Filter only

Better Water. Pure and Simple:

Elevate your household's drinking water quality effortlessly with the Sapphire JP20. This pleated filter is used with the M603 whole house filter housing to remove larger impurities like rust and sand.

Comprehensive Filtration:

Designed to remove rust, sand, odor of chlorine, and scale. The JP20 acts as a good first point filter to remove the larger impurities before another smaller micron filter is used to clear the remaining impurities.

Streamlined Installation:

The JP20 is used in the M603 filter unit and acts as a point of entry filter. It can be used with multiple M603 units to remove more impurities if you are after more pristine, simple water.

Ultimate Protection: Protect your households appliances and enhance your daily water experience with our high-quality filter, designed for durability and efficiency.

COMPATIBLE WITH:

- M603 WHOLE HOUSE FILTER

Washable Filter: This 20 micron filter is often used for rural water systems and tends to catch lots of big impurities. Thankfully this filter can be removed, cleaned and re used like new. Saving you money and time whilst providing cleaner water for longer.
