Integrity, Service, Dedication, & Excellence

Integrity, Service, Dedication & Excellence

About Spartan Medical

Spartan Medical is a veteran-owned-and-operated government contractor for the U.S. Department of Veterans Affairs (VA), the U.S. Department of Defense (DoD), and other local, state, and federal agencies. Our senior executives have all held leadership positions in both the public and private sector, and our core strength is solving complex problems through creative thinking, innovative solutions, and highly skilled flexible teams. Spartan Medical maintains its vanguard position by providing medical facilities with A-to-Z solutions that improve patient care and outcomes, especially for America's military and veteran communities.

The Spartan Story

Spartan Medical Inc. was founded in 2008 by a former Air Force Intelligence Officer to provide an extensive portfolio of advanced medical devices and technologies from premier manufacturers to surgeons at VA medical centers, DoD medical facilities, civilian hospitals, and ambulatory surgery centers (ASCs) across the country.

"I started Spartan Medical to radically change the way the medical device business works," said Vince Proffitt, Founder and President of

Spartan Medical. "I saw large companies beholden to shareholders and profits, with waning focus on the mission. I wanted to build a business that could provide a full armamentarium of surgical solutions focused on improving patient care and outcomes, because we and our loved ones will all be patients one day. Spartan Medical has done just that - with an extensive portfolio of the most innovative surgical and clinical solutions available on the market."

Why THINK SPARTAN®

Spartan Medical Contracts

Spartan Medical is recognized as a “top priority vendor” in the DoD as a CVE-certified, Service-Disabled Veteran-Owned Small Business (SDVOSB) and has been awarded 700+ federal government contracts, including multi-year Blanket Purchase Agreements at over 30 major military treatment facilities with 15 + years of flawless performance.

Spartan Medical was awarded a Defense Logistics Agency Troop Support’s (DLA Troop Support), Distribution and Pricing Agreement (DAPA) **Contract #: SP0200-19-H-0051** in support of the Department of Defense (DoD) and in coordination with the **Medical/Surgical Prime Vendor (MSPV) Program** (Cardinal Health PVON: 118845 | Owens and Minor PVON: 5967).

Nearly 1000 DAPA Line-Item Numbers (DLINs) from over 60 manufacturers available on contract including:

- Sterile, Single-use Implants/Instruments
- Spine/Orthopedic Hardware
- Orthopedic Navigation Technologies
- Medical Devices
- Biologics
- Demineralized Bone Matrices (DBMs)
- Synthetic Bone Void Fillers
- Advanced Wound Care Solutions
- Regenerative Medicine Technologies
- Allograft Tissues

Adding Value through Direct Client Advocacy

To create value and provide additional contractual support for DoD Medical Treatment Facilities, Spartan Medical created a new Client Advocacy Division. Our team of Client Advocates are standing by as a liaison between Spartan Medical and DoD Medical Treatment Facilities to help address clinical needs by providing solutions “on contract” for DoD providers and their patients. Below is a list of value-add services available through our Client Advocacy Team:

- **Provide catalogs, brochures, technique guides, and other useful** information for available products on contract, with associated DAPA Line-Item Numbers (DLINs), to help DoD facilities quickly and easily identify items based on the clinical need.
- **Conduct market research** for items on contract, identify like-for-like replacements for discontinued items, or items on backorder/recall/not available from another vendor.
- **Cross-reference commonly ordered items with like-for-like equivalents on contract.**
- **Offer periodic peer-to-peer virtual educational events**, presented by a Medical Doctor or PhD, for DoD providers and clinical staff to learn the science and clinical data supporting product solutions available on contract.
- **Schedule Continuing Education Credit (CEU) events** for DoD staff from actively available programs offered through our manufacturing partners to meet professional requirements.

Founded with purpose, driven to serve others, dedicated to improving patient care and outcomes, and instilled with a military pursuit of excellence, Spartan Medical always gets the job done. We can achieve any solution needed yet remain nimble enough to provide rapid-response, personalized support. When your facility has a clinical need that requires a product solution on contract...**THINK SPARTAN®**.

Ordering Allograft Tissues & Biologics

To place an order, call/fax 1-888-240-8091 or email cs@spartanmedical.com

Spartan Medical's Customer Service department is available to answer questions and process requests Monday through Friday from 8:00 am until 6:00pm Eastern Standard Time. On-call service is also available for emergencies after hours. Staff is available 24 hours a day, 7 days a week, 365 days a year.

Please use the Surgeon Preference Biologics Order worksheet to ensure you have all necessary information prior to placing your order. Advanced ordering is recommended to ensure prompt delivery. A purchase order number is always required prior to shipment to effectively place an order.

To place an order call/fax 1-888-240-8091 or email cs@spartanmedical.com

Shipping

All local orders are handled by an established courier service or FedEx. We utilize FedEx Priority for all orders outside the local service area.

Packaging and Preservation

State-of-the-art techniques are utilized to package and preserve tissue. All packaging is completed in continuously monitored cleanrooms and placed in double heat sealed envelopes. Allografts are then preserved utilizing one of the following commonly accepted methods:

- **Freeze-drying or lyophilization:** This is the most commonly applied preservation method for tissues. Specific freeze-drying cycles are utilized to ensure a residual moisture level of 6% or less.
- **Freezing:** A method in which allograft tissue is packaged and then stored at -40 degrees celsius or colder.

Packaging & Preservation

To place an order call/fax 1-888-240-8091 or email cs@spartanmedical.com

Recommended Procedure for Handling and Reconstitution of Freeze-Dried Allografts

Freeze-dried allografts are stored at ambient temperature (11°C-25°C; 52°F-77°F). Rehydration time varies with the type of allograft. Freeze-dried weight bearing bone allografts that are to be sawed, drilled, or shaped should be rehydrated to ensure that the tissue will not be brittle. If the allograft is to be rehydrated longer than two hours, it should be refrigerated until use. Smaller non-weight bearing bone allografts generally do not require rehydration.

Once removed from the package, the allograft should be implanted immediately or refrigerated and used within 24 hours (if stored with proper precautions to prevent contamination).

Please refer to package insert for detailed instructions.

Recommended Procedure for Thawing Frozen Allografts

To prepare the allograft for use, it must be thawed. Thawing time for most frozen allografts is about 15-30 minutes at room temperature. For larger structural grafts, thaw for up to one hour. Soft tissue allografts must be thawed until they become soft and pliable.

Once thawed, the allograft should be implanted immediately or refrigerated and used within 24 hours (from start of thawing) if stored with proper precautions to prevent contamination.

Please refer to package insert for detailed instructions.

Transit and Storage Temperatures

Frozen allografts are shipped to VA hospitals on dry ice and should be stored at -40° Celsius or colder until use. Temperatures between -20° Celsius and -40° Celsius are acceptable for short-term storage (six months or less). Unless it is being thawed for implantation, a graft removed from the freezer should be maintained in a transport container with dry ice completely surrounding the allograft. The time the graft is removed from and returned to the freezer should be documented in the Allograft Management Log. Care should be taken when working with dry ice, as burns may result from contact with unprotected skin.

Freeze-dried allografts do not have a specific required environmental temperature during shipping and are shipped at ambient temperature. Upon receipt, freeze-dried allografts should be stored at ambient temperature (11°-25°C; 52°F-77°F).

The methods of processing and storage utilized by LifeLink Tissue Bank are well documented and have been proven effective by many years of clinical experience. **It's incumbent on each facility to read the package insert that accompanies each Biologic product to confirm proper storage conditions.**

Tracking

Traceability of each allograft is maintained by means of an automated system. Each allograft is assigned a unique identifying number that allows complete traceability from the donor through each stage in processing, storage and shipment to the end user. Included with each packaged allograft is an Allograft Implant Record which must be completed and returned upon implantation. This information is essential for maintaining a complete record of all allografts shipped from any tissue bank.

SPARTAN MEDICAL'S MISSION

Spartan Medical's mission is to Improve patient care and outcomes by providing the most advanced medical technologies and solutions while remaining committed to our core values of integrity, service, dedication and excellence. Founded with purpose, driven to serve others, and instilled with a military pursuit of excellence, Spartan Medical always gets the job done. We see the most difficult problems facing veterans and active-duty military as an opportunity to demonstrate our value and commitment...no matter the challenges or obstacles. **When there is a need for A-to-Z programs, processes, and advanced medical solutions on contract, THINK SPARTAN®.**
