

Tubac School of Fine Art

The Adult Education Division of TCA

Workshop Title: Image Transfers with the Gel Plate

Instructor Name: Kathie Scrimgeour

Dates: January 25, 2026, 10am-12:30pm

Location: Tubac School of Fine Art, 4 Calle Iglesia, Tubac, AZ, 85646

Students must have a firm grasp on the gel plate process. There will be no opportunities for basic instruction. Paper will be provided.

The image transfer using a gel plate can be fun and rewarding, but also frustrating. I always warn my students to expect some failures in this class - this is how we learn. All laser prints for this class are provided for the best chance to succeed and are meant to get students started. Students will be instructed on how to work with their own images for the best results.

Substrates:

- Gel plate - 5x7 or 8x10 (demonstrations will be on 5x7 plate)
- Plain white sketch paper - larger than your plate. This will be placed under your plate.

Tools:

- Brayer (2" or 5")
- Simple set (with smaller sizes are best) of round or flat acrylic paint brushes.
- Small pallet for mixing colors (I use a clear plastic to-go lid)
- Blotter cloth to soak up water

Paints:

- Basic set of acrylic paint (do not buy anything overly expensive)

Any questions about materials?
