Powerful trike with a Bosch motor and great adaptability: Hase Bikes presents the Kettwiesel ONE PLUS

With the Kettwiesel ONE PLUS, Hase Bikes is giving its Kettwiesel even more power. The versatile trike with the powerful mid-mounted Bosch motor was previously only available as a custom model.

Chassis, ergonomics and suitability for everyday use

The entire Kettwiesel ONE range is designed to be used for a wide range of activities and offers a great balance between riding comfort, adaptability and transport capacity. The MacPherson chassis with highly sensitive suspension and 70 mm suspension travel ensures smooth and stable handling even with loads of up to 140 kg, including the rider, and on uneven ground, too. The handlebars, seat and frame can be customised to ensure a comfortable riding position that supports your back. This suits both everyday riders and people with special physical requirements.

Bosch Performance Line CX: Powerful drive, quiet operation

The Kettwiesel ONE PLUS is equipped with the Bosch Performance Line CX motor. This efficient motor has a torque of 100 Nm, an output of up to 750 watts and supports up to 400 per cent of your own pedalling power. This ensures powerful yet finely adjustable support, both on flat terrain and on inclines. The PowerPack 545 Wh battery ensures a reliable power supply. It is operated via the clear Purion 200 display. An integrated pushing and starting aid makes manoeuvring in confined spaces easier.

Switching systems designed for individual needs

Depending on the usage profile, the Kettwiesel ONE PLUS can be configured with various high-quality switching systems. Integration into the Bosch system enables convenient operation and, in some cases, automatic control. The Enviolo Automatiq Trekking gear hub adapts to the cyclist's cadence and thus ensures a smooth flow when riding without manual shifting. In addition to this top-selling equipment, the manual Enviolo with twist shifter and the Rohloff 14-speed hub gear can also be individually selected in the Hase-Bikes configurator (hasebikes-konfigurator.com).

Compact for transport, practical for everyday use

A specially developed cargo rack is available for transporting luggage or everyday aids. With a surface area of 33 x 66 cm and a load capacity of up to 30 kg, this carrier is also suitable for carrying a rollator, shopping bags or a dog. This makes the Kettwiesel ONE PLUS a practical mobility solution, even in urban environments or for therapeutic use.

The Kettwiesel ONE UP PLUS version with above-seat steering allows for the arms to be positioned more like they would be on a two-wheeler and is particularly easy to handle: The entire steering unit can be folded up for getting in and out.

Small pack size for transporting

Although the Kettwiesel ONE PLUS can be ridden by people between 1.10 and 2.00 metres tall, it can be pushed together to a small pack size of 135 x 87 x 66 cm (Kettwiesel ONE PLUS) or 135 x 87 x 72 cm (Kettwiesel ONE UP PLUS). This makes it easy to transport in an estate car or motorhome. In the upright position, the trike takes up very little space in a cellar, bike store or hallway.

Prices:

Kettwiesel ONE PLUS with under-seat steering: from **10,600** euros

Kettwiesel ONE UP PLUS with above-seat steering: from **10,400** euros

Specifications:

Kettwiesel ONE PLUS:

Handlebars: under-seat steering
