Microsoft Licence Optimisation Assessment

What is it?

The Microsoft Licence Optimisation Assessment is a structured review of your Microsoft licensing environment designed to identify inefficiencies, reduce unnecessary spend, and ensure licensing aligns with organisational requirements. It helps maximise the value of your Microsoft investment while improving visibility and compliance.

What it includes

This assessment analyses licence allocation, usage patterns, security entitlements, Azure consumption, and agreement alignment across Microsoft technologies. It identifies underutilised licences, optimisation opportunities, and areas where licensing can better support operational and business objectives.

Key outcomes

- Reduced unnecessary licensing and cloud spend.
- Improved visibility into licence utilisation and consumption.
- Better alignment between licensing and business needs.
- Increased value from existing Microsoft investments.
- Clear recommendations for optimisation and compliance.

When to do an assessment

Before Microsoft agreement renewals or true-ups.

Following organisational growth or restructuring.

During cloud or Microsoft 365 transformation initiatives.

As part of ongoing software asset management reviews.
