

Retrieval & Clinical Quality

Comprehensive Retrieval & Abstraction for HEDIS Performance

◆ **Every Health Plan knows the pace of HEDIS season:** endless chart chases, tight deadlines, and rising pressure to improve Star Ratings while meeting compliance standards. For many, that process consumes hundreds of hours in manual outreach and data tracking, leaving little room for strategic action. Reveleer's AI-enabled HEDIS Solution offers teams speed, accuracy, and confidence by automating manual processes, scaling chart retrieval, and streamlining abstraction so your teams can refocus on strategic priorities and compliance success.

Unlock Reliable HEDIS Results

With precise automation and compliance standards built in, Reveleer eliminates friction that stalls HEDIS initiatives. Plans gain transparency into data accuracy, real-time measure progress, and confidence that every record supports the complete story of member care. Designed for the evolving HEDIS environment, Reveleer helps organizations stay ahead of changing NCQA standards and digital transitions **helping your health plan transform a daunting process into a well-orchestrated program.**

1,400

Hours saved in retrieval

80%

Faster care gap closures

Automated Retrieval & Abstraction Workflows

Proven Provider Engagement & Support

Secure Data Integration & Flexible Exchange

Overread & In-Platform Feedback Communications

Seamless Medical Record Retrieval Without the Wait

Our solution streamlines medical record retrieval and data aggregation by leveraging AI and automation to connect multiple EHR systems, ingest claims and clinical data, and provide secure provider uploads, reducing manual effort and accelerating workflows.

Smart, Proven Abstraction

AI-driven technologies eliminate manual abstraction overload. Enabling your teams to process more charts with accuracy, through built-in QA and transparency, no matter the season or staffing capacity.

Audit-Ready Submissions with Confidence

Reveleer builds compliance, measure validation, and traceability into every submission package. Reconcile data, validate denominators, and put an end to audit panic.

Higher HEDIS Scores and STAR Ratings

Get proactive about gaps. Real-time dashboards and actionable analytics help you close risk and improve performance ahead of every deadline, not after.
