

Facade Antenna for Wireless M-Bus

The ANT05 antenna provides ground plane-independent omnidirectional performance in a compact and discreet form factor. Its subtle and durable housing offers high vandal resistance, making it suitable for a wide range of applications, including LTE connectivity where reliable communication is critical.

- Low-profile and ergonomic design
- Easy installation
- Combined 2G/3G/4G/LTE functionality

SPECIFICATIONS

Electrical Specifications

Frequency range: 790–960 MHz
Peak gain: 2.5 dBi

Mechanical Specifications

Dimensions (L×W×H): 162 × 50 × 45 mm

Operating/storage temperature: -40°C to +85°C
IP rating: IP65 (installed)

Mounting: Screw or adhesive mounting
