NG

New Generation

Hull Installation

NG is a lightweight, minimalist porthole distinguished by refined finishes and high-performance mechanical components for outstanding durability and long service life.

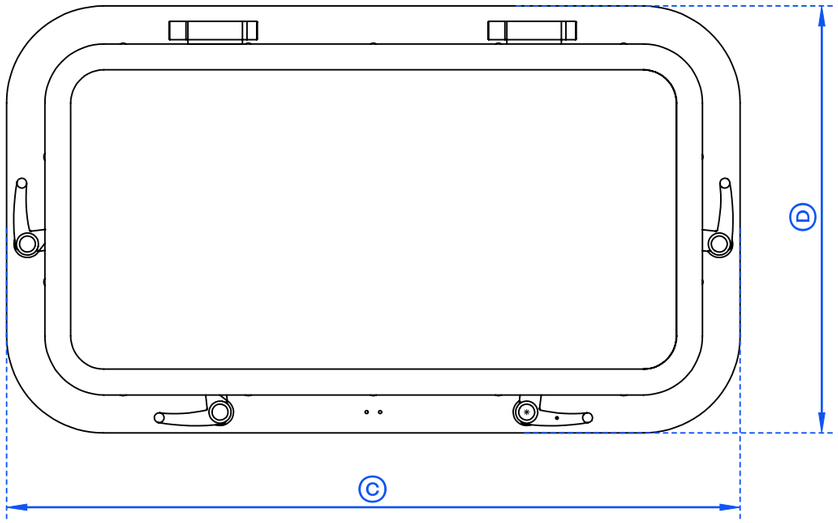

Developed by Amare R&D for fiberglass applications, it continues to evolve in line with the latest certification standards, meeting the demands of modern marine design.

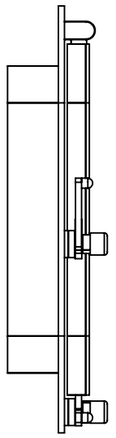

Minimal Design

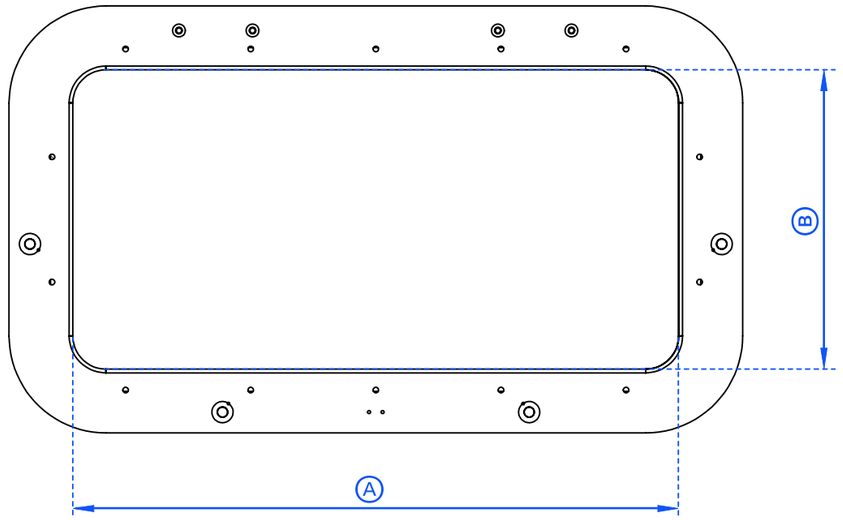

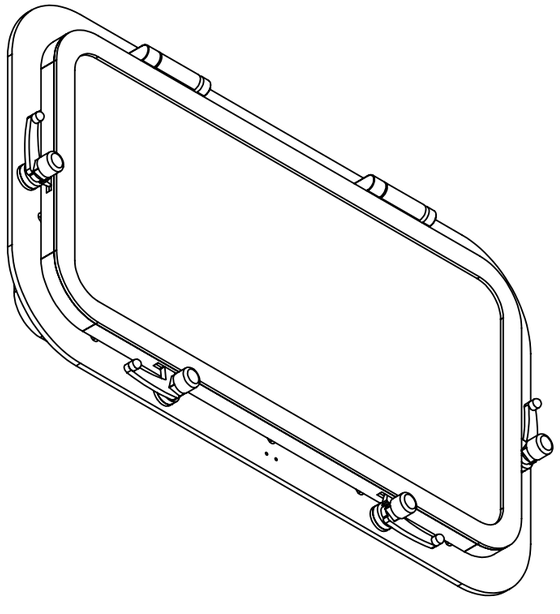

The use of certified materials, including Stainless Steel 316L, ensures excellent performance with outstanding strength and corrosion resistance.

The weathertight gasket provides high impact resistance, making it suitable for yachts, motorboats, and commercial vessels.
