

System specifications

**Gangway length** 30m

**Cargo capacity** 1,000kg

**Weight** 105mt

**Workability** Safe transfers up to 4.5m Hs

**Footprint** 8.4 x 9.5m (excl. gangway)

**HPU** 2 x 20ft container

**Certification system:** Lloyd's certified. Sea fastening: DNV approved

**Vessel requirements** ≥70m

Full motion compensation in rough waters

No movement of gangway or crane during operation

Efficient operation with crane and gangway in one

Change from people to cargo transfer mode in less than a minute

Large cargo loads

Up to 1,000kg fully compensated lifting

Crane height

Up to 35m from vessel deck

Ship to ship for transfer between two floating objects

Including floating wind turbines

E1000

The offshore access solution that transfers people and cargo up to 1,000kg

The E1000 system is the proven solution for safely transferring people as well as cargo up to 1,000kg in sea states up to 4.5m Hs. It is fully motion compensated in all six degrees of freedom, resulting in zero movement of the gangway or crane boom and ensuring a stable load.

A system that is fast, efficient and multifunctional.
