Medical Chronology

Source	Provider	Date	Occurrence
p. 17	Fisher, Janice	03/11/2011 @11:42	Medication Administration Administration of Nasonex 50 mcg/actuation nasal spray, use 2 sprays in each nostril once daily.
p. 17	Barrett, Daniel	07/18/2019 @00:00	Medication Administration Administration of Patanol 0.1% ophthalmic drops, instill 1 drop into affected eye(s) twice daily.
p. 17	Wilkerson, N.	07/13/2020 @00:00	Medication Administration Administration of Flonase Allergy Relief nasal spray.
p. 3	The Corvallis Clinic (In-House Lab)	07/13/2020 @12:28	Lab Result A comprehensive metabolic panel (CMP) was conducted, revealing a low sodium level of 135 mmol/L (normal range: 137-145). Other parameters such as potassium, chloride, carbon dioxide, glucose, urea nitrogen, creatinine, calcium, total protein, albumin, globulin, A/G ratio, total bilirubin, AST, ALT, and alkaline phosphatase were within normal limits, except for a high total bilirubin of 1.6 mg/dL (normal range: 0.2-1.3).
p. 4	The Corvallis Clinic (In-House Lab)	07/13/2020 @12:28	Lipid Panel Result A lipid panel was performed, showing a total cholesterol level of 218 mg/dL, which is high (normal range: 50-199). Triglycerides, cholesterol/HDL ratio, LDL, and HDL levels were within normal limits. The test was conducted using the Ortho Diagnostics Vitros 5600 Analyzer.
p. 5	The Corvallis Clinic (In-House Lab)	07/13/2020 @13:53	Hepatitis C Antibody Test A hepatitis C virus antibody test was conducted using an immunometric immunoassay, resulting in a negative outcome, indicating a low probability of hepatitis C infection.

Source	Provider	Date	Occurrence
p. 5	The Corvallis Clinic (In-House Lab)	07/13/2020 @16:58	Hemoglobin A1c Test The hemoglobin A1c test showed a level of 5.5%, which is within the normal range (4.0-6.0%). This indicates a low risk for diabetes, with the test performed using the Boranate Affinity method.
p. 17	Solensky, R.	05/12/2021 @00:00	Medication Administration Administration of Fluarix Quad 2020-2021 (PF) 60 mcg IM syringe.
p. 6	The Corvallis Clinic (In-House Lab)	10/15/2021 @13:07	Comprehensive Metabolic Panel A comprehensive metabolic panel was conducted, showing a high calcium level of 10.4 mg/dL (normal range: 8.4-10.2) and a high total bilirubin of 1.4 mg/dL (normal range: 0.2-1.3). Other parameters were within normal limits.
p. 7	The Corvallis Clinic (In-House Lab)	10/15/2021 @13:07	Lipid Panel Result A lipid panel was conducted, showing a total cholesterol level of 190 mg/dL, which is within the normal range. Triglycerides, cholesterol/HDL ratio, LDL, and HDL levels were also within normal limits.
p. 8	The Corvallis Clinic (In-House Lab)	10/15/2021 @14:43	Hepatitis C Antibody Test A hepatitis C virus antibody test was conducted using an immunometric immunoassay, resulting in a negative outcome, indicating a low probability of hepatitis C infection.
p. 8	The Corvallis Clinic (In-House Lab)	10/15/2021 @17:06	Hemoglobin A1c Test The hemoglobin A1c test showed a level of 5.3%, which is within the normal range (4.0-6.0%). This indicates a low risk for diabetes, with the test performed using the Boranate Affinity method.

Source	Provider	Date	Occurrence
p. 9	The Corvallis Clinic (In-House Lab)	01/09/2023 @14:59	Comprehensive Metabolic Panel A comprehensive metabolic panel was conducted, showing a high glucose level of 100 mg/dL (normal range: 70-99), high total protein of 8.3 g/dL (normal range: 6.3-8.2), and high albumin of 5.1 g/dL (normal range: 3.5-5.0). Other parameters were within normal limits.
p. 10	The Corvallis Clinic (In-House Lab)	01/09/2023 @14:59	Lipid Panel Result A lipid panel was conducted, showing a high total cholesterol level of 236 mg/dL (normal range: 50-199) and a high LDL level of 149 mg/dL (normal range: 10-130). Triglycerides, cholesterol/HDL ratio, and HDL levels were within normal limits.
p. 2	The Corvallis Clinic (In-House Lab)	01/09/2023 @14:59	Lab Result Lipid panel, serum ordered.
p. 2	The Corvallis Clinic (In-House Lab)	01/09/2023 @14:59	Lab Result CMP, serum or plasma ordered.
p. 2	The Corvallis Clinic (In-House Lab)	01/09/2023 @16:53	Lab Result Hemoglobin A1c, QN, blood ordered.
p. 2	(Dr.) Brant, Michael	01/09/2023 @17:24	Referral Referral to urologist for fertility care.
p. 17	Wadlington, M.	02/28/2023 @00:00	Medication Administration Administration of ketotifen 0.025% ophthalmic drops, instill 1 drop into affected eye(s) twice per day.

Source	Provider	Date	Occurrence
p. 17	Wadlington, M.	02/28/2023 @00:00	Medication Administration Administration of Zyrtec 10 mg tablet by oral route as needed.
p. 17	Wadlington, M.	02/28/2023 @00:00	Medication Administration Administration of Clear Eyes Complete.
p. 17	Wadlington, M.	02/28/2023 @00:00	Medication Administration Administration of Flonase Allergy Relief nasal spray.
p. 1	(Dr.) Brant, Michael	02/28/2023 @13:39	Vasectomy Follow-Up Patient will return in the future for the vasectomy.
p. 2	The Corvallis Clinic (In-House Lab)	04/17/2023 @20:39	Lab Result Semen analysis (post vasectomy) ordered.
p. 1	(Dr.) Brant, Michael	04/18/2023 @18:52	Vasectomy Follow-Up Patient will return to see us as needed.
p. 17	Wilkerson, A.	06/15/2023 @00:00	Medication Administration Administration of acetaminophen 300 mg-codeine 30 mg tablet by mouth as needed every 4 hours.
p. 17	Wilkerson, A.	06/15/2023 @00:00	Medication Administration Administration of diazepam 10 mg tablet by mouth prior to procedure.

							Hemoglobin A1c Interpretation: > 6.4% Diabetes 5.7-6.4% Increase risk for diabetes <7% Diabetes glycemic goal 2010 ADA		

recommendations for non-pregnant adults with diabetes Testing performed with the Boranate Affinity method. Hb F greater than 10 percent of total Hb, and conditions that shorten red cell survival(unstable hemoglobins and hemolytic anemia) may cause falsely decreased results. Iron deficiency anemia may cause falsely increased results.

Notes

Date	Note Type	Note	Provider Name and Address	Organization Details	Recorded Time
07/13/2020	text/html	The patient is a pleasant 38-year-old gentleman who comes in for annual exam. He suffers from hypertension he is doing well on his blood pressure medicines his numbers have been good he has tolerated without any problems or concerns. He has some seasonal allergies that he is taking over-the-counter medications for but otherwise feels good without problems or complaints	Bryce Cleary, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	07/13/2020 14:55:48
12/29/2020	text/html	The patient has been informed about the nature of telemed services compared to in-person care. We reviewed the nature of a telemed encounter, including but not limited to timing of service, record keeping, scheduling, privacy and security, protential risk, billing arrangements. All questions were answered, and the patient gave verbal consent to procede with a telemed visit. 38 yo male has 3 children with his new baby. He is asking about the vasectomy. He is very healthy and has no history of surgery or medical problems.	Daniel Barrett, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	12/29/2020 19:13:27
05/12/2021	text/html	I saw the patient for evaluation of allergies. He reports a long history of allergic rhinitis going back to childhood. He was on allergy injections for a few years during elementary school and that was in Chicago. He has lived in the local area since 2004. His symptoms are seasonal with the exception of reacting around animals, probably starting in February or March next standing sometime into the summer but he can't say exactly when they resolve but they do not go deep into September and October. He has not had allergy testing since childhood. This year, for example, he was having a lot of symptoms at the end of March and call for the appointment in early April which is typical. Ocular symptoms have become more prominent last few years resulting in using both ketotifen and Clear eyes which take the edge off but do not help enough. Also has nasal congestion specially in the morning and at night, difficulty sleeping normally there for fatigue, as well as itchy nose sneezing rhinorrhea. He is not around cats very much but when he is he would say this is most severe and strong allergy with shortness of breath asthmatic type symptoms in his chest as well as the nasal ocular symptoms. Also react to dogs but not as much. Treatment with Flonase and azelastine nasal sprays helps to some degree but not enough, although he does not use the azelastine regularly. Zyrtec also does not help enough and other antihistamines before like Claritin Allegra also did not. Tried Singulair for season in the past that did not help. PAST MEDICAL HISTORY: Healthy otherwise. ALLERGIES: No allergies to medications, insect stings, vaccinations or latex. Itching in the throat sometimes but not most of the time with apples and cherries. ROS: See allergy form. FAMILY HISTORY: Mother has allergic rhinitis and asthma. ENVIRONMENTAL/SOCIAL HISTORY: No central air conditioning at home. Works as a manager in office does have air conditioning. No animals at home. PHYSICAL EXAMINATION: For details, see the allergy form. Lungs are CTA. Prick puncture skin testing for grass pollen was most strongly positive, moderately positive to tree pollens and weed pollens and also alternaria, negative to bipolaris. Did not test indoor molds, dust mites or animals. DIAGNOSES Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria, and animals. Oral allergy syndrome due to apples and cherries. PLAN I reviewed the skin test result with the patient. We discussed treatment options for the pollen allergies including medications and desensitization therapy. He is clearly not gotten enough relief from medications on maximal treatment, therefore we discussed sublingual and subcutaneous immunotherapy. The subcutaneous is more ideal because it would treat all the pollens and also cat allergy where as the sublingual would only treat grass pollen and he fully understands that. I reviewed the time commitment involved, expected benefits, potential risks, and the patient wishes to pursue allergy injections. Therefore, allergy extract will be mixed and the patient will start allergy injections in early July. Continue Flonase 2 sprays each nostril daily and azelastine not just p.r.n. but 2 sprays each nostril b.i.d. His need for medication will greatly decline once on shots. Continue Zyrtec 10 mg p.o. q.day or p.r.n. Continue ketotifen eyedrops p.r.n. I explained the oral allergy syndrome reactions to the patient the house is a cross reaction because of similarity of protein structure of pollens and his case to trees and the foods. Follow up in July 2022. I spent 60 minutes on the encounter, including both face-to-face and non-face-to-face time (preparing to see the patient, reviewing records, test ordering and documenting in the clinical chart). _____ Roland Solensky, MD Allergy and Immunology	Roland Solensky, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	05/12/2021 16:00:21
10/14/2021	text/html	The patient is a pleasant 39-year-old gentleman who comes in for annual exam. He suffers from hypertension and allergies. He has been doing relatively well. He has been checked his blood pressure at home with the numbers are better than he gets today. He denies any new problems or complaints	Bryce Cleary, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	10/14/2021 17:40:04
07/13/2022	text/html	SUBJECTIVE: I saw the patient for a follow up office visit for allergic rhinitis and oral allergy syndrome. He started allergy injections last September and has been very consistent about coming in, reached a dose of 0.4 mL by late April, no systemic reactions and minimal occasional localized reactions. His worst season is tree and grass pollen and overall he reports tremendous improvement. He really did not use very many allergy medicines at all, in June he thought he had allergies but ended up being a URI so he never really use the Flonase much, same goes for the antihistamines like Zyrtec, occasionally rarely uses azelastine nasal spray. Also no need to use ketotifen eyedrops. He eats apples regular year-round, before he would sometimes but not always reactive them, now he does not react to them at all. He has not tried cherries. He is never around cats. PHYSICAL EXAMINATION: HEENT exam is normal. Lungs are CTA. DIAGNOSES Perennial/seasonal allergic rhinitis/conjunctivitis due to tree, grass, weed pollens, alternaria, and cats. Oral allergy syndrome due to apples and cherries. PLAN Remix allergy extract and continue allergen immunotherapy for 4 more years and I reviewed the reasoning behind that with the patient. Continue p.r.n. azelastine nasal spray or Zyrtec p.r.n. Follow up in 1 year. _____ Roland Solensky, MD Allergy and Immunology	Roland Solensky, MD 444 NW Elks Drive, Corvallis, OR, 97330-3745, US	OR - Corvallis Clinic PC	07/13/2022 19:16:50
01/09/2023	text/html	Patient is a pleasant 40-year-old gentleman who comes in for annual exam. He is generally doing well without problems or complaints. He would like a referral for a urologist to get a vasectomy	Bryce Cleary, MD	OR - Corvallis Clinic PC	01/09/2023 15:37:04
