

**BOOT Düsseldorf 2026:
Amare unveils carbon fiber production & AMY
395e–420e**

Düsseldorf, Germany – January 2026 — Amare Group is proud to announce its participation in BOOT Düsseldorf 2026, where the company will present key milestones marking a new phase of growth, innovation, and industrial capability. At BOOT Düsseldorf, Amare Group will officially unveil its full carbon fiber production program, which will be fully operational from 2026 at the company's headquarters and production plant in Pozzilli, Italy. This strategic investment strengthens Amare's in-house manufacturing expertise, ensuring greater quality control, flexibility, and advanced customization across its product portfolio.

In parallel, Amare Group will present the expansion of the AMY Tender range, confirming production of the AMY 395e and AMY 420e. Building on the success of the AMY 330e, these new models extend Amare's vision of sustainable marine mobility, combining lightweight carbon fiber construction, advanced propulsion solutions, and refined Italian design for larger superyacht tenders.

BOOT Düsseldorf 2026 represents a key platform for Amare Group to share its long-term vision—uniting engineering excellence, sustainability, and a people-first culture—while reinforcing its position as a leading innovator in the global marine industry.

Visitors, partners, and media are invited to meet the Amare Group team at BOOT Düsseldorf 2026 to discover the next chapter of the AMY range and Amare's advanced manufacturing future.
