

Link2DMS integrates popular, non-integrated applications with iManage Work—from Classic Client to Work 10 Professional

While users can save and open “integrated” documents such as Microsoft® Word, Excel, PowerPoint and Adobe® Acrobat® files within the iManage Work environment, this is often not sufficient for today’s workplaces. With the increasing complexity and variety of work performed by many organizations, the use of programs outside of the accepted integrated suite of products is commonplace. As a result, the ability to effectively manage all documents within the document management system (DMS), regardless of file type, can be limited.

Link2DMS makes the most popular non-integrated applications into integrated applications. *Link2DMS* is a powerful and easy-to-use software tool that enables you to save and open documents created with non-native integrated applications directly within iManage Work. Use to integrate web browsers and web-based applications on the browser level or only on designated pages.

IMPROVE PROCESSES

- Significantly minimize the total number of clicks to complete processes
- Facilitate processes with ease with no additional training required
- Boost productivity by streamlining and expediting e-filing

ENSURE COMPLIANCE

- Maintain security with no manual export of iManage Work documents before uploading to webpages
- Reduce risk by saving non-integrated documents within iManage Work
- Eliminate content stored on a shared drive

INCREASE EFFICIENCY

- Increase productivity with less steps/clicks to upload/download content
- Save time as system activity is automatically dated, tracked, and detailed
- Move content to and from iManage Work without having to manually store it on a local machine

PRODUCT FEATURES:

- Administer from anywhere.
- iManage New Professional experience integration.
- Reduce risk and increase matter/engagements/projects visibility by allowing non-integrated documents to be saved within iManage Work.
- Improve productivity and streamline the e-filing process.
- Allow users to save file types not supported within a standard iManage Work environment.
- Directly upload documents from the DMS to websites and download documents from web browsers to the DMS—activity is automatically dated, tracked, and detailed.
- Admins can configure which websites to intercept with iManage dialogs.
- Fully customizable dialog behaviors including which default file type to use when saving documents.
- Customize usage profiles with different dialog behaviors and assign it different set of users.
- Supports silent installation making the onboarding process smooth.

ABOUT RBRO SOLUTIONS:

A premiere iManage Partner since 2003 and trusted globally by over 400,000 business users, RBRO Solutions is dedicated to helping organizations get the greatest value from their business content and work processes by extending the power of their iManage Work solution. With over 700 iManage engagements, RBRO applies best practices and know-how to simplify iManage implementations, upgrades and migrations. RBRO transforms how organizations get work done with adoptable and scalable improvements in business efficiency and agility that integrate seamlessly across corporate systems, adding value to the iManage Work solution and enabling you to decrease your overall cost of ownership by simplifying tasks and empowering users.

DENTONS RODYK

*"Link2DMS helps us strengthen our data governance while simplifying everyday tasks...
The bottom line is that more people use the system effectively and we reduce risk."*

• Alvin Aw, Head of IT, Dentons Rodyk & Davidson LLP.
