

AI-Native. Human-Led.

Android Automotive Solutions

intive is an AI-native software engineering partner that blends technical excellence with human-centric design.

Our experts develop software-intensive Android automotive solutions, from infotainment prototypes to production-ready systems, driving digital transformation across the automotive industry.

Our expertise in Android Automotive Solutions

Platform development

- AOSP / Android Automotive (AAOS) integration and customization

System integration

- Vehicle HAL development
- CAN / Ethernet integration
- Integration of control hardware

HMI & UX

- Native app development
- System app development
- Service development
- RRO development
- Integration of 3D content

Pre-development

- Proof of concepts
- Exploration tasks
- Prototypes

End-to-end series development

CI/CD & DevOps Infrastructure

- Automated build and release pipelines
- Artifact & image management

System Architecture & OS-Image Development

- Platform and system architecture
- OS-image engineering

App Development & System Adaptation

- Application framework & HMI integration
- Hardware/OEM abstraction & adaptation

Test Strategy & System Validation

- Continuous test pyramid
- Test automation & telemetry

Safety, Security & Lifecycle Management

- Functional safety & compliance
- Security, OTA & maintenance

Android Automotive Solutions

What you gain when you work with intive:

 26 Years of Proven Expertise

With over two decades of cross-industry experience, we deliver high-impact digital solutions that drive measurable business growth.

 Certified Excellence & Safety

Our ASPICE Level 2 certification guarantees adherence to the highest industry standards for safety, quality, and compliance.

 AI-Native Speed & Human-Led Precision

We turn AI into a core engine for growth, using intelligent workflows to manage complexity while ensuring architectural reliability through human oversight.

 High-Performance & Tailored Delivery

Our teams integrate the latest technologies into custom solutions, ensuring high-performance results by aligning every project with your specific business goals.
