

Cloud Journey Tracker Assessment

What is it?

The Microsoft Cloud Journey Tracker is a structured assessment that helps you understand where your organisation currently sits in its cloud transformation and what steps are needed to move forward. It gives clarity on your cloud maturity across key pillars and provides tailored guidance on how to accelerate progress, unlock value, and align with business strategy.

What it includes

The tracker covers areas such as cloud strategy, governance, architecture, operations, security, and adoption. It maps your current state against industry best practices and Microsoft's Cloud Adoption Framework, providing a visual maturity model and targeted next steps.

Key outcomes

- Clear understanding of your current cloud maturity.
- Visibility into gaps and areas for improvement.
- Prioritised roadmap to accelerate cloud adoption.
- Alignment of cloud goals with business strategy.
- Trusted framework to guide decision-making and investment.

When to do an assessment

At the start of a new cloud transformation initiative

When cloud adoption has stalled or become fragmented

As part of IT strategy or digital roadmap planning

To benchmark progress and report back to stakeholders
