

Mercedes Truck Workshop

Location: Witham

Sector: Commercial

Client: Mercedes Benz

Electrical installation for Mercedes' new truck workshop, including power, lighting, fire alarm, data, and EV charging.

What We Delivered

- High-capacity power distribution with LED lighting
- EV charging points and specialised outlets
- Fire alarm and data/network systems
- Commissioning and compliance testing

The Challenge

Mercedes needed a high-capacity workshop for heavy-duty, electric, and hybrid vehicles, completed on a tight schedule.

The Outcome

Installed a durable electrical system with power, lighting, EV charging, and fire/data systems, completed on time and ready for use.
