

WOMEN FIGHT FOR UKRAINE FOUNDATION

Christmas Fundraising Report

Over the Christmas period, thanks to the generosity of all our supporters, we were able to host a series of fundraising events and collect donations to help people in Ukraine affected by the war. We would now like to share what our team at the Women Fight for Ukraine Foundation (Charity no: 1209573) has been able to achieve thanks to your contributions.

Total Raised

Score of Work

We extend our deepest gratitude to the Duchess Georgina of Norfolk and to Joanna von Schenk for their generosity and kind assistance in organising the Christmas Carols Service for Ukraine at Boxgrove Priory. We also thank all our volunteers: your dedication and kindness make it possible for us to continue supporting Ukrainians in need when it matters most.

How we spent money:

* We also receive small regular monthly donations, which are used as needed. The Foundation is 100% volunteer-run with only minimal administrative costs.

Essentials in Ukraine in winter 2026

Ecoflow Delta 2 Portable Power Station

In Ukraine, portable power stations such as the EcoFlow DELTA 2 and Anker Solix C1000 provide reliable, mobile electricity for communities affected by ongoing power disruptions. They are used to charge medical equipment at stabilization points, power communication devices during evacuations, and support volunteers transporting vulnerable civilians and animals to safety. These stations also keep essential tools running, including radios, laptops, lighting, internet, and other critical devices, ensuring coordination and continuity of care in challenging conditions.

Anker SOLIX C1000 Portable Power Station

Power Banks

Power banks are life-saving tools. Medics, volunteers, and civilians rely on them during constant outages to charge phones, radios, and essential equipment. Near the frontline, communication is critical: it enables rapid response and timely evacuation during shelling. Staying connected means staying alive.

Starlink Mini

Starlink Mini is highly practical during evacuations of wounded soldiers and civilians. Mounted on a vehicle, it provides stable internet even while moving. Reliable communication is critical for rescue teams, enabling coordination, rapid decisions, and continuous medical support. In frontline areas where networks fail, Starlink Mini keeps teams connected and responsive. It also supports navigation, data transfer, and real-time updates — all of which can save lives.

Hand Warmers

Winter in Ukraine is extremely harsh, with temperatures dropping to -20°C at night and -15°C during the day. People work and survive in severe conditions. Simple chemical hand warmers help prevent frostbite and exhaustion. Each provides heat for 8–10 hours, keeping hands and feet warm. In such extreme cold, even a small source of warmth can save lives.

Mission Report: Delivered

These are the people we've been able to help thanks to your generosity. All requests for assistance are carefully reviewed and approved by the trustees in line with our governing documents, with identities verified and need assessed before support is provided.
