problem solving, creativity, and design thinking, preparing them to shape an evolving world.

Inspiring Young Leaders Through Global Perspectives

President of Chile interacting with our learners

President of Chile exploring the innovation lab.

Visit by Mr. Ryan Donaghy, the esteemed Deputy Minister of Education- Canada

Visit by Elaine Marcos, Broadway artist

Our campus welcomed the **President of Chile**, offering students a rare opportunity to engage with an international leader whose words brought fresh insight and inspiration. Interactions like these broaden young minds, helping them understand leadership, resilience, and global citizenship. The campus also welcomed Elaine Marcos for a student-led podcast with one of our learner, and hosted Mr. Ryan Donaghy, the esteemed Deputy Minister of Education, Canada. Such experiences guide students toward purpose and confidence as they grow into the thoughtful and informed leaders of tomorrow.

The Ecosystem for Growth

Facilities at the CBS campus

Architecture that inspires

Our cafeteria is designed for openness and connection; it allows children to share meals, build friendships, and recharge in a space that feels warm and welcoming. Every corner encourages community, from bright tables for lively conversations to calm nooks for quiet moments between classes.

A playground of possibilities

Physical learning is as vital as academic learning. Our pools become spaces where confidence, coordination and resilience take shape. Here, learners dive into new skills, build strength, and discover the joy of movement and sportsmanship.

Open-air classrooms & more

Learning spills into open courtyards, gardens, and community zones. These shared spaces bring learners, parents, and facilitators together, fostering dialogue, collaboration, and belonging.

A space to read & reflect

More than shelves of books, our library is a space of discovery. Learners read, research, and create, guided by curiosity. It's where stories spark imagination, and information turns into insight.

Empowering our facilitators

Our facilitators are lifelong learners. Through ongoing professional training and collaboration, they stay at the forefront of global teaching practices, ensuring that every child learns from someone who leads by example.

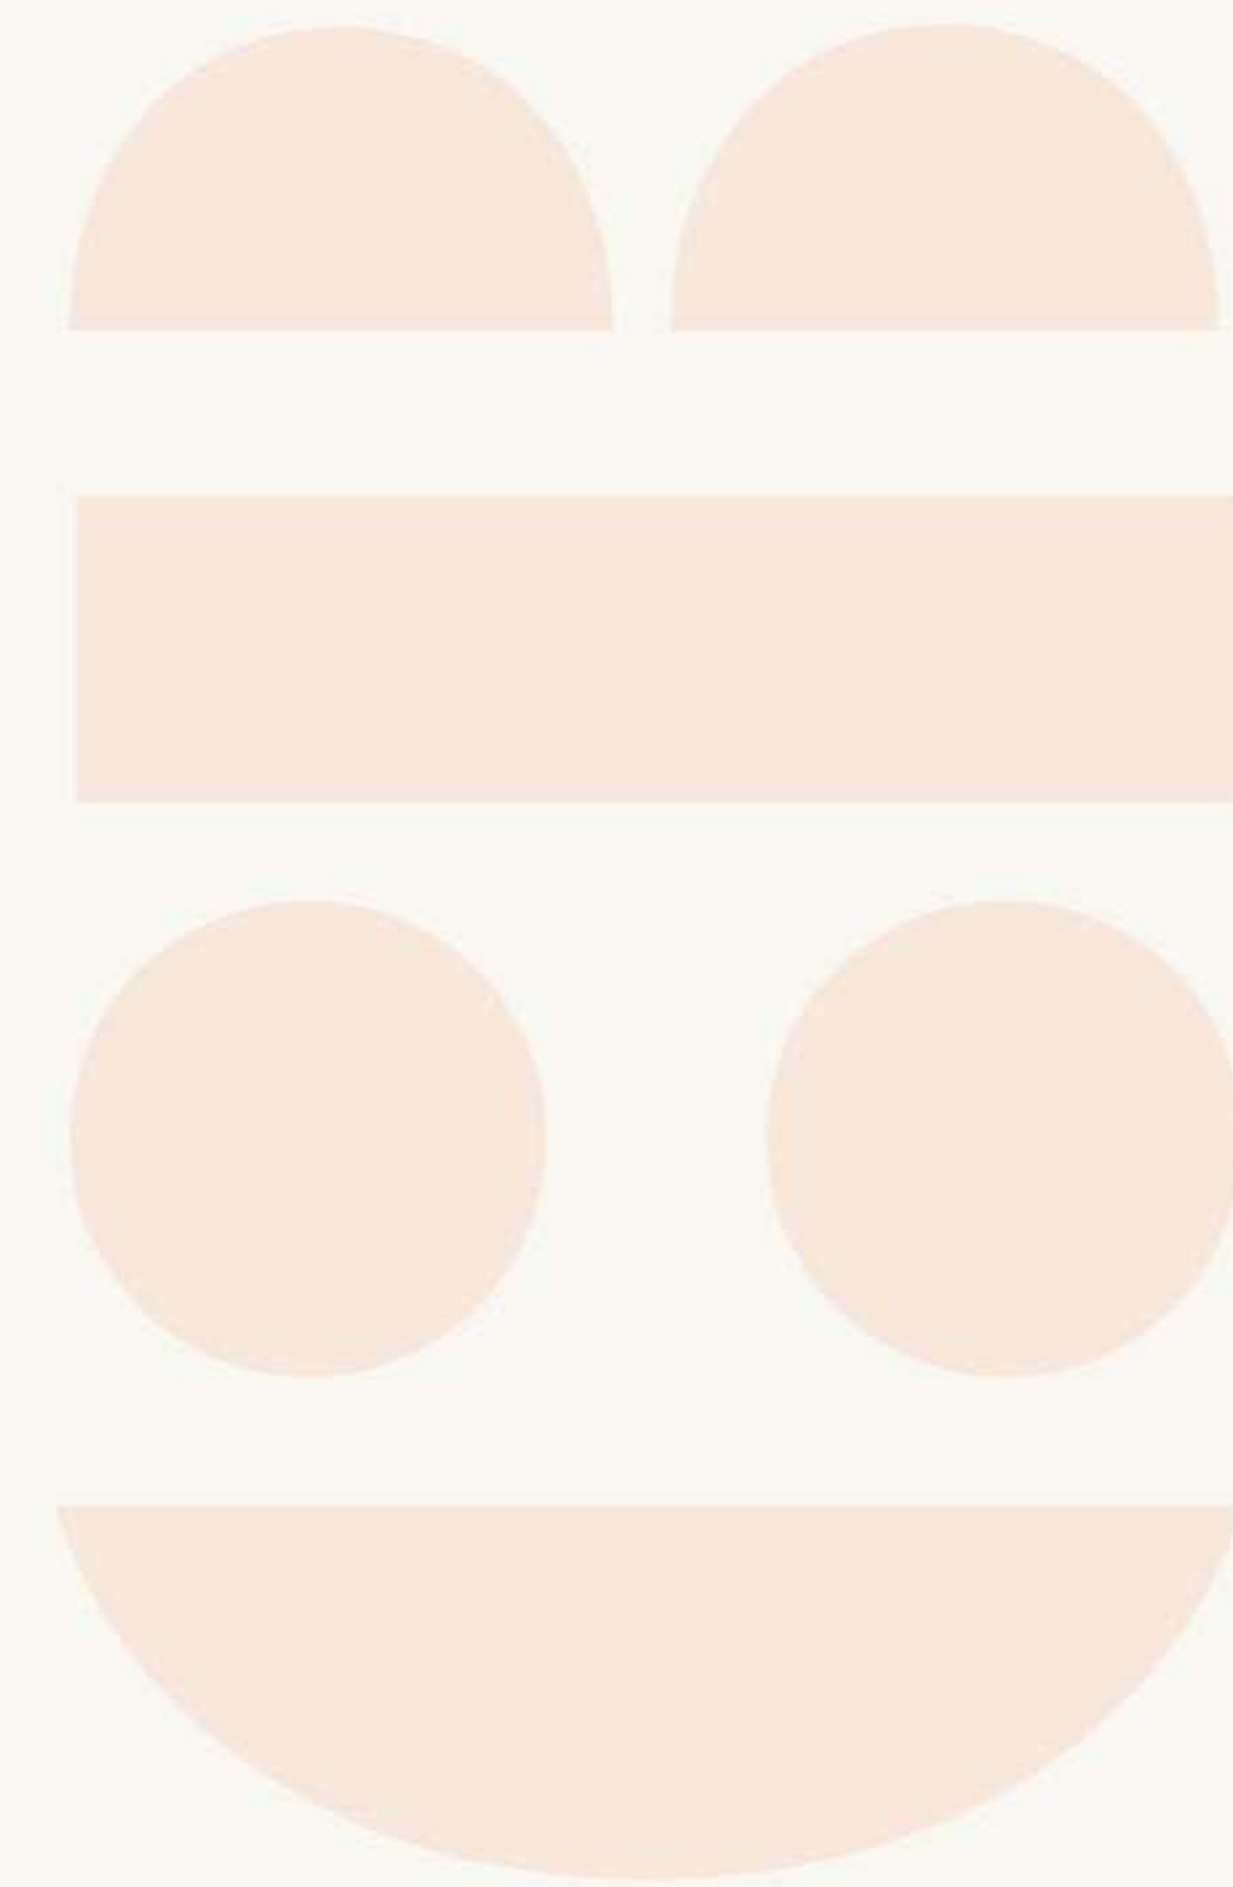

Safety is our top priority

Safety and well-being are built into every corner of CBS. From full-time medical staff and bus tracking systems, to meals rooted in sustainability and fresh produce, our environment nurtures both mind and body.

Where the City Becomes the Classroom

CBS is more than a campus it is a city for learning. Located inside **Bhartiya City**, an integrated township developed by the Bhartiya Group.

The school expands far beyond traditional classrooms and transforms the mini city into an active, experiential learning environment. Parks, boulevards, public art installations, retail avenues, and community spaces evolve into case studies, collaboration hubs, and living discovery labs giving learners the unique advantage of observing and engaging with a real, dynamic ecosystem shaped by design, culture, and sustainability.

With Bhartiya City woven into its academic fabric, CBS presents a first of its kind integrated learning model where lessons flow into the city, ideas are tested in open public environments, and learning grows through movement, interaction, and real world context. It is a campus that teaches and a community that elevates shaping confident thinkers, responsible creators, and future changemakers ready to step into what comes next.

The Innovation Lab

Where Ideas Take Shape & Learners Become Makers.

At Chaman Bhartiya School, learning doesn't stop at imagination; it moves, lights up and sometimes even takes flight.

Our **Innovation Lab** is the beating heart of this movement, a space where curiosity meets creation and every learner becomes a designer, coder, builder and problem-solver.

Built by Our Young Innovators

Satellite

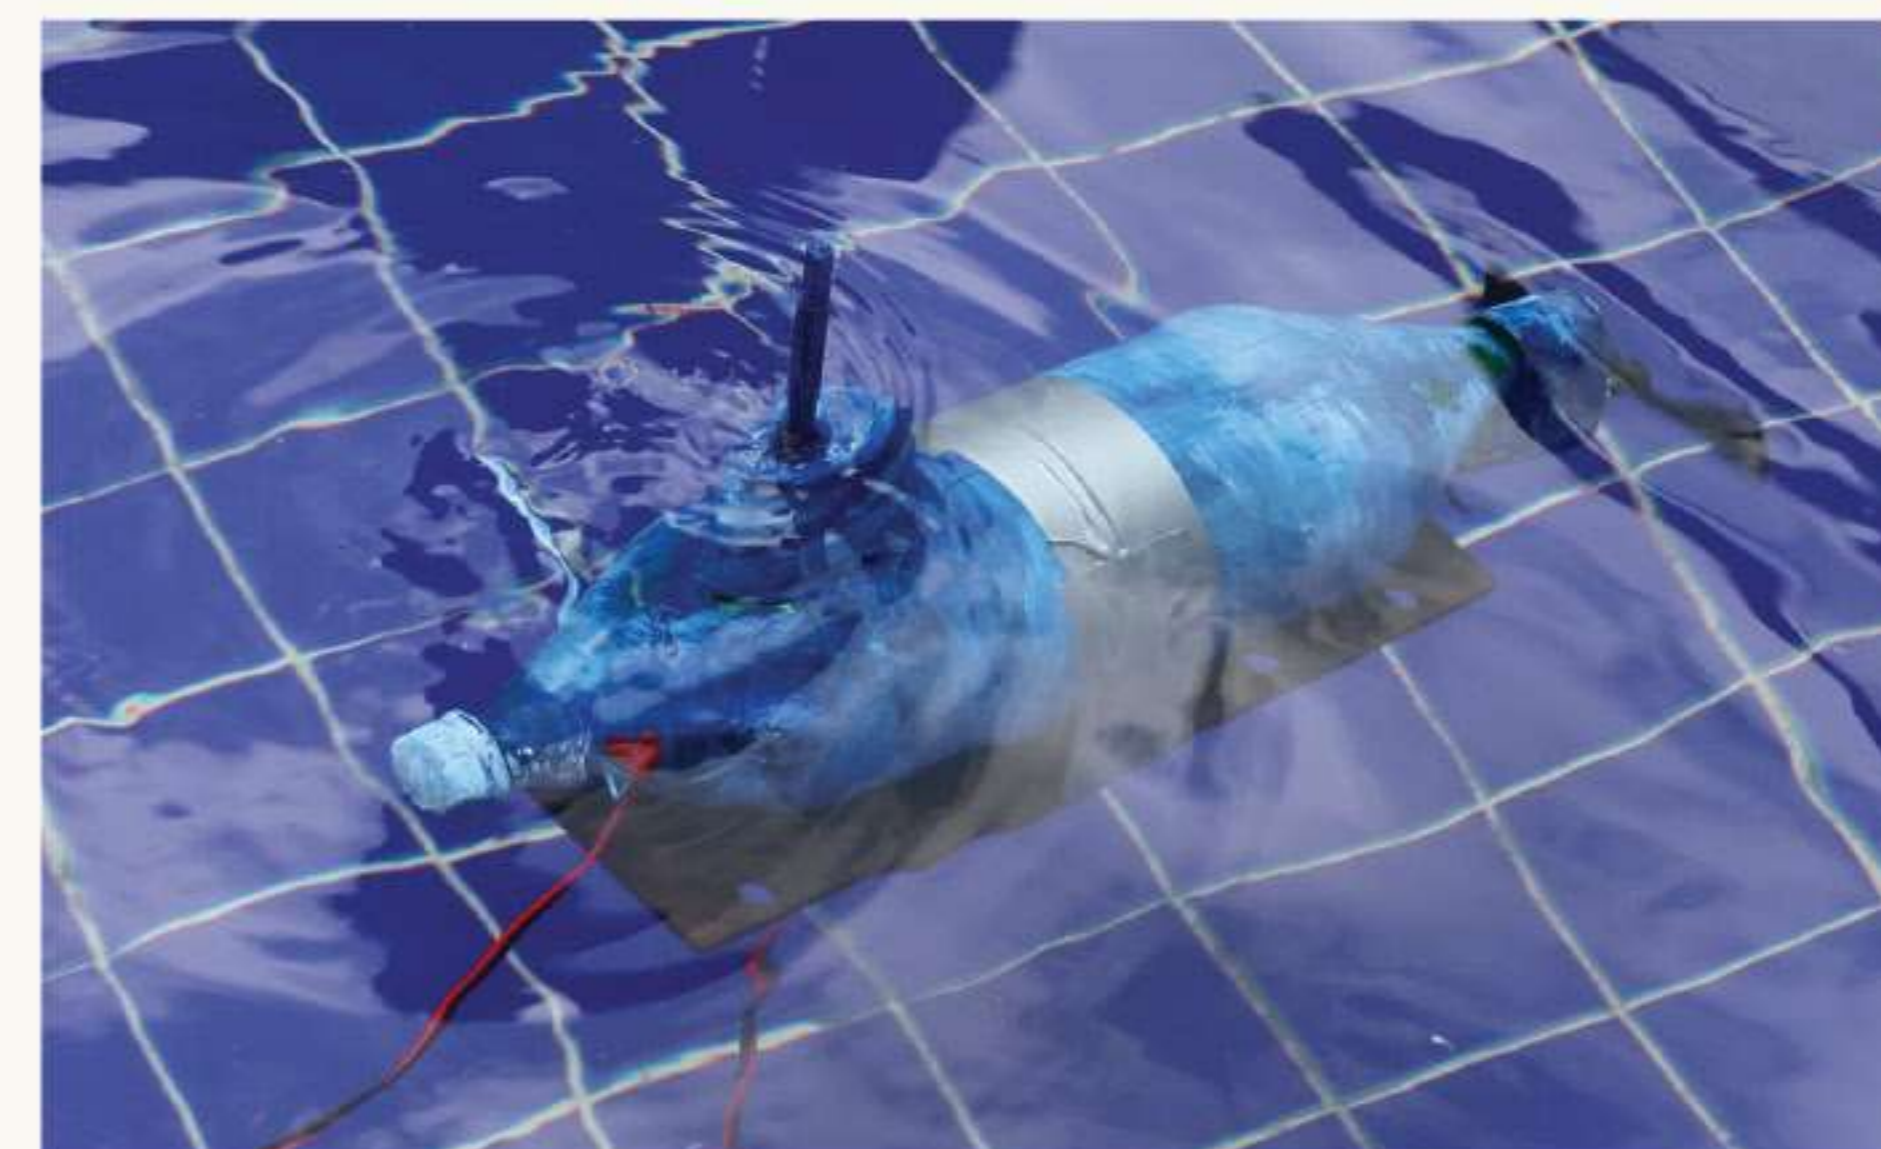

"We built a satellite and launched it in the atmosphere, an experience which gave us exposure to how weather conditions affect space systems"

Rahul, Grade 6

Engineering Imagination

"We created a 3D-printed prosthetic arm for our science fair, focusing on empathy and inclusivity in design."

Risha, Grade 8

Mini Submarine

"We built a mini submarine using recycled materials such as plastic bottles, along with small DC motors and propellers, and used waterproof sealing to protect the electronics underwater."

Pranathi Reddy (Grade 7)
Evan Mathew (Grade 7)
Laksh (Grade 9)

Agri Drone

"We worked on an Agri Drone project that uses a rotating mechanism to lift water, fill small containers, and channel it into a jerrycan as it turns, which helped us understand irrigation and water movement concepts."

Keerthana, Dhaarmik, Pragyan,
Pearl, Aaron, Aarav from Grade 9

Sustainability in Action

"We created a honey-harvesting container that uses centrifugal force to extract honey, without hurting bees or its comb."

Praneel Patel, Yuvan Khanna from
Grade 8 & Shaunak from Grade 10

Here, learning is hands-on, collaborative and delightfully messy, because discovery is meant to be lived, not memorized.

Tools of Tomorrow, in Their Hands Today

Our learners explore:

Collaborative Technology

Using smart devices to research, create, and solve problems together — building teamwork, curiosity, and digital confidence for the future.

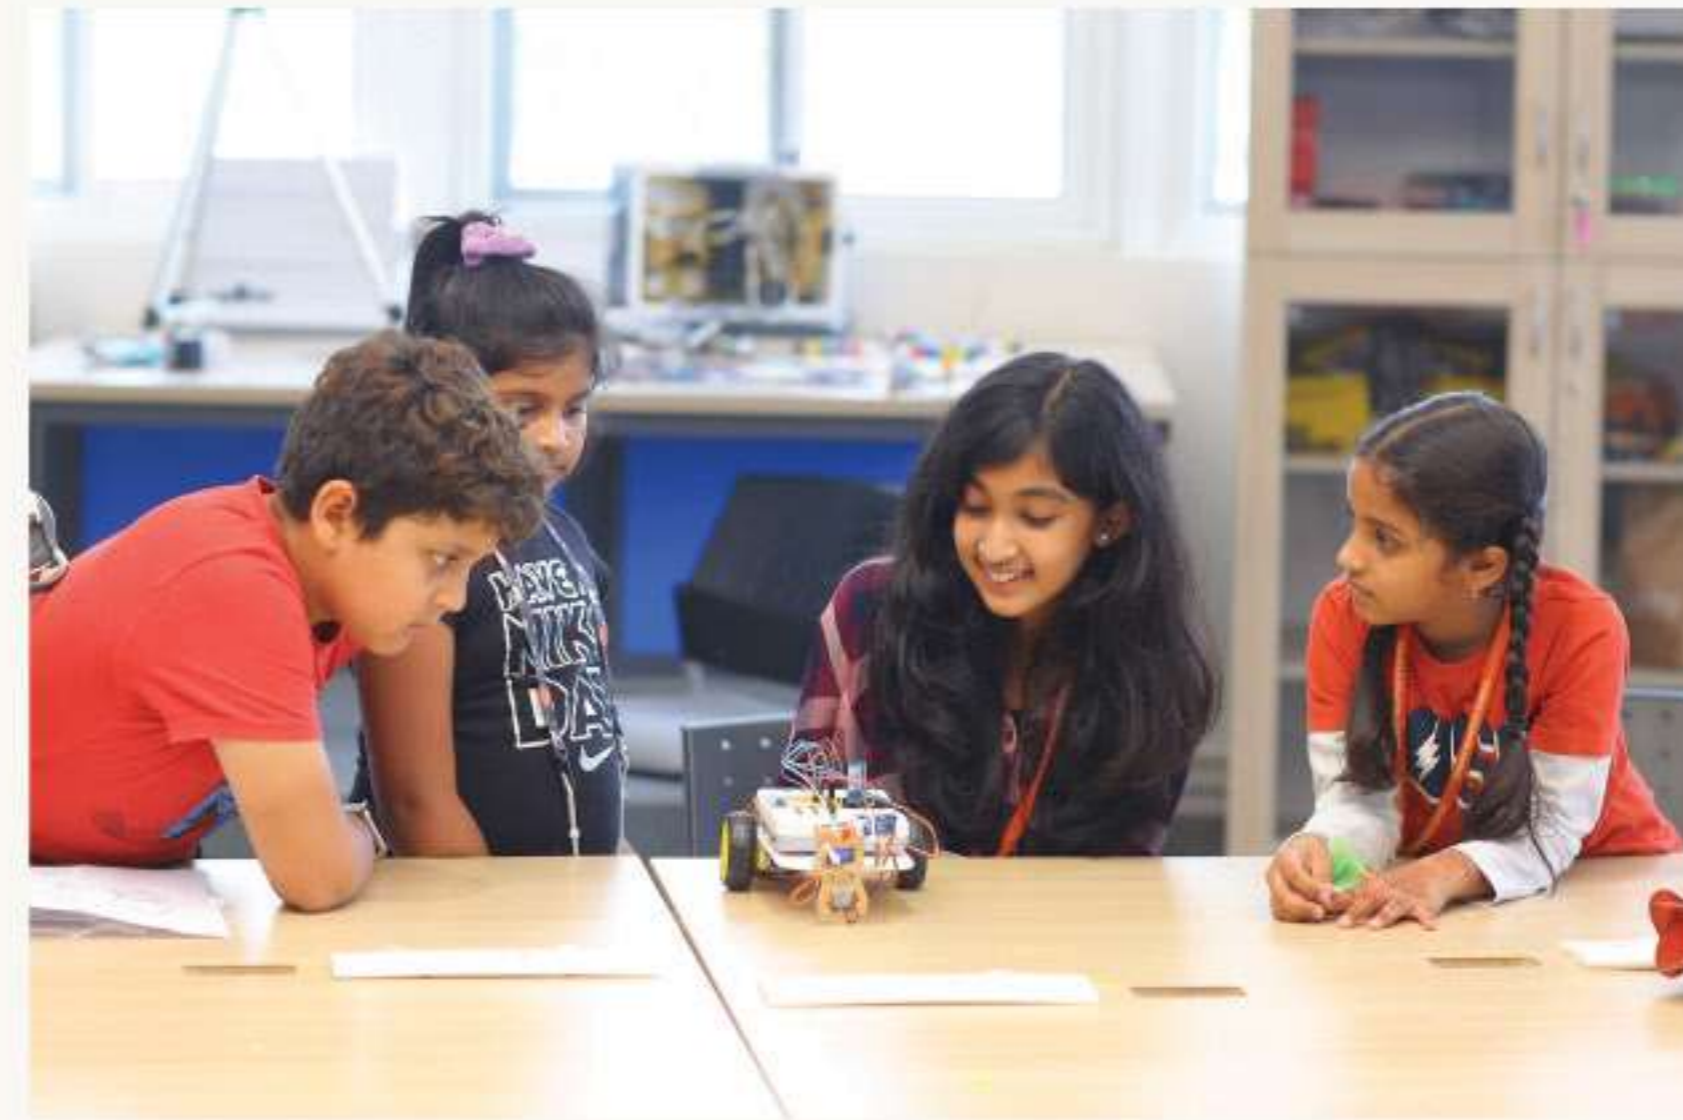

Artificial Intelligence

Learning how technology can think, adapt and assist.

Robotics & Automation

Creating future-forward robots that transform how the world moves.

Sustainability Projects

Using innovation to reduce waste, reuse materials and create greener solutions.

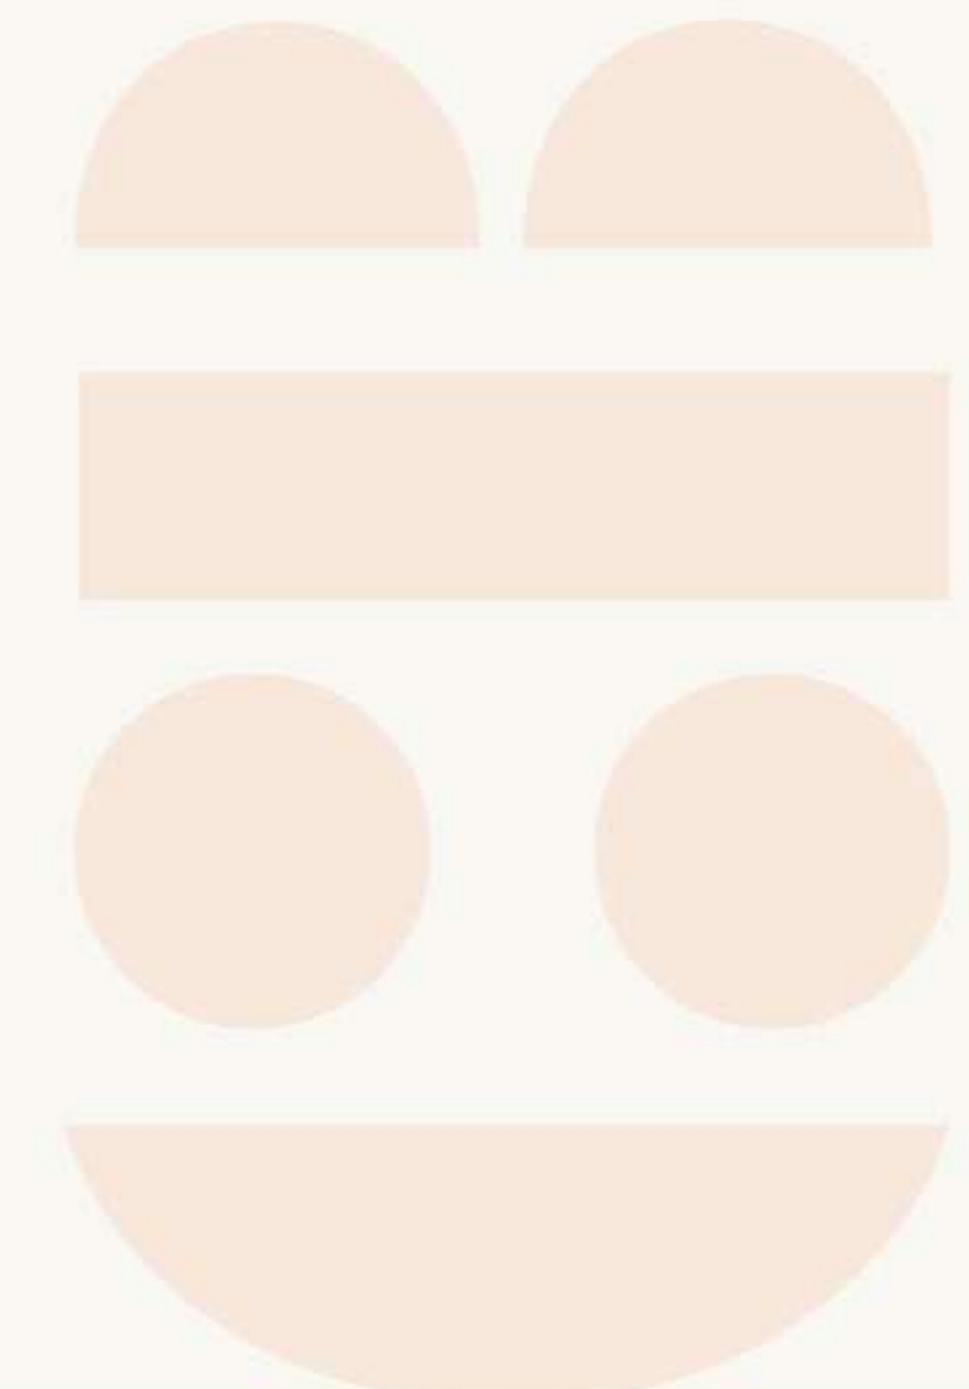

3D Printing & Design Thinking

Turning imagination into tangible prototypes.

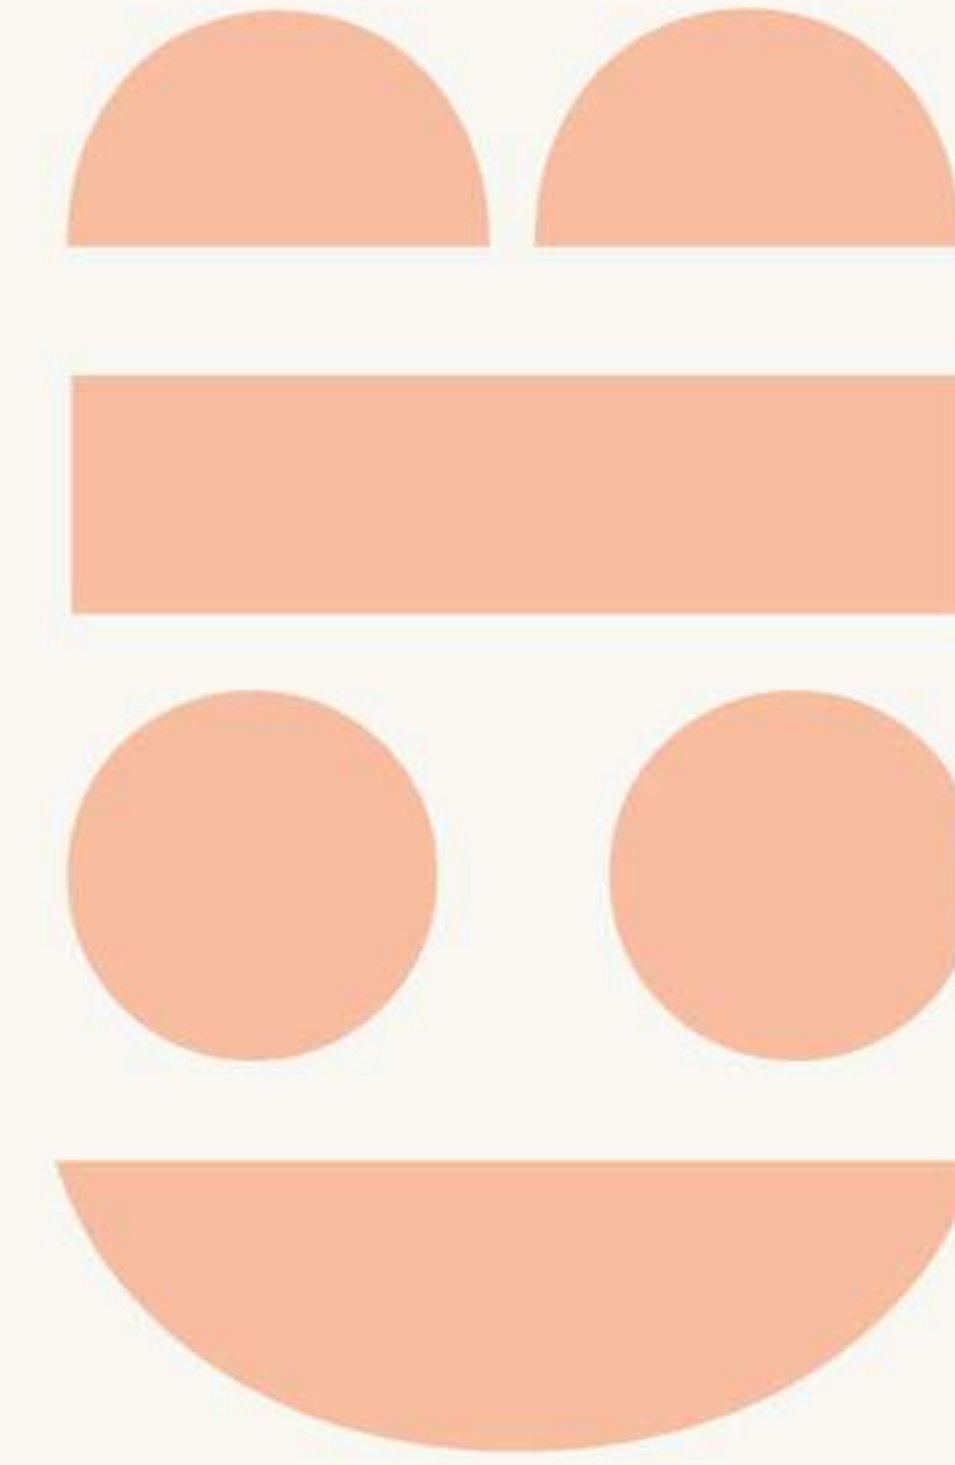

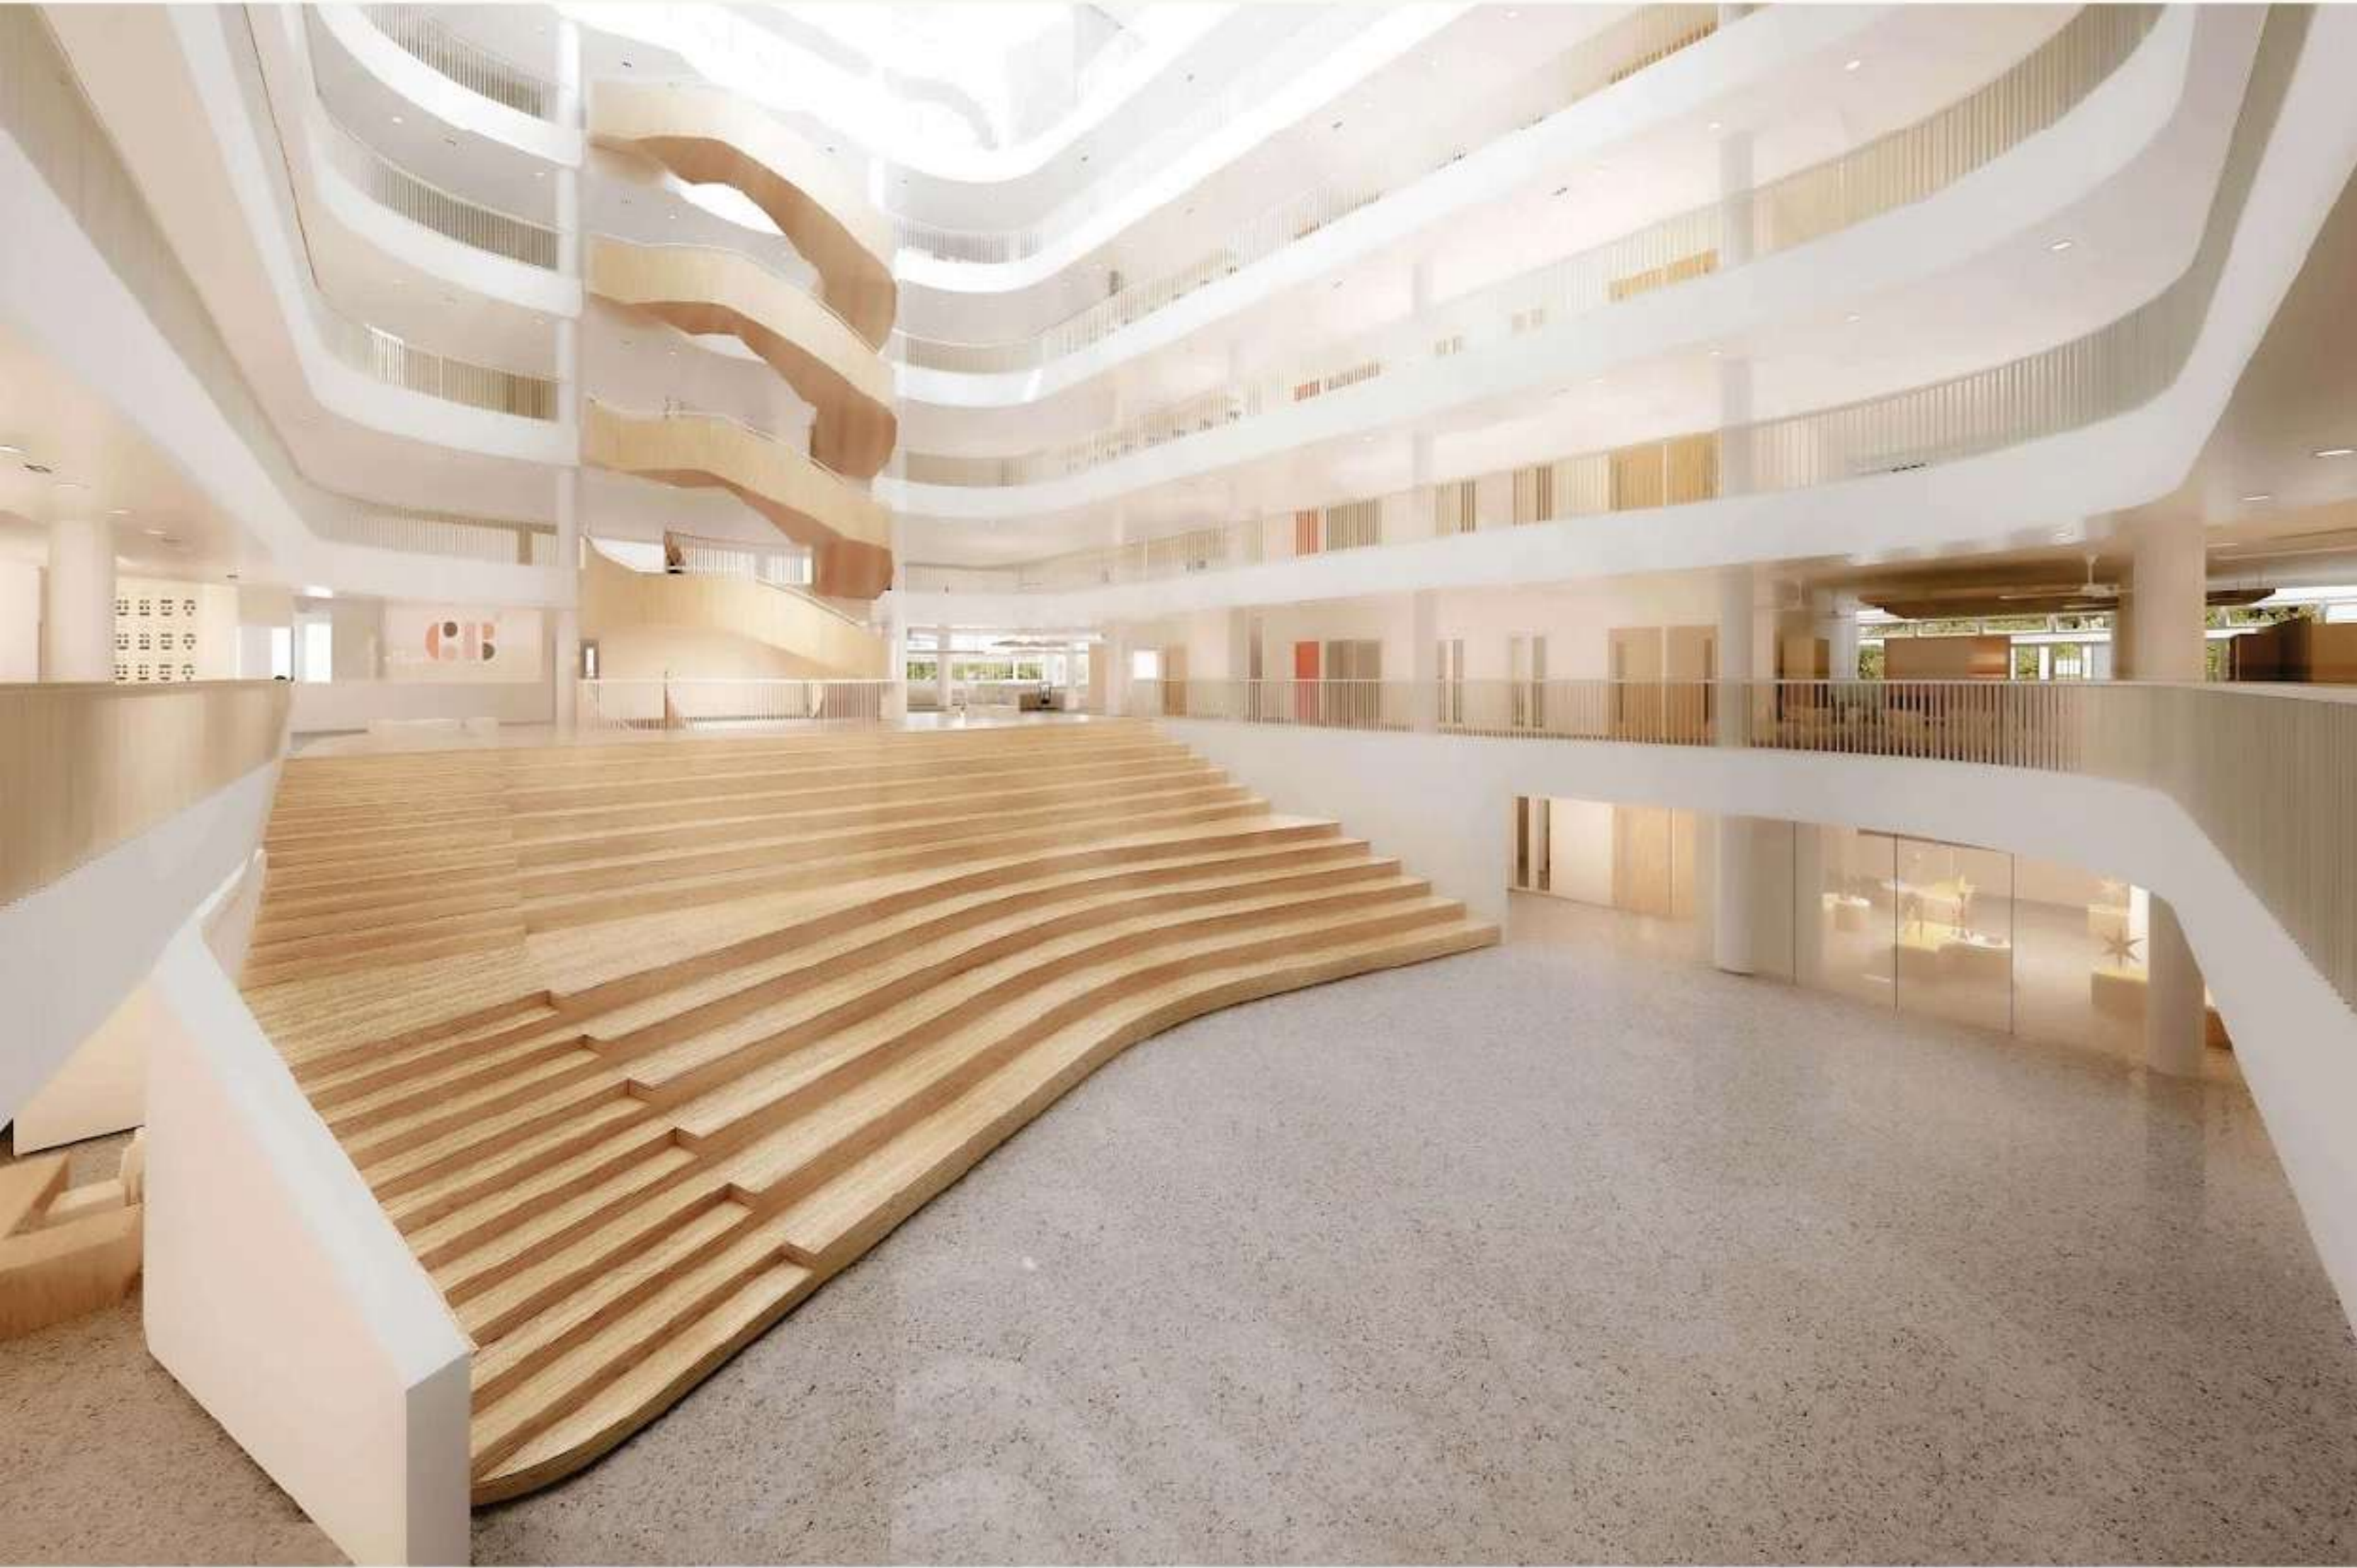

LEGO® Education Kits

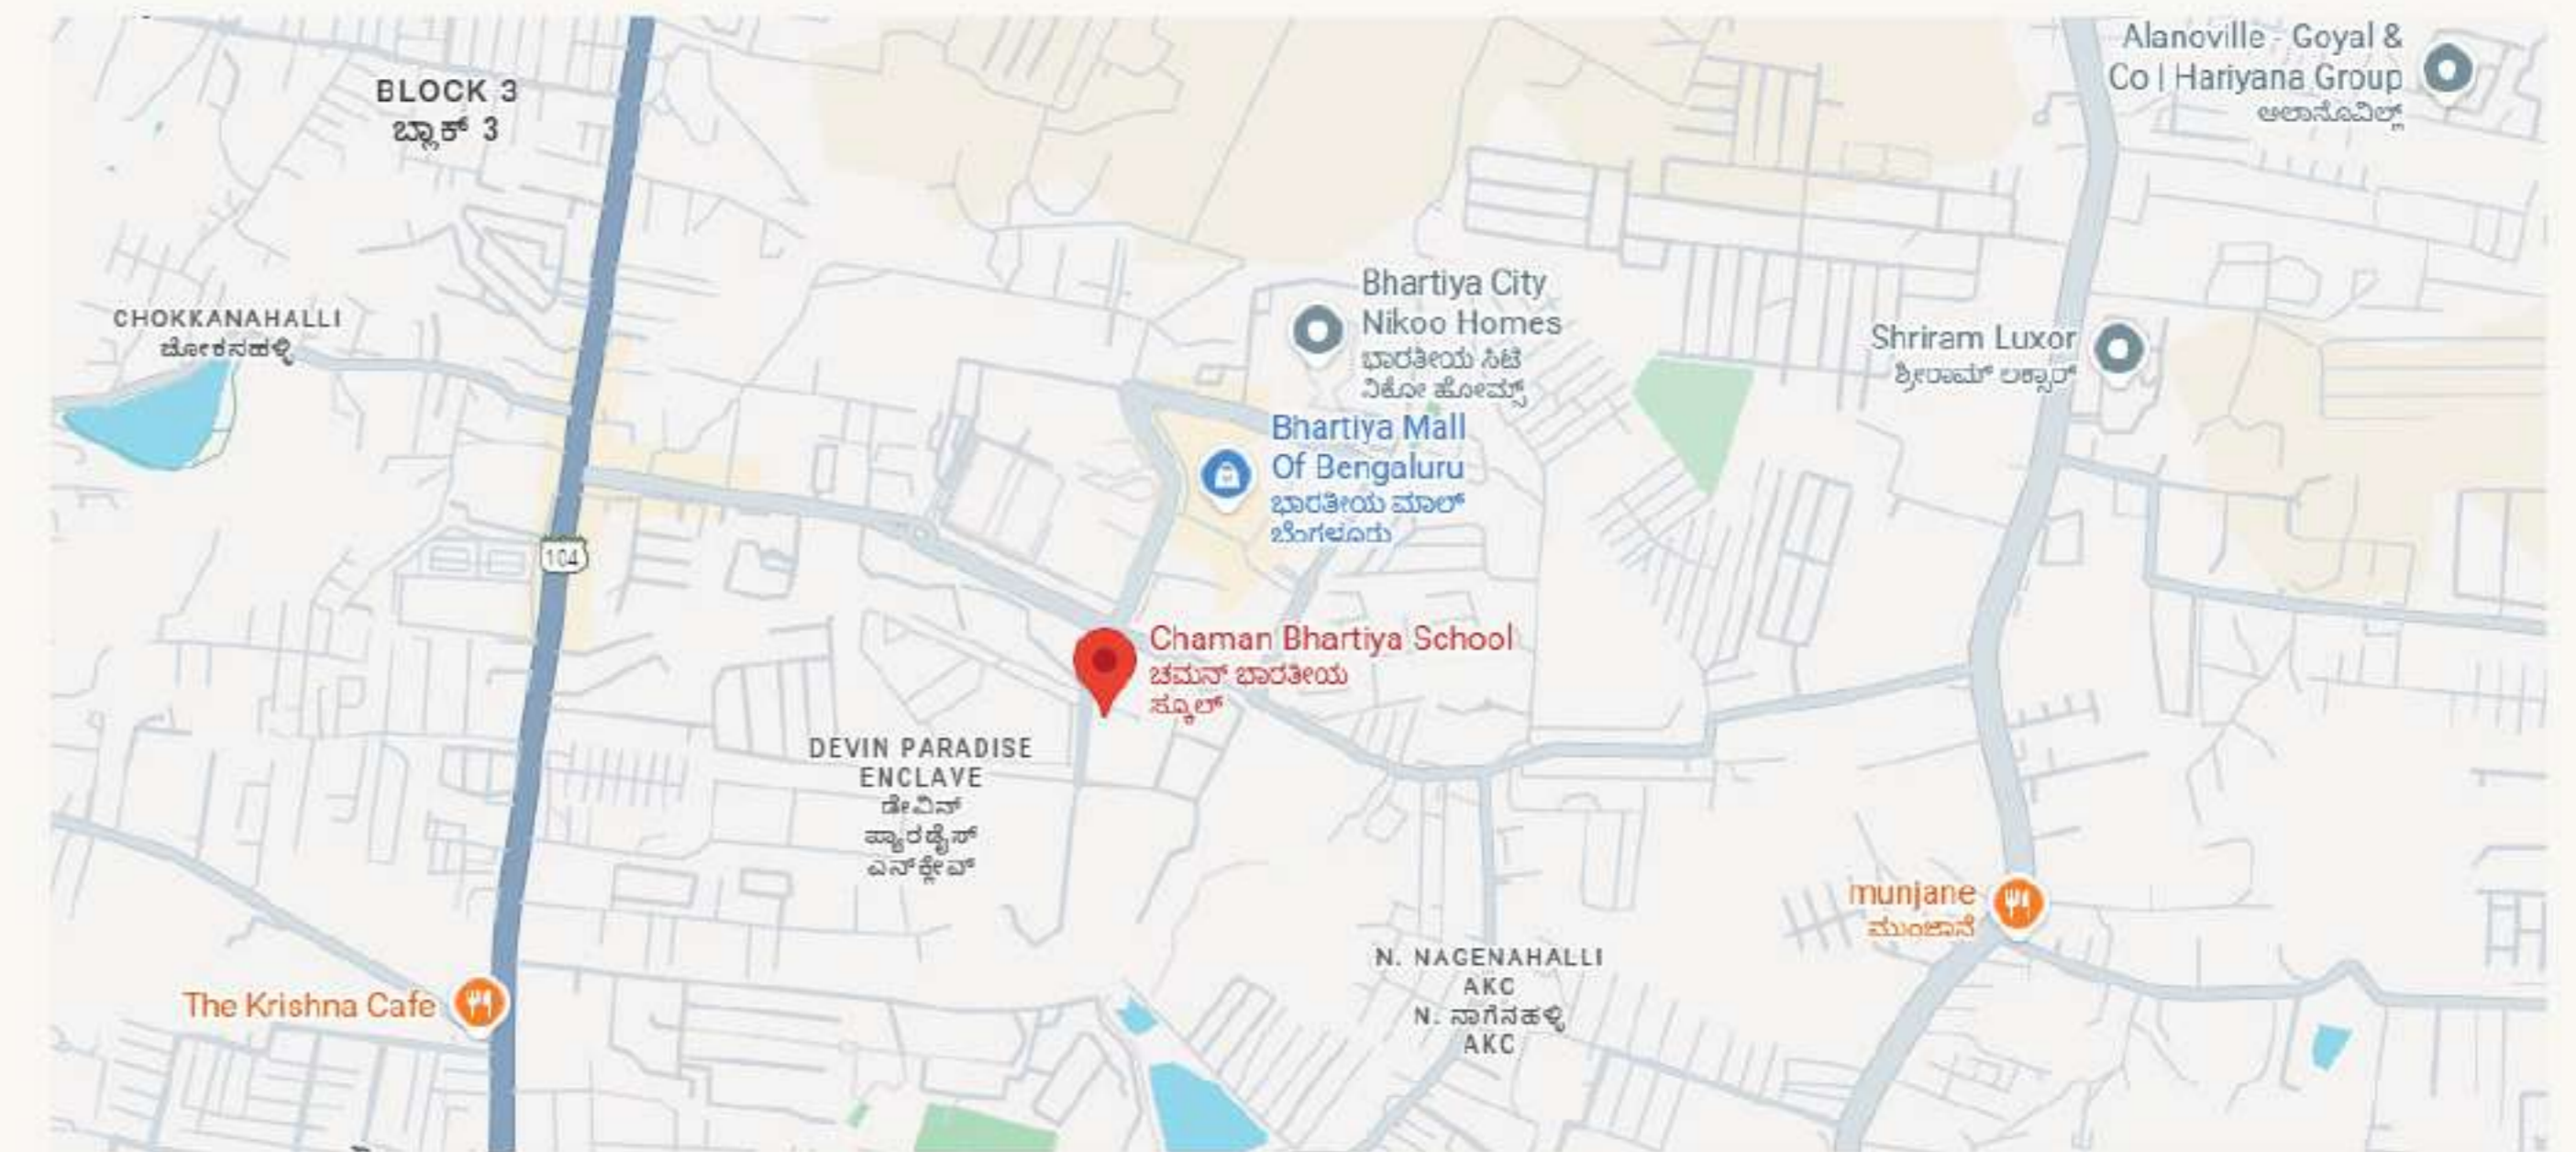

Making complex STEM concepts playful, tactile and joyful.
