

Facade Antenna for Wireless M-Bus

The ANT05 antenna provides ground-plane independent omnidirectional performance in a compact and low-profile form factor. The discreet and durable housing offers a high level of vandal resistance, making it suitable for a wide range of applications, including LTE connectivity, where reliable communication is essential.

Key Features

- Low profile and ergonomic style
- Easy installations
- Combined 2G/3G/4G/LTE functionalities
- Ground plane independent

Technical Specifications

Electrical specifications

Frequency Range:	790-960MHz
Peak Gain:	2.5 dBi

Mechanical specifications

Dimensions (LxWxH):	162×50×45mm
Operating/Storage Temperature:	-40°C to +85°C
IP Class:	IP65, when installed
Mounting:	Screw or adhesive mount
