

KODA Ideaworks Capability Statement

A research & development company focused on hypodermic needle safety.

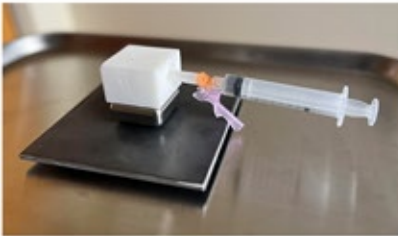

Core Capabilities of HypoHolder (HH)

Our flagship product, HypoHolder, is a FDA class I engineered safety medical device that secures the cap of a hypodermic unit (cap, needle, luer lock syringe), allowing the user to uncap, recap, and dispose of a hypodermic unit with **JUST ONE HAND**; preventing hypodermic needlestick injuries.

Surgical HypoHolder

- Surgical HypoHolder: Sterilizable stainless-steel pin & handle base
 - Magnets in bases secure HypoHolder to surgical tray
- HypoFoam: Sterile, disposable, single foam in peel pack
 - Secures to Surgical HypoHolder pin base

Clinic HypoHolder

- Clinic HypoHolder: Clean countertop version with anti-skid pad
- Clean, disposable, single foam in peel pack

Lite HypoHolder

- Clean, disposable, clean foam single use device
- Temporarily secures to flat/dry/clean surfaces using removable adhesive strips

HypoFoam

- Sterile, disposable, single foam in peel pack
- Secures to Surgical HypoHolder & Clinic HypoHolder pin base

Key Differentiators That Set HypoHolder Apart

- Allows ONE-HANDED use with hypodermic unit
- Works in all environments involving luer lock hypodermic needles
- Compliant with healthcare, research, EMS/Ambulance environments
- Mobile & Ergonomically designed

Applicable NAICS Codes for HypoHolder Distribution & Use

- 423450- Medical, Dental, and Hospital Equipment and Supplies Merchant Wholesaler
- 541714- Research & Development in Biotechnology (except Nanotechnology)
