Micro LED Screen

20,000:1 Higher contrast ratio

Higher reliability
Anti-humidity
Scrubbable surface

170° Wider viewing angle

Extremely flatness
Seamless surface

1000 Nits

100,000 hours lifespan

Available in sizes: 108" 135" 162"

Infinite Vision Experience

VMTC leads with Micro-LED direct-view technology, brings details to life through outstanding color purity and a wider color gamut than conventional LED TVs.

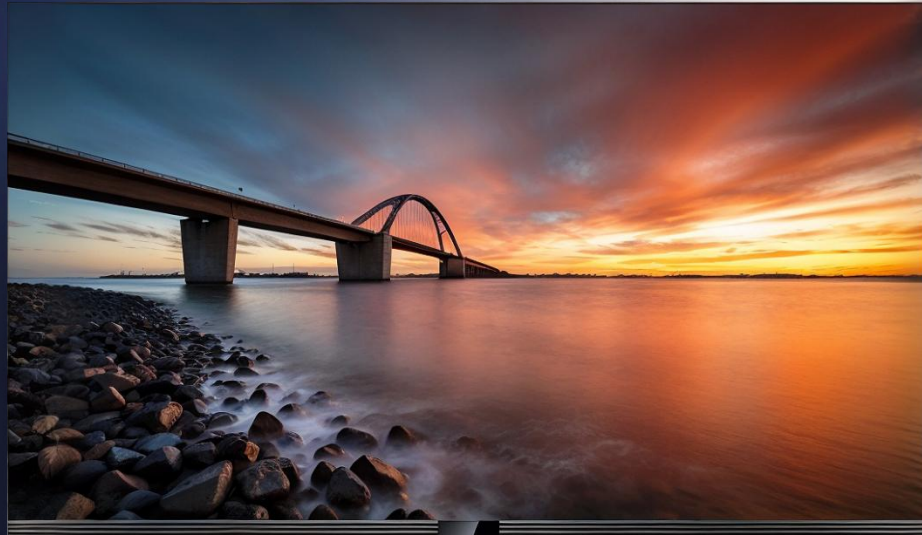

Vibrant colors and deep blacks deliver striking contrast and impeccable details, adding infinite allure to the unique visual experience.

From live events to blockbuster movies, everything is showcased on a larger, brighter and bolder scale.

Fearless in Brightness

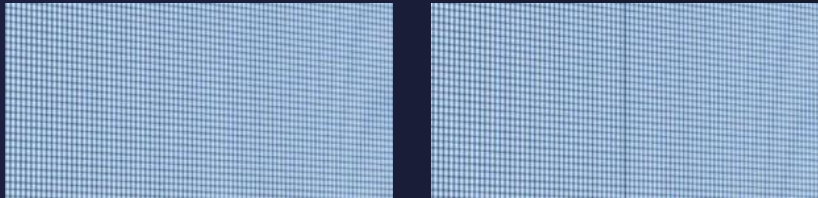

**Bright spaces can be easily
viewing clearly Brightness
and Colors remain consistent**

VMTC self-developed and self-produced self-luminous Micro LED chips, deliver RGB colors with higher precision than traditional LEDs due to narrower wavelength. Combined with advanced HDR technology, it reproduces true colors in every scene precisely, presenting exquisite picture quality.

Display Panel

Exquisite yet understated metallic slim body, Equipped with seamlessly integrated direct-view display panel
Enhancing the harmony between artistic aesthetics and display technology

By leveraging groundbreaking module-level calibration technology and high-precision surface warping control processes, We create direct-view TV panels without any visible gaps, ensuring a seamlessly perfect direct-view TV experience.

Worry-free Usage

- Google TV & ROKU TV authorization
- User-friendly interfaces and extensive application support Richer entertainment experience
- Seamless access to various streaming services, such as Netflix, Hulu, Amazon Prime Video, etc.
