

Space Station Storage Centre Electrical Fit-Out

Location: Birmingham

Sector: Commercial

Client: Space Station

Full electrical fit-out for a new commercial storage facility, including power, lighting, security, and data systems.

What We Delivered

- High-capacity power system
- Energy-efficient LED lighting
- CCTV, fire and intruder alarms
- Server room and data points

The Challenge

A large facility with a tight schedule, requiring safe, reliable power, full lighting, and robust security before opening to customers.

The Outcome

We completed the project in 881 hours, on time and within budget. Delivering safe, efficient, and future-ready electrical systems.
