

Subprocessors Statement

Last Updated: 18 February 2026

Definition

To support delivery of our Services, TGCL and its affiliates may engage third parties (each a “Subprocessor”) to process Your Information. This page provides important information about the identity, location and role of each Subprocessor. Terms used on this page but not defined have the meaning set out in the Terms of Service, Privacy Policy or a superseding written agreement between the Customer and TGCL (the “Agreement”).

Where we engage subprocessors located outside New Zealand, we take reasonable steps to ensure that personal information is protected by safeguards that, in overall effect, are comparable to those under the New Zealand Privacy Act 2020. This includes entering into contractual arrangements with such providers that contain appropriate privacy and security obligations.

Updates

As our business grows and evolves, the Subprocessors we engage may also change. We will endeavour to provide the owner of the Customer’s account with notice of any new Subprocessors to the extent required under the Agreement, along with posting such updates here. Please check here regularly for updates.
