

BRIGHT GREEN ROOF

SHINGLE PRESERVATION

What Is Shingle Preservation?

Adds up to 10 extra years to your roof (per spray)

Prevents Cracking And Curling

Increases Hail, Wind and Fire Resistance

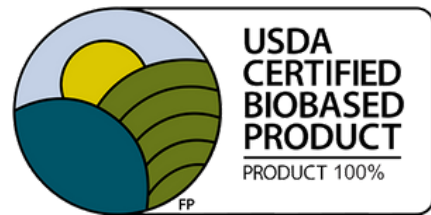

Enhances And Restores Colour

Shingle preservation is a process that restores the oils in your asphalt shingles, helping them stay flexible and protective for longer. We apply a USDA-certified, 100% biobased oil that penetrates the shingles and slows down aging caused by UV, heat, and oxidation.

Think of it like moisturizing your roof — keeping it healthy so it doesn't dry out and crack.

- ✓ **100% USDA Certified Non Toxic**
- ✓ **Plant Based Formula Made In Canada**
- ✓ **Solar Panel Friendly**
- ✓ **Safe For Pets, Children and Your Garden**

There are lot's of options for shingle preservation. But what makes Bright Green Roof special is our commitment to the environment - not only is our product sustainably produced, but its 100% plant-based and non-toxic. No need to worry about run off or chemicals!

And we're so confident, we guarantee every qualified roof we spray! You'll get a 5 year transferable warranty for the health of your shingles - no cracking or curling, guaranteed.

Restore the colour, flexibility and granular adhesion!

Before

After!

NW Calgary Testimonial

I appreciate the job Bright Green Roof did with the restoration application to my shingles.

During the initial assessment they explained to me how dry the asphalt shingles were getting. Before I went through with the application I used a ladder and climbed to my lower shingles and I could see they were dry and the granules were easily scratched off with my finger nail.

I agreed to the job, they arrived and got the job done. They showed me the before and after drone photos which was a nice touch. A few days after the treatment I climbed up and checked the shingles again and there was a definite difference. The granules were glued down well and did have a rejuvenated appearance.

I think the application gave the shingles a newer look.

100% Solar Panel Friendly!

We love solar - but we don't love the extra replacement costs.

Taking the panels on and off during a roof replacement adds thousands to the service. Our shingle preservation treatment extends your roof's life by 15+ years, so you avoid this costly headache!

We even take the time to cover and clean your panels after service.

A worker in a blue shirt and shorts is standing on a roof, using a spray wand to apply a product. In the background, a white pickup truck with "bright green roof" written on its side is parked. The truck has a green and yellow striped pattern on its side. The scene is set against a dark, overcast sky.

**Stop wasting money on early roof
replacements.**

Spray today and save thousands!

If you're interested in moving forward the next steps are simple - either talk to your salesperson about getting a measurement, or apply online for one. Once we know the size of your roof we can provide an accurate quote, and get your home protected.
