The offshore access solution with an unparalleled track record

The A-type is the offshore access system you need if you want to perform safe personnel transfers in sea states up to 3m H_s. Because of its full motion compensation, there is no movement in the gangway during operation, resulting in the safest and most comfortable way of personnel transfer. The A-type can transfer 25 people in under five minutes from a vessel to a fixed or floating offshore asset.

A proven system that is safe, reliable, and efficient.
