

Risk Adjustment

RADV Audit Solution

Navigating the New RADV Reality

Medicare Advantage plans today are navigating a new era of compliance. With CMS requiring annual RADV audits—expanded member samples, years-long lookbacks, and strict submission deadlines—the stakes have never been higher. Health plans need technology that drives reliability, defensibility, and operational scale across every contract and audit year.

Built for compliance, designed for scale

Reveleer's RADV Audit Solution is a dedicated workflow embedded within our risk adjustment solution. It is specifically built to simplify your RADV audit process from data ingestion to submissions so your team can move faster, stay compliant, and focus on outcomes.

◆ Solution Highlights ◆

Automated CMS Enrollee Data Management

Ingest, crosswalk, and reconcile enrollee data lists quickly. Manage member cohorts and historical records with confidence, even from prior vendors or archived sources.

End-to-End Workflows

Automate retrieval, coding, and submission-ready packaging for audits covering PY2019, PY2020, and future cycles. Scalable configuration logic means each project adapts to contract size and audit scope, delivering consistency and reducing risk.

AI-Driven Coding and Evidence Validation

Rely on our advanced AI engine, EVE™ for accurate, compliant diagnosis validation, even as HCC models shift year to year. Evidence scoring and multi-level QA are standard.

Automated Provider Attestation and Pursuits

Close documentation gaps with automated provider outreach and tracking, speeding resolution for hard-to-reach or legacy providers.

Real-time Reporting

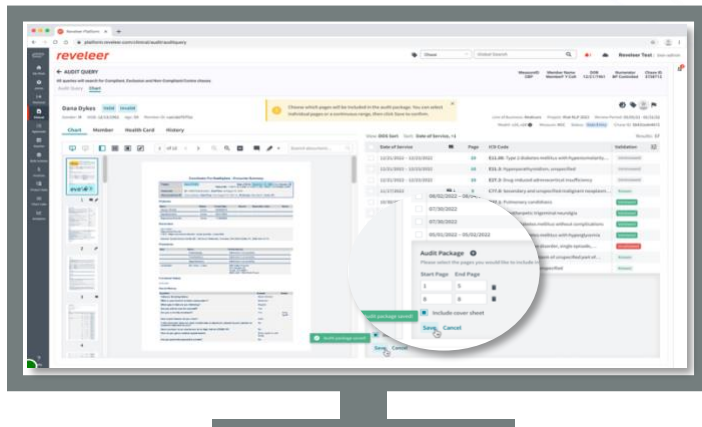

Keep teams proactive with real-time dashboards for retrieval, coding, QA, and submission.

Executive-level drilldowns put project control and audit transparency at your fingertips.

Submission Package Builder

Easily assemble complete, CMS-compliant audit submission packages for each contract and payment year. The platform guides selection of the strongest evidence and required forms, ensuring every member's documentation is validated, ranked, and packaged for secure digital delivery.

Flexible Engagement Models

Choose self-service SaaS, full-service managed support, or hybrid workflows. Our platform fits your strategy and team structure, empowering you to maintain oversight or leverage expert partnership.

Experience the Reveleer Difference

Reveleer's RADV Audit Solution empowers health plans to achieve audit readiness no matter how complex the requirements or aggressive the deadlines. It's the trusted choice for payers who want proven technology, seamless automation, and guidance at every step.
