

INDIA-COMPLIANT NETSUITE DATA BACKUP

Automated daily backups to servers on Indian soil, with full compliance with MCA Rule 3(5), without ever leaving NetSuite.

THE COMPLIANCE GAP

Since 2022, Indian law requires every company's books of account to be backed up daily to servers physically located in India, no matter where the parent's NetSuite instance is hosted. NetSuite has no native way to do this, and manual exports don't hold up in a statutory audit.

India

Servers holding your books must be physically located here

Daily

Year-end or periodic backups no longer meet the rule

HOW DATA VAULT LITE SOLVES IT

Automated daily backup

Every new or changed record is captured automatically each day, so your backup is never more than 24 hours out of date.

Native to NetSuite

Runs fully inside NetSuite, and is therefore fully secure. No external software, no manual exports, and no disruption to your existing setup.

Built for the regulation

Purpose-built to satisfy Rules 3(5), 3(1) and 3(6) in a single, continuous workflow.

₹50K-5L

penalty avoided, charged personally to the responsible officer

HOW IT WORKS

01 —————> 02 —————> 03 —————> 04

Detect

Identifies new or changed records each day via NetSuite date criteria.

Extract

Only incremental changes move daily, keeping the process fast and light.

Transmit

Pushed securely to India-based cloud storage via native integration.

Organize

Files land in an FY-based hierarchy, ready for audit and RoC filing.

EVERYTHING THAT MATTERS, BACKED UP

Master Data

Customers • Vendors • Items

Transactions

AP • AR • GL • FA

Reports

Income stmt • balance sheet

Attachments

WHY TVARANA

Deep expertise in NetSuite & Indian regulation

Proven & cost-effective in live environments

Native experience, nothing new to learn

Scalable & secure enterprise-grade storage

DataVault Lite: How it compares

Feature / Capability	Tvarana (DataVault Lite)	Other Providers
Positioning	Native NetSuite solution with storage, integration across AWS, Azure, and other cloud platforms	Mostly manual scripts, generic iPaaS/ETL tools, or consulting-only approaches
India Hosting	✓	Varies
MCA Rule 3(5) Compliant	✓	Partial / self-assembled
Native NetSuite Integration (No Middleware)	✓	Mixed — often needs middleware
Historical Data Migration	✓	Ad hoc / manual
Daily Backup	✓	Yes, needs full re-exports
Month-end / Accounting-period Refresh Logic	✓	Rarely offered
Comprehensive Audit Trail	✓	Rarely offered
Automated Structured Folder Hierarchy (FY > Month > Category)	✓	Manual, inconsistent
Attachments Backup (Invoices, SOWs, Bills)	✓	Rarely included
Compliance Certifications	✓	Varies by vendor
Implementation Timeline	~3 weeks	Varies, often longer
Encryption Mechanism	✓	Rarely included
Company Track Record	2000+ NetSuite projects (India/US/Europe/Middle-East/APAC), award-winning Oracle NetSuite Partner	Varies

Don't let your India entity carry a compliance risk.
