

Empowering Your Business

Simplifying today's complexities to
conquer tomorrow

Bridging functional expertise with digital ingenuity

Aligned Automation is a professional technology services company that specializes in understanding your organization's priorities, transforming data into actionable intelligence, empowering businesses to act decisively, course correct and stay ahead in a rapidly changing business environment. We leverage AI-driven intelligence, machine learning, and tailored insights to enable organizations to scale efficiently, profitably, and sustainably.

4-6x ROI

We've delivered tangible returns through increased operational efficiency and cost optimization.

TAILORED SOLUTIONS

Intelligent, industry focused solutions, connected across your value chain that drive sustainable value realization, resilience and enhanced human experiences.

Procurement

Drive innovation, boost profitability and minimize time to market by connecting your planning, sourcing, procurement, and production activities.

Supply Chain

Reimagine, build and operate supply chain networks that orchestrate change, simplify life and positively impact business and the planet.

Manufacturing

Optimize, digitize and connect factories, plants and sites. Create products that customers love, and get them to market quickly, sustainably and cost-effectively.

Customer Experience

Unlock market relevance and performance by integrating a relentless focus on the customer into your end-to-end operations.

REAL VALUE, REALIZED

Fortune 500 clients trust our services to continuously unlock value while overcoming their most complex, mission-critical challenges.

Addressing your full spectrum of Data and Digitalization needs to accelerate your transformation strategy.

Cloud & Infrastructure Modernization

Optimize and modernize traditional IT infrastructure for enhanced scalability, agility, and cost efficiency.

Data & Analytics

Operationalize enterprise data for consumption by ensuring accessibility, accuracy, availability and security.

Process Transformation

Reimagine business process and achieve efficiencies at scale by maximizing throughput and minimizing cost.

AI /GenAI & ML

Deliver intelligence and unlock hidden value embedded in enterprise data ecosystem.

App Development & Modernization

Develop and deploy user-centric business applications and seamlessly deliver intelligence for consumption.

Why work with us?

System and Tool Agnostic

We understand your needs and meet you where you are to deliver sustained value leveraging your existing technology stack.

Domain Expertise Across Verticals

We deliver value-centric solutions by leveraging our deep techno-functional expertise and a suite of high-performance accelerators.

User-Focused Design

We focus on improving everyday experiences and we put people at the center of every solution we develop.

Accelerated Time-to-Value

We execute in an agile-way using our FAST90 methodology and provide sustained value with integrated change management.

“Speed is the differentiator. Aligned Automation provided less friction, more flexibility and more comfort with experimentation than most vendors could offer.”

Allen Yu,
Chief Procurement Officer

We're game changers

We deliver connected, contextual, and continuous intelligence to empower decision-making. Are you ready?
