NEW JIBS

Part number: 314725
Designation: Vario Jib PRO S
Length: 0,59 m - 0,75 m
Weight: 19,5 kg / 43 lbs

Part number: 314726
Designation: Vario Jib PRO M
Length: 1,21 m - 1,77 m
Weight: 23,5 kg / 51,8 lbs

Part number: 314727
Designation: Vario Jib PRO L
Length: 1,74 m - 2,78 m
Weight: 28 kg / 61,7 lbs

NEW EXTENSIONS

Part number: 314728
Designation: Extension 0,5 m
Weight: 3,7 kg / 8,2 lbs

Part number: 314729
Designation: Extension 1 m
Weight: 6,5 kg / 14,3 lbs

Part number: 314580
Designation: Extension 1,5 m
Weight: 8,6 kg / 18,9 lbs

Front end with new design
less weight, ergonomic design

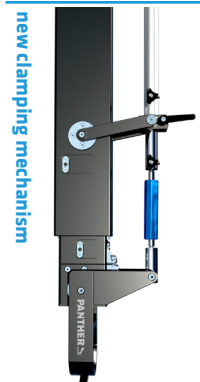

Tension lock on outrigger connection
more stability, easier handling

New turnbuckle
for easier and more precise adjustment of the front end

New support mechanism
for more stability, especially when attaching extensions

Elimination of separate, exposed lever
damage due to incorrect operation is not possible

New tension bolt
form- and force fitting connection, no tolerance gap/wobble

new clamping mechanism

Outrigger profiles with radius
more ergonomic, less weight

VARIO JIB PRO L

Integrated 3/8 inch thread in main beam
mounting option for various accessories (monitor etc.)

Bigger brake lever
easier handling, better braking force

Hex key with parking holder
more stability, easier handling

Central Locking screw without clamping lever
more ergonomic, damage due to incorrect operation is not possible

VARIO JIB PRO

Further Improvements:

The newly designed Vario Jib Pro is the successor to the very popular Panther Vario Jib, and was, in many ways, improved:

1. The lengths are telescopic adjustable (for more details see overview)
2. The overall length can be increased by adding our new extensions (new: supporting rod)
3. The counterweight outrigger is telescopic adjustable
4. The payload is up to 80 kgs (176 lbs)
5. Max counterweight: 12 Weights (104378)
6. The new Vario Jib PRO is very light, despite maximum stability

New QUICK TENSION LOCK:

Especially when using the extension and with high loads, the tension hook is a significant product improvement!

New TENSION BOLT:

All connections on the new Vario Jib Pro have integrated tensioning bolts to ensure maximum stability.

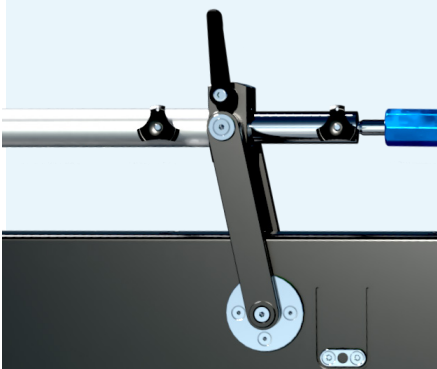

New TURNBUCKLE:

Our newly engineered turnbuckle allows more precise adjustment.

New SUPPORT MECHANISM:

For more stability, especially when attaching extensions.
