TRANSPORT - AUXILIARY CACHE

RBRO SOLUTIONS

**Provide a secure backup for iManage cloud or on-premise content and metadata** for recovery, content crawling, and integration.

As businesses increase their participation in the iManage cloud, questions arise regarding the need for auxiliary access to content for reporting, integration, and alternate-use cases in emergency situations. *Transport - Auxiliary Cache (AC)* enables a secure, on-premise or cloud-based repository to host a continuously updated copy of information from iManage Cloud or iManage on-premise repositories.

When new content is added to the iManage repository or content in iManage is changed, the updated documents are automatically synchronized to the Auxiliary Cache repository and stored in an encrypted filestore with client-held encryption keys. In addition, the system can act as an independent backup for added assurance and a database to integrate with other applications for iManage data-driven workflows and reporting.

☑ ADVANCED PROTECTION

- Safeguard files from malware propagation, reducing infection risks.
- Ensure protection with a file repository located in a separate silo.
- Significantly reduce attack risks by coupling Transport AC with robust protection software.

☑ DISASTER-PROOF DATA ACCESS

- Provide staff with access to data from offsite or cloud-hosted systems during malware attacks.
- Maintain data availability if primary systems like Active-Directory or BIOS are compromised.
- Protect against data loss in critical situations.

☑ SEAMLESS INTEGRATION

- Enable uninterrupted database querying for reporting.
- Ensure Workflow continuity, by facilitating integration with SQL data and back-end file contents.
- Data control reassurance in cloud migration, ensuring access to valuable content in times of crisis.

TRANSPORT - AUXILIARY CACHE

RBRO SOLUTIONS

PRODUCT FEATURES:

Synchronization:

- Monitor for changes on the iManage repository
- Copy content, relevant metadata and security to the Auxiliary Cache repository
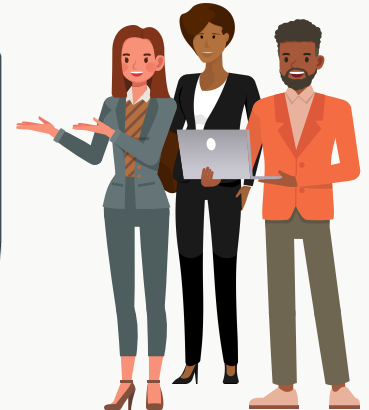

Notifications:

- Notifies administrators of important events related to data coming from iManage

Reporting:

- Enables administrators to generate a range of reports about the content of the Auxiliary Cache repository

Validation:

- Ensures the Auxiliary Cache repository accurately represents content from the cloud
- Facilitates validation requests from administrators for ranges of documents

iManage
Technology Partner

ABOUT RBRO SOLUTIONS:

A premiere iManage Partner since 2003 and trusted globally by over 400,000 business users, RBRO Solutions is dedicated to helping organizations get the greatest value from their business content and work processes by extending the power of their iManage Work solution. With over 700 iManage engagements, RBRO applies best practices and know-how to simplify iManage implementations, upgrades and migrations. RBRO transforms how organizations get work done with adoptable and scalable improvements in business efficiency and agility that integrate seamlessly across corporate systems, adding value to the iManage Work solution and enabling you to decrease your overall cost of ownership by simplifying tasks and empowering users.

smb

"To us, RBRO is an organization we can put our trust in and would have no hesitation in recommending them to others."
• Marco Cura, Head of IT, Simons, Muirhead & Burton LLP.
