HASE BIKES

Hase Bikes Workshops

Kettwiesel ONE Technology

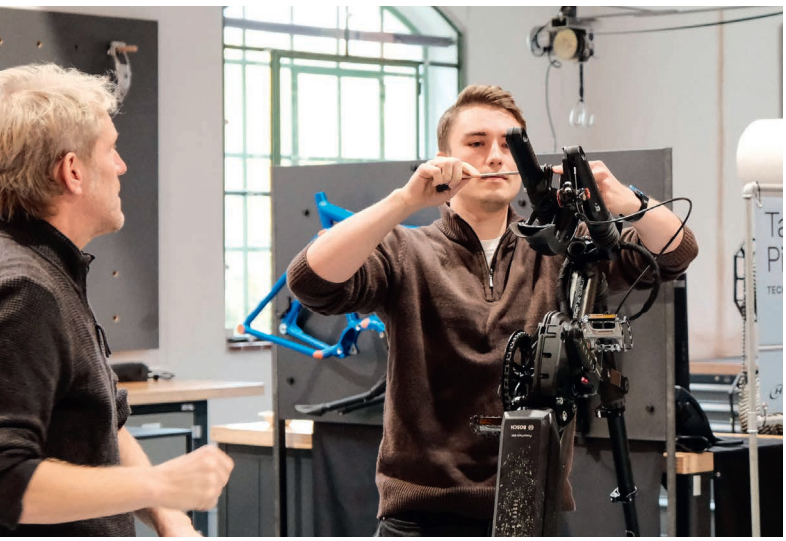

Kettwiesel ONE: ergonomics, adjustments & new features
The Kettwiesel ONE: quite simply our best trike. Why? You will see for yourself when you get hands-on with testing and wrenching. We can tell you a lot, of course. But perhaps we do not need to: the ONE speaks for itself. We are sure that by the end, you will share our enthusiasm – and pass it on to your customers.
NEW FOR 2026: chainless drivetrain on the ONE with CIXI, optional increase in maximum load to 180 kg, transport on an Allround rear-mounted car rack, platform pedals

Kettwiesel TWO Technology

Wrenching and testing – Kettwiesel TWO parallel tandem
Of course, this year would not be complete without a technical workshop on the Kettwiesel TWO. Interest in the TWO is already clearly noticeable. So get ready for your customers and get to know our latest model in every detail. Take a look behind the scenes of its development – directly with our design team. You will learn which insights from the development of the Kettwiesel ONE have been incorporated into the Kettwiesel TWO. Afterwards, you will also be familiar with all the new accessories: platform pedals, fold-away footrest, Cargo Rack, etc.

Trike Technology

Maintenance and servicing of the trikes Kettwiesel (models before 2024), Trigo, Trets, Trix and Lepus
We hope you have brought plenty of questions – because this is the place to ask them. Find out everything you have always wanted to know about servicing, maintenance and repairs for these popular models. Your everyday workshop experience is the focus of this workshop.

Pino & Gravit Technology

One frame – many possibilities
From transporting children and cargo-bike use to globe-trotting for two. This workshop is your hands-on session on transport, ergonomics and the versatility of Pino & Gravit, which share the same frame – with many similarities and a few important differences. We will show you how the different options and accessories are installed and which combinations are compatible.

Turning and Milling

Machines weighing hundreds of kilos that mill steel to fractions of a millimetre.
Our machine shop is home to decades-old treasures combined with state-of-the-art control systems. In this practical introduction to metal machining, you will combine a range of technologies and build your own small model. Of what? That is still a secret. Rumour has it that it will be a bicycle for two – but not a Pino …

Configurator in Focus

Service made easy
Using plenty of practical examples, this workshop will show you how to organise orders, maintenance and repairs even more efficiently with our online tools – from quick spare-parts searches and exploded drawings to creating quotations. We also look forward to hearing your ideas for improvements in an open discussion.
NEW FOR 2026: HBK number, order status, technical knowledge base

Consultation & Customer Experience

From first contact to the perfect handover to your customers

This workshop is the perfect introduction to the world of Hase Bikes. Get involved and get hands-on, right at the test track, across different models and with plenty of room for best practices. The key question throughout: How can you recognise customer potential and turn technical strengths into tangible added value? This workshop combines ergonomics, test rides and consultation into a compelling customer experience.

Partnership & Market Development

How can we reach more customers together and support them even better?

Want some real talk? So do we! Join us as we dive into sales models, customer data and practical insights from the MarketLab. Together, we will turn data into real-world dealer practice. Through open exchange, you will gain business intelligence and valuable experience for decision-makers in specialist retail.

Rehab – Bikes

Rehab solutions for special requirements

What makes a Hase Bikes cycle unique? Perhaps it is the fact that we go further than others to get people cycling. You are now part of this mission – and therefore an incredibly important point of contact for everyone who needs more than standard solutions. This workshop prepares you for that responsibility. Once you can confidently discuss hand-crank drive, shoulder steering, special pedals, fixed drivetrain and much more, you are sure to experience your own Hase moment before long: unforgettable sales moments – goosebumps included.

NEW FOR 2026: Trix ONE, chainless drivetrain on the Kettwiesel ONE with CIXI, Kettwiesel ONE with optional increase in maximum load to 180 kg, platform pedals, trailer option

Rehab – Accessories

Rehab accessories for more freedom

For many people, the versatility of our rehab components is a real revelation. No wonder: with our proven accessories, bicycles and trikes can be precisely adapted to individual needs. Afterwards, you will know what our adaptations can do in a wide range of situations. That knowledge will give you confidence in every customer conversation.

NEW FOR 2026: Alongside tried-and-tested classics, this year we will show you the completely redesigned **platform pedal.**

2) Partner Workshops

Medical Device Training

Training for medical device advisors

Medical device advisors are required to keep up to date with new developments. In this workshop, you will receive the latest updates from the medical technology sector – presented in a practical format by BEO Berlin. Afterwards, you will receive a certificate of attendance as proof of your training.

Bosch

BOSCH – the smart system

In this hands-on workshop, we will share the latest information and practical applications relating to the Bosch eBike System. Key topics include electronic shifting integration (eShift), configuration changes, systematic fault diagnosis, the functions of the eBike Flow app, and the ConnectModule with Flow+ as well as its theft protection and tracking features. Alongside the theoretical basics, you can expect practical demonstrations and plenty of time for questions and exchanging experiences.

Busch & Müller

Lighting highlights from Busch & Müller

Discover the latest innovations in bicycle lighting: from the “Brex” brake rear light and the powerful entry-level “Briq-S” headlight to the first high-beam headlight for dynamo-powered bikes and the brand-new bicycle indicator. In our workshop corner, you can also build your own headlight.

Shimano

Shimano E-Bike Systeme: Technik, Diagnose & Service

How does the Shimano EP6 Cargo work, what settings are available, and what should you do if an error message appears? In this workshop, you’ll get to know Shimano e-bike systems from a workshop perspective. After a brief theoretical session on the motor, display, and connections, you’ll

head straight to the bikes: Working in small groups at various hands-on stations, you'll be able to try everything out for yourself. You'll test diagnostics using the E-Tube Professional software, adjust settings, and learn about installation and service. In addition, Shimano professionals will show you the new e-bike service kit and how to connect your Hase bikes to the Shimano apps.

Rohloff

Rohloff in detail
Would you like to continue impressing your customers with expert advice and efficient service? Then join our Rohloff dealer training session and prepare yourself perfectly for the coming season.
Discover our **company history**, explore the **new Rohloff products** and learn the latest technical **tips and tricks**. Topics will include the selection process for SPEEDHUB variants, checking compatibility with **A12 frames**, the **maintenance schedule** and the associated work, as well as the correct procedure for submitting **warranty claims** or **service requests**.

Stress Management

Getting stressed is easy – beating it is another story?
Take time to work on your stress-management strategies. In this workshop, we will look together at what causes you stress, how it affects you and why. Tailored to everyday working life, we will show you different approaches and strategies for dealing with stress more effectively.

Team Resilience

This workshop is all about the team.
Because the bond between you and your colleagues is your most important resource. The workshop strengthens collaboration, creates space for exchange and brings the team even closer together at every level. This helps resolve conflicts more quickly and enables you to face challenges as a stronger team.

Evening Yoga

Yoga & mindfulness in the evening
At Kalipriya, you will find space for body, mind and soul – to let go, breathe deeply and reconnect. After a first Workshop day full of impressions, this workshop is just what you need to come back to yourself.

3) Supporting programme

Special Sale

At the Special Sale, you will find **exclusive offers, discounted one-off items, as well as test, demo and trade-fair bikes** from our range. Available only during the Workshop – while stocks last!

Test Track

Just give it a try
Uphill, downhill, on asphalt and gravel – you simply have to experience what our bikes and trikes can really do and how much fun a Hase Bikes cycle can be. Try everything. With its varied surfaces and fantastic views from the spoil tip, our test track across the former colliery grounds is your micro-adventure during your time in Waltrop. This year, you can also test an exclusive prototype. Curious?

Dinner + Party + Gaming

After hours in Hall 4
Where workshops were taking place during the day, culinary highlights await from 19:00: a large buffet with live cooking. Afterwards, Hall 4 turns into the party zone – with a DJ, drinks and plenty of gaming and arcade action. The perfect mix of a relaxed evening, good vibes and informal networking!

Creativity in the Kunstschacht

For everyone in the mood to get creative – drop by and let Kirsten Hase surprise you.
Open session, no registration required.

Entry information

To ensure a smooth check-in, please have your smartphone ready with the Workshop App open

At our check-in counters, you'll receive your participant badge for the Workshop weekend as well as your personal schedule – so you'll always know when and where you need to be.
