

Husky Dolly

Husky - the folding dolly

Husky dolly builds on the success of the legendary Panther Lightweight Dolly, combining state-of-the-art design and manufacturing to produce the most ingenious and practical lightweight dolly in the industry. The weight of Husky is 11kg / 24 lbs less than its predecessor, yet makes no sacrifices in terms of payload or performance.

Husky is flexible - accommodating all types of camera mounts and accessories, including tripods, Bazooka risers, turnstile attachments, seats, and pneumatic or track wheels.

When folded, Husky serves as a transport cart for your camera case or other bulky equipment.

Als Nachfolger des Leichtdolly verbindet der Husky Dolly perfektes Design und höchste Verarbeitungsqualität. Das Gewicht konnte um 11 Kg reduziert werden. Darüber hinaus kann der Husky in solch eine geniale Klapp-Position gebracht werden, dass er als Sackkarre für z.B. Kamerakoffer dient. Der Husky bietet eine stabile Plattform für Ihr Stativ aber auch die Montage einer Bazooka Säule oder Drehkreuz ist möglich.
