Welcome To MW Electrical.

Based in Wellingborough, MW Electrical delivers electrical work across industrial, commercial, and public projects.

With over 20 years' experience, we know how to keep projects organised and running smoothly. We take ownership of our work, keep communication clear, and make sure everything is done safely and to a high standard.

Clients choose us because we're reliable, adaptable, and professional, the kind of partner you can trust to get the job done right, on time, and without disruption.

Electrical Projects

COMMITTED TO YOU

HEALTH & SAFETY: PRIORITY #1

At MW Electrical, safety comes first. We follow strict procedures, carry out regular training, and run clear risk assessments to keep every site safe and compliant.

Safe sites mean quality work. By using the right equipment, working to industry standards, and keeping communication clear, we make sure projects run smoothly from start to finish.

CASE STUDY #128

Derby Football Hub Electrical Installation

Location: Derbyshire

Client: Derby Council

Sector: Public

Date Completed: February 2024

MW Electrical delivered the full electrical installation for Derby Football Hub, a new community sports facility. The project ran to a tight programme and required power to remain live throughout. We coordinated with other trades to ensure safe delivery on time and to specification.

Deliverables:

- High-capacity mains power supply
- Multiple distribution boards
- Seamless changeover to existing panel (no power loss)
- Seven new submains for reliable distribution
- Extensive external lighting
- On-time and on-budget delivery

CASE STUDY #174

Aston Martin Showroom, Workshop, and Facilities

Location: Birmingham

Client: Aston Martin

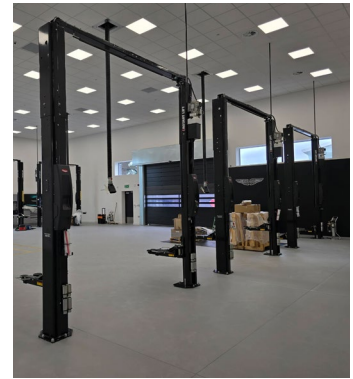

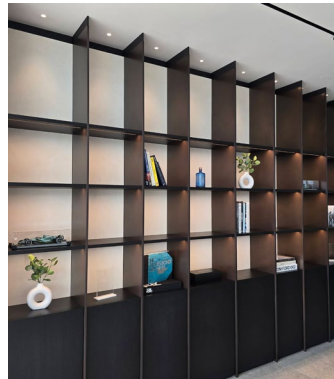

Sector: Commercial

Date Completed: August 2024

MW Electrical delivered the full electrical installation for Aston Martin's Birmingham showroom, workshop, offices, and valet bay. The project totalled 2,709 hours and was completed on time, to the brand's high standards, and in coordination with other trades to ensure smooth delivery.

Deliverables:

- Custom showroom lighting to showcase vehicles
- Power and lighting for workshop and valet bay
- External lighting and signage
- HVAC containment and supplies
- CCTV and security systems
- Full compliance testing

CASE STUDY #076

Mercedes Truck Workshop Installation

Location: Witham

Client: Mercedes Benz

Sector: Commercial

Date Completed: January 2023

MW Electrical completed the full electrical installation for Mercedes' new truck workshop, designed to handle both conventional and electric vehicles. The 3,825-hour project was finished on time and in coordination with other trades, ready for fleet operations.

Deliverables:

- High-capacity electrical infrastructure
- Energy-efficient LED lighting
- EV charging points and specialised outlets
- Robust power for heavy-duty equipment
- Fire alarm system to current regs
- Data and network infrastructure
- Full compliance testing

AS EASY AS 1... 2... 3...

A Considered Approach.

Our process keeps projects running smoothly, safely, and on time. With clear communication, solid planning, and skilled work, we make sure every stage is done properly.

01

Consultation

We begin by understanding your project's specific needs and goals, ensuring our solutions align with your vision and requirements.

02

Design & Planning

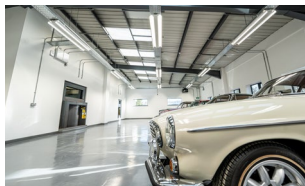

We develop a tailored design with innovative solutions, supported by precise planning for flawless execution and optimal efficiency.

03

Execution & Delivery

Our skilled team delivers on time and with minimal disruption, while rigorous quality assurance guarantees the highest standards of workmanship.

Ready To Get Started.

At MW Electrical, we support you at every stage, from installs to maintenance and repairs. Our experienced team delivers safe, reliable work tailored to your project.

Commitment to Safety: Strict adherence to safety standards and regulations.

Reliable Support: Reliable service, prompt maintenance, repairs, and 24/7 emergency assistance for uninterrupted operations.
