

System specifications

- Gangway length** 30m
- Weight** 105mt
- Workability** Safe transfers up to 4.5m Hs
- Footprint** 8.4 x 9.5m (excl. gangway)
- HPU** 2 x 20ft container
- Certification system:** Lloyd’s certified. Sea fastening: DNV approved
- Vessel requirements** ≥70m

Full motion compensation in rough waters

No movement of gangway during operation

Plug and play

System mobilisation within 24 hours

Easy connection to offshore structure

No modifications to landing location needed

Ship to ship for transfer between two floating objects

Including floating wind turbines

Services

OCC 24/7 support | Project preparation and execution | Maintenance, repairs and spare parts | Ampelmann Insights: workability forecasts and data services

The proven solution for safe personnel transfers in even the roughest waters

The E-type is the system you need for safely transferring personnel in sea states up to 4.5m H<sub>s</sub>. It is fully motion compensated in all six degrees of freedom, resulting in zero movement of the gangway, even in the roughest weather conditions.

A system that is safe, proven and efficient.
