

System specifications

- Cargo capacity 4.8mt
- Gangway length 30m
- Class approved hoist curve
- Weight 151mt (excluding pedestal)
- Footprint 8.4 x 9.5m
- HPU 2x 20ft container
- Certification system Lloyd's certified (CLAME)
- Vessel requirements ≥80m
- Vessel type DP2

People and cargo transfers in one system

Plug and play system for transfer of technicians, tools and equipment

Fully motion compensated cargo lifts

4.8mt cargo lifts ideal for safely and accurately lifting generators and winches

Switch between operational modes < 1 minute

Reduce deck space and eliminating need for separate crane and gangway

Highest workability and reliability, based on proven E-type technology

Services

OCC 24/7 support | Project preparation and execution | Maintenance, repairs and spare parts | Ampelmann Insights: workability forecasts and data service

E5000

The all-in-one access solution for personnel and cargo

The E5000 is the only fully motion compensated system to safely transfer personnel and cargo up to 4.8mt in sea states as high as 4.5m H<sub>s</sub>. Based on trusted E-type technology, the E5000 can switch between operational modes in less than a minute, maximising operational efficiency and significantly extending seasonal windows.

A multifunctional system that is safe, efficient, and versatile.
