

**FOR IMMEDIATE RELEASE**

## **Grand Touring Automobiles Brings Hypercar Dreams to Life at the 2026 Canadian International AutoShow**

*Our nine-vehicle display marks Land Rover's return and features the Canadian debuts of Aston Martin Valhalla, Bugatti Mistral, and Koenigsegg Jesko.*

TORONTO (February 12, 2026) — Grand Touring Automobiles returns to the 2026 Canadian International AutoShow with a **nine-vehicle display** featuring **Land Rover's return to the show** and six of the world's most coveted superluxury and hypercars, including **three Canadian debuts**: the **Aston Martin Valhalla, Bugatti Mistral, and Koenigsegg Jesko**.

"This year's display truly shows the breadth of our offering here in Canada, and we are thrilled to share our lineup with 2026 AutoShow visitors," said **Paul Cummings, Dealer Principal and CEO of Grand Touring Automobiles**. "Presenting the Aston Martin Valhalla, Bugatti Mistral, and Koenigsegg Jesko for their first Canadian AutoShow appearances is a milestone for us and a rare opportunity for enthusiasts. To have them all in the same place at the same time is a special occasion, and something we think that this year's visitors will appreciate. Our clients have been incredibly generous in enabling this to happen."

### **On display: Grand Touring Automobiles at the AutoShow**

Grand Touring Automobiles' display will be in the **North Building of the Metro Toronto Convention Centre** and will include:

- **Aston Martin Valhalla (Canadian debut)**

The Valhalla is Aston Martin's first series-production mid-engine hypercar. Finished in Podium Green over Black Alcantara, this model pays tribute to Aston Martin's Formula 1 heritage. Its bespoke 4.0L Twin-Turbo Flat-Plane V8, paired with three electric motors, delivers 1,012 hp, accelerating from 0–60 mph in just 2.5 seconds and reaching a top speed of 350 km/h. This marks the Valhalla's Canadian debut.

The Valhalla was developed in collaboration with Red Bull Racing, positioned as a more usable counterpart to the brand's track-focused Valkyrie hypercar. Originally announced under the project name AM-RB 003, the Valhalla draws on advanced aerodynamic and structural technologies first showcased on its predecessor and

AUTOMOBILES

follows Aston Martin's tradition of "V" named performance models. Designed with dihedral doors and a carbon-fiber monocoque, the Valhalla blends striking form with functional engineering.

- **Bugatti Mistral (Canadian debut)**

The Bugatti Mistral, the fastest open-top production car in the world, achieves 453.91 km/h (282 mph). Handcrafted in Molsheim, France, this two-seat mid-engine roadster is the final model powered by Bugatti's legendary 8.0-litre quad-turbo W16 engine, producing 1,600 PS (1,578 hp) via a seven-speed dual-clutch transmission. Only 99 units exist.

Its aerodynamic design is strikingly unique, with four-stripe front lights and twin arrow-shaped rear LEDs pointing to the illuminated Bugatti emblem. The interior blends Chiron-inspired luxury with exclusive touches, including a sculptural amber gear lever featuring the iconic "Dancing Elephant" by Rembrandt Bugatti.

- **Koenigsegg Jesko (Canadian debut)**

The Koenigsegg Jesko is a limited-production Swedish hypercar that pushes the boundaries of performance. Revealed at the 2019 Geneva Motor Show, it succeeds the legendary Agera and honors company founder Christian von Koenigsegg's father. Powered by a 5.0-liter twin-turbo V8 producing up to 1,600 hp on E85 biofuel and paired with the innovative 9-speed Light Speed Transmission, the Jesko combines extreme power with advanced engineering. Its carbon-fiber chassis, active aerodynamics, and features like the Autoskin system showcase Swedish craftsmanship designed for both road and track.

Available in the high-downforce Jesko Attack and low-drag Jesko Absolut, the platform delivers record-setting performance, including 0–400–0 km/h acceleration feats. Limited to 125 units, the Jesko has earned accolades such as *Top Gear's* Hypercar of the Year, cementing its reputation as one of the world's most extraordinary performance cars.

- **Lamborghini Temerario**

The Lamborghini Temerario is a new mid-engine plug-in hybrid supercar that marks the return of a V8-powered mid-engine Lamborghini for the first time since the iconic Jalpa of the early 1980s. Named after a legendary fighting bull from 1875, "Temerario" translates to fierce and courageous—a fitting description for the brand's latest expression of performance and design. It is only the second Lamborghini to feature a twin-turbocharged V8, signaling a bold new chapter in the company's hybrid performance strategy.

At its heart is an all-new 4.0-litre twin-turbo V8 paired with three electric motors, delivering a combined output of more than 900 horsepower. The advanced

powertrain allows the Temerario to rev beyond 10,000 rpm—an unprecedented achievement for a Lamborghini road car—while maintaining the immediacy and emotion expected of the brand. Power is delivered through an eight-speed dual-clutch transmission, creating a seamless blend of electrification, cutting-edge engineering, and unmistakable Lamborghini character.

- **Bentley Flying Spur Black Edition**

The Bentley Flying Spur Black Edition expands its fourth-generation lineup with a refined 671-horsepower High Performance Hybrid powertrain. This V8-based plug-in hybrid system delivers an effortless 0-60 mph sprint in just 3.8 seconds and a top speed of 168 mph, proving that even the "entry-level" electrified Spur outperforms most traditional performance sedans while offering up to 50 miles of near-silent, electric-only range. Inside, this smoother power delivery creates a sanctuary of calm, featuring Wellness Seating with automatic climate sensors and postural adjustment air pockets that work in harmony with the hybrid's quiet operation to reduce occupant fatigue. The Black Edition stands out with its limited production run of only 400 units worldwide, dramatic all-black design elements like Blackline exterior detailing, exclusive interior touches such as Black Edition-embroidered seats and Piano Black trim.

- **Rolls-Royce Cullinan Black Badge**

The Rolls-Royce Cullinan Black Badge is an ultra-luxury SUV that pushes Rolls-Royce's flagship model into a more provocative and performance-oriented realm, combining a dark, highly bespoke aesthetic with enhanced engineering and craftsmanship: its exterior features fully blacked-out brightwork—including the Spirit of Ecstasy, grille, window surrounds and door handles. 23-inch Black Badge wheels and widened lower air intakes, while the interior showcases advanced materials like Technical Carbon and Duality Twill textile with millions of stitches, a unique illuminated Clock Cabinet with a black Spirit of Ecstasy inside, digital dials. Mechanically it retains a potent twin-turbo 6.75-liter V12 producing about 600 hp and enhanced torque with recalibrated transmission and exhaust for sharper response, giving it a more commanding and visceral presence without sacrificing Rolls-Royce refinement.

- **Land Rover 2026 Lineup**

Grand Touring Automobiles will also showcase three 2026 Land Rover models: the Range Rover Sport P360 S, the Range Rover P400 SE Short Wheelbase, and the Defender 110 P400 X-Dynamic SE with the optional Urban Widetrack kit.

**Grand Touring Automobiles** continues to deliver an unparalleled selection of rare and exotic vehicles, making its AutoShow display a must-see destination for automotive enthusiasts and collectors alike.
