

# PROTECT YOUR INVESTMENT PROTECT YOUR TRAILER FLOOR

Get the ultimate flooring protection and extend floor operation life with coatings proven to increase ROI and durability.

## FLOOR SHIELD TOPCOAT

Developed for superior moisture protection on the topside of floors in new and old trailers.

### Water-Based

Contains no volatile organic compounds (VOCs) and is environmentally preferred.

### Resists Moisture

Inhibits moisture from soaking into the trailer flooring.

### No Mixing

Ready to use out of the container with easy application on old trailer floors.

### Dries Fast

Requires minimal downtime when applied to an existing trailer floor. Tack-free in minutes.

## HD COATINGS

All-new factory-applied hot melt polyurethane coatings, available as a topcoat and/or undercoat.\*

### PUR Moisture Barrier

Hot melt polyurethane coating protects your floor and makes it last longer than ever before.

### Seals and Protects

Shields and protects your flooring from spills and minimizes moisture damage.

### Improved Uptime

Decreases maintenance needs and keeps trailers running longer.

### Water Resistant

Extends the life of your floors and cuts the cost of trailer ownership in the long run.

\*Not required for Fusion Floor®.
